Summary

- Experienced RPA Automation Developer proficient in UiPath, adept at spearheading automation projects to streamline processes and enhance operational efficiency.
- Skilled in resolving defects, optimizing workflows, and designing new automation processes to drive significant time and cost savings.
- Collaborative team player, adept at understanding business requirements and tailoring automation solutions to meet specific needs.
- Offers technical expertise and support, guiding team members and stakeholders on best practices in UiPath development and implementation.

Experience

WNS Global Service | Program Analyst

2023 – Present

RPA Scale Project

Project Responsibilities

- Developed robust code for various automation processes using UiPath, ensuring seamless execution and adherence to project requirements.
- Provided timely and effective resolution to client queries, demonstrating strong problem-solving skills and enhancing client satisfaction.
- Collaborated with stakeholders to analyze and implement new requirements, ensuring alignment with project objectives and client needs.
- Proactively sought opportunities to optimize automation processes, enhancing efficiency and effectiveness while maintaining high standards of quality.
- Proficient in UiPath activities, workflows, and orchestrator.
- Expertise in designing, building, and maintaining automation solutions.
- Strong understanding of RPA concepts, including process analysis, design, and implementation.
- Experience in integrating with various applications and databases.

Internship – WNS

2022 – 2023

Document processes: Create clear and concise process maps, flowcharts, and documentation using tools like draw.io and Visio.

Deploy and monitor bots: Assist in deploying developed bots into production environments and monitor their performance.

Assist senior developers: Support senior RPA developers on more complex automation projects.

Stay updated on RPA technologies: Research and learn about the latest advancements in RPA technologies, tools, and best practices.

Projects

Project1: Automated Loan Processing and Notification System

Environment: UI Automation, Email Automation, UiPath Data Entity /Services.

Developed an automated loan processing system using a bot to extract request IDs from email attachments, verify them in an internal portal, and generate loan reference numbers. Configured automated email notifications for applicants or routed to the business team if the email field was blank. Used UiPath Data Entity to track daily processed IDs, preventing duplicates with an insert query and triggering exception alerts for repeated requests.

Project 2: Automated Invoice Processing Using UiPath

Environment: Uipath DU, OCR (Optical Character Recognition), UiPath Studio

Developed an automated invoice processing solution using UiPath for a manufacturing company, leveraging UiPath Document Understanding to extract and validate key data from invoices. Input the extracted data in company internal portal for automatic updates, reducing invoice processing time by 70% and improving data accuracy by 95%. Conducted testing and provided end-user training, ultimately enhancing operational efficiency and allowing the finance team to focus on higher-value tasks.

Skills & abilities

Technical Skills - HTML, CSS, RPA, Robotic Process Automation, Uipath, Uipath DU, Python, SQL, Database, Stored Procedure, VM, Orchestrator Studio, Queue and Hyperscience

Tools – UiPath, Hyperscience, Excel, Word

Training / Certifications

Uipath Developer Foundation

Data Science for Engineer NPTEL Certification

Education

B.Tech (Computer Science and Engineering) - **9.6 CGPA**

2019-2023

Chitkara University
