Summary

Detail-oriented and highly motivated Computer Science graduate seeking a challenging position as a Software Developer. Eager to apply technical skills and knowledge gained through academic coursework and hands-on projects to contribute effectively to innovative software development projects.

Skill Highlights

- Salesforce Administration
- JAVA
- Salesforce Development
- SQL

Project Experience

A Road Accident Prediction Model Using Data Mining Techniques - 01/2024 to 04/2024
KSRM, Kadapa, A.P.

Developed a predictive model using data mining techniques to forecast the likelihood of road accidents based on historical data. Implemented algorithms such as decision trees, random forests, and logistic regression to analyze various factors contributing to accidents, including weather conditions, road infrastructure, and traffic volume.

Internship Experience

Participated in Salesforce Virtual Internship Program

- Earned 103 badges, 89K+ points and 18 trails.
- Got hands-on experience on Salesforce platform.
- Gained knowledge in many areas of Salesforce administration and development.
