PROFESSIONAL SUMMARY

- Basic understanding of insurance processes, including claims handling, policy management, and underwriting principles.
- Familiar with fundamental accounting concepts such as financial statements, bookkeeping, and reconciliation.
- Skilled in SQL and RPA (Robotic Process Automation) support, with 1.5 years of experience in database management and troubleshooting.
- Proficient in optimizing and tuning SQL queries, ensuring smooth database functionality and performance.
- Proven ability to deliver reliable support, maintaining high uptime and client satisfaction.
- Strong experience in creating SQL Server and cloud-based database objects such as data models, views, stored procedures, and functions.
- Excellent communication and collaboration skills, with a track record of working effectively with cross-functional teams.
- Committed to staying updated with advancements in SQL and technology trends to enhance service delivery.

PROFESSIONAL EXPERIENCE

- **Past:** Programmer Analyst in **Exela Technologies Private Limited, Chennai** from June -2018 to November-2019. **Duration:** 1 Years 5 Months
URL: <https://www.exelatech.com/>

ACADEMIC QUALIFICATIONS

- **Master of Computer Applications (MCA) with 80.00% (2016)**
Info Institute of Engineering affiliated to Anna University, Chennai.
- **B.Sc. Computer Science with 67.26% (2013)**
Bharathiar University of Arts and Science affiliated to Bharathiar University, Coimbatore.
- **Higher Secondary with 59.00% (2010)**
Government Higher Secondary School, The Nilgiris.
- **Secondary School Leaving Certificate with 79.00% (2008)**
Government High School, The Nilgiris.

CERTIFICATION COMPLETED: 1

- **Certification Name** : Advanced RPA Developer
- **RPA Tool** : UiPath
- **Organization Name** : UiPath Academy

CERTIFICATION COMPLETED: 2

- **Certification Name** : Data Analyst
- **Tool** : Power BI, Tableau, DAX, SQL, Excel
- **Organization Name** : Besant Technologies

TECHNICAL SKILLS

- **Programming Languages** : Python
- **RPA Tools** : UiPath
- **Databases** : SQL Server 2012
- **Miscellaneous** : Visual Studio, Power Pivot, UiPath Studio, HTML
- **Data Visualization** : Power BI, Tableau, DAX
- **Data Analysis & Management** : Excel, Microsoft SQL Server

RPA PROFILE - 1

PROJECT DESCRIPTION:

As Web scraping involves automatically extracting data from websites. This technique proves valuable for gathering information, conducting market research, and monitoring competitors. To automate the data extraction process, one can utilize RPA to build web scraping bots. Here's a step-by-step guide to constructing a web scraping bot using RPA tools.

MAJOR ACCOMPLISHMENTS

- Launch the RPA tool and create a new project or workflow for the web scraping task.
- Use the built-in web recording feature or drag-and-drop actions to define the scraping steps.
- Start by opening the target website using the tool's browser automation capabilities.
- Set up actions to extract the desired data, such as extracting text, retrieving attribute values, or capturing
- Define the format in which you want to store the extracted data, such as CSV, Excel, or a database.
- Run the web scraping workflow and validate the extracted data.
- Set up scheduling or triggering mechanisms to run the web scraping bot automatically at defined intervals or events.
- Configure the bot to generate reports or notifications based on the extracted data.

ACADEMIC ACHIEVEMENTS & ACTIVITIES:

- ✓ Secured '**EXEMPLARY**' Grade Certificate in National Service Scheme (NSS).

PERSONNEL PROFILE:

Date of Birth : 06-May-1992
Address for Communication : Thekkekara House, Karakandi, Kuppadi, Sulthan Bathery,
Wayanad District, Kerala – 673592, India
Contact Number : +91-9486712252
Languages Known : English, Malayalam and Tamil

I hereby declare that the aforementioned information is correct to my knowledge and belief.
