Detail – Oriented SAP S Consultant with 2 years of Specialized experience in Sales and Distribution Order to Cash processing, complemented by 1 year of experience in broader IT roles. Proficient in configuring and customizing SAP SD modules, including sales order management, order to cash processing, pricing and billing, Skilled in collaborating with cross-functional teams to identify and implement solutions that enhance business processes and drive efficiency. Strong analytical and problem-solving abilities, with a contribution to delivering exceptional user support and training. I am eager to leverage my expertise to contribute to organizational success and drive continuous improvement.

PROFESSIONAL SUMMARY:

- Developed PowerShell script which automated the process of database user audit on a daily basis for the team. (It connects to DBs, checks daily user count; compares with previous data; exports to csv on server and sends mail).
 - **Marc** is the WMS functionality, which has functionality like Receiving, Packing, RF scanning, Lot number creation, Inventory adjusting and printing functionality.
 - **Spectrum** is a transport management system application. So once the order is created will assign a load and we will send to the end user customer address using a spectrum application.
 - Basic knowledge in Software Development Life Cycle and BUG life cycle.
 - Experience in preparing **Daily status reports**.
 - Experiencing in preparing monthly audit work.
 - Responsible for representing SAP Order to Cash team.
 - Skilled in Creating various sales documents, including sales orders, inquiries, quotations, creating sales order and deliveries from SAP side.
 - Working on related issues on pricing error, billing document error and Deficit of stock issue etc ...
 - Ability to work under deadlines, worked as an active team member and willingness to accept responsibilities.
 - Implementing scheduling and Transportation problems in AIMMS Tool.
 - Having knowledge in supply chain management and **S&OP** processes for the implementation of demand, supply and capacity planning.
-

TECHNICAL SKILLS:

- ☐ Scripted Language: SQL
- ☐ Operating System: Linux, Windows
- ☐ SAP SD ECC, Service now, Marc Application, SQL, Golden step Application, Vo collect (VMT), Soti.
- ☐ Having Knowledge of Controlling Sales Documents- sales document types, item categories and

- scheduling lines.
- ☐ Good knowledge of Pricing and condition issues.
- ☐ billing document and invoice process.
- ☐ Master data management.
- ☐ order fulfillment optimization.
- ☐ Sales order management and order processing.
- ☐ TMS (Transport Management System)
- ☐ WMS (Warehouse Management System)
- ☐ ALX (Any logistics tool)
- ☐ Excel
- ☐ Basics on Macro VBA
- ☐ Power pivot

CERTIFICATION:

- SAP SD (Sales and Distribution).

EMPLOYMENT HISTORY:

- I am currently Working at ITC Infotech as Associate IT Consultant from January 27, 2022.

Project 1:

Project Name : Asahi Beverages.
 Client : Asahi Beverages (**Australian**)
 Role : Distribution Analyst

Description:

As a Distribution Analyst I am responsible for planning and forecasting, reporting and analysis, plan execution and support for effective business. Marc is the WMS functionality, which has functionality like Receiving, Packing, RF scanning, Lot number creation, Inventory adjusting and printing functionality. Spectrum is a transport management system application. So once the order is created will assign a load and we will send it to the end user customer address using spectrum application.

Roles and Responsibilities:

- Analyzing the client requirements
- Analyzing client requirements and implemented solutions.
- We will play a key role in the project team. We are getting tasks from the user through an incident in the WMS (Warehouse Management System) and TMS (Transport Management System) while user is processing these orders day to day, if they are stuck, they would raise the incident to us and will receive the incident including high priority and will solve the issues.
- We do have exposure to the SQL through DB it has oracle 11G version and will consolidate the list of orders, serial numbers, stuck count depending on the user requirements we will give the sheet to the user.
- We also provide 24/7 support.

- We have exposure to SAP SD, and we do create orders and deliveries and once they reach to spectrum will assign loads and dispatch them.
- If any user is unable to get any printout the user will raise the case to us, and we will give test print and inform the user to check.
- Worked on SIT and upgraded ECC project and we installed the environments.

Project 2:

Project Name : Avery Dennison Project
 Client : Avery Dennison (**Australian**)
 Role : Data Analysis and Data Validation.

Description:

Avery Dennison's global production footprint has increased from 3 to 7 manufacturing plants due to acquisition. This resulted in an increased product portfolio, customer portfolio & different technologies for RFID inlays. Demand is projected to grow at a double – digit rate, the supply chain network needs to be re-modeled and optimized to reduce overall costs. Avery Dennison to conduct a network design optimization initiative and run multiple business scenarios to identify the best operating model which will help them achieve supply chain efficiency.

Roles and Responsibilities:

- Data analysis and data cleaning.
- Understanding the plan for the right place and location of DCs to maintain service level for all customers.
- Understanding how to apply the pivot tables and V lookup formulas.
- Basic knowledge on ALX Tool. (ANY LOGISTICS TOOL).

Project 3:

Project Name : Alco Beverage Manufacturer Project
 Client : Alco Beverages Manufacturer
 Role : Supporter

Description:

One of the tracks in this project is for scheduling of the brewery to generate the brew plan, also called Tank Scheduling. The brewing process has a long lead time of 15 to 21 days and hence the brew plan is done on an unconstrained demand adjusted or constrained by only legal constraints. The legal constraints deal with which SKU can be sold in which markets. Currently each brewery has a planner who does the Tank Scheduling manually. The requirement is to create a tool which will do the tank scheduling and create a plan that is feasible and optimal in a reasonable amount of time.

Roles and Responsibilities:

- Implementation scheduling and transportation problems in AIMMS Tool.
- By using AIMMS Tool, **implementing tank scheduling** which means keeping track of (alco beverage) liquor manufacture for scheduling the liquor to produce brew.

- I had practice on implementation of scheduling and transportation using AIMMS tool.

EDUCATIONAL BACKGROUND:

- ☐ Completed B. Tech from Kiet group of institutes (Kakinada) under JNTUK. (2021)
- ☐ Completed Intermediate from NRI Junior college. (2017)
- ☐ Completed Schooling from Z.P. High School under the State Board of Andhra Pradesh. (2015)
