SUMMARY

As a passionate and detail-oriented iOS Developer with two years of experience, I specialize in crafting high-performance, user-centric iOS applications. My expertise in Swift, coupled with a strong understanding of the complete mobile development lifecycle, enables me to deliver top-quality apps. I am well-versed in agile methodologies, ensuring efficient collaboration and streamlined development processes. With strong problem-solving skills and a commitment to continuous learning, I am dedicated to driving innovation in mobile technology. I have a proven track record of creating intuitive feature-rich applications that not only meet but exceed user expectations.

WORK EXPERIENCE

SmartGig Technologies Private Limited

Jan 2023 - Jun 2024

PROJECTS

-

Roventure Software Services Company

Jan 2022- Jun 2022

- As an iOS developer at Roventure Software Services Company, your role encompasses a wide range of responsibilities aimed at creating and maintaining high-quality mobile applications. You will be responsible for designing and building applications from scratch, ensuring they are both high-performing and responsive. This includes translating designs and wireframes into high-quality code.
 - Collaboration is key, as you will work closely with other developers, designers, and product managers to deliver new features. Participating in brainstorming sessions and contributing innovative ideas is an essential part of this process
-

Roles and Responsibilities

- Created custom UI components to improve user experience on mobile devices.
 - Implemented user interface designs for iOS apps according to Apple's Human Interface Guidelines.
 - Optimized existing codebase for improved performance on mobile devices.
 - Collaborated with other developers and designers to ensure successful deployment of iOS apps.
 - Collaborated with other developers to design efficient solutions for complex tasks.
 - Integrated third-party libraries into the app development process.
 - Utilized version control systems like Git for source code management.
 - Worked closely with QA teams to ensure that new features are tested thoroughly before release.
 - Performed debugging of existing codebase and fixed errors as needed.
-
