WORK EXPERIENCE

Associate Enterprise Software Engineer Wolters Kluwer

08/2022 - Present,

Achievements/Tasks

- Monitoring and troubleshooting database performance using OEM, AWR, SQL developer.
- Provided expertise and mentoring in core database administration activities such as Upgrades from 12C to 19C, Patching, Backup and Recovery, Performance Tuning and Disk Partitioning, capacity planning, script development, and documentation.
- Knowledge of running SQL's in SQLPlus, Oracle SQL-Developer, TOAD and similar tools.
- Managed approximately 100 databases with 4 DBAs through efficient processes. Worked with database engineering teams to develop database standards for server builds and monitoring, provided direction to the junior team members.
- Setting up and maintaining Oracle Data Guard with HA service for disaster recovery
- Expertise in Linux, RMAN, Postgres, SQL databases.
- Experience of working on Unix/Linux environment, should be comfortable with working at command line on Unix/Linux.
- Understanding basic Linux administrative tasks, such as checking filesystem utilization, run top, ps commands, etc.
- Managing and administrating multiple production databases as well as development and test databases.
- Installed and upgraded oracle financial applications and tested out new features. Applied patches to the financial system databases and application servers to make them compliance.
- Used exp/imp, data pump and dblinks to move the data, export and Import of User, Tables and Database using exp/imp and Data Pump.
- Table space management including, adding/resize data files, allocated quotas to user and managed disk space.
- Architected and moved databases to AWS, Azure Cloud which helped the company cost-efficient and resizable capacity while automating admin tasks such as hardware provisioning, database setup, high availability, scalability, patching, and backups for version 12C and 19C

PERSONAL PROJECTS

Cloud Based Water Monitoring and Alert System

- The system has sensors that measure the quantity of the water in real time, that can be processed by the Arduino controller. A cloud platform was configured for data saving and analysis.
- The graph will be generated based on the analysis of usage of water. And then it will send an alert to the user about the usage.

Automatic Text summarization web application using NLP and Python Flask framework

- Created a GUI which summarizes large documents with percentage accuracy.
- Automatic text summarization extracts summary sentences from the input document and analyzes semantic relationships of the document elements.
- It helps the users to reduce time for reading

GIS Developer

- Worked on creation of Web Map using QGIS API for
- Javascript Proficiency in Open Layers, Django, Geoserver Postgres. Spatial data development and
- analysis of medical data for research work.

WORK EXPERIENCE

Trainee Mendix Developer

Aditya Birla Group.

12/2021 - 07/2022,

Achievements/Tasks

- Gathering user requirement and defining complexity of vehicle management system for Aditya Birla Employee.
- Creating user journey and Domain Model for vehicle management using Mendix. Dashboard for Booking, Driver, Login, Approval Request, creating microflows and setting of XPath Query
- Setting up security for all entities, domain model, microflows, nanoflows and pages, Publication of web app on mendix cloud, Integration with ADFS Single Sign-on, Realtime Maps API key integration with mendix. Mendix Licensing Model with respect to user.

Software Engineer

A.G. Engineering and Contractor

11/2020 - 11/2021,

Achievements/Tasks

- Collaborated with internal teams to establish business needs and software related services
- Reported directly to the director and the head of marketing team by processing confidential data and information for Inventory maintenance and interpreting current market cycle, thus, helping company to invest money in more efficient way.

Intern

Reliance Industries Limited.

06/2018 - 07/2018,

Achievements/Tasks

- Overview of IT System and Database Management System, OS installation and RAID Configuration in Servers, Virtual machine using Hyper-V, Approving and Declining patches

EDUCATION

Master of Technology (Somaiya Vidyavihar University)

Computer Engineering

1/2021 - 2023,

8.5 C.G.P. /

Bachelor of Engineering (University of Mumbai)

Computer Engineering

05/2015 - 06/2020,

6.67 C.G.P./

CERTIFICATES

Successfully completed NESAC ISRO Technology Development Project on Swarm of Drones.

Participated in the event ROBOTICS & INTERNET OF THINGS organized by Technophilia Solutions at Veermata Jijabai Technological Institute, Mumbai.

Participated in the event ETHICAL HACKING organized by Technophilia Solutions at Veermata Jijabai Technological Institute, Mumbai.

Participated in the event CodeManiax organized by INNOVISION at DY PATIL RAMRAO ADIK INSTITUTE OF TECHNOLOGY.

Participated in the Programming Contest FEYNWICK organized by Computer Society of India, KJSIEIT

Successfully completed DICE Bootcamp

Successfully completed a 5-credit course programming in JAVA.

Successfully completed developing web applications using servlets and JSP- Level 1.

Successfully completed Excel Skills for Data Analytics and Visualization course from Coursera in 2021.

Successfully complete Microsoft AZ900
