Professional Experience

Associate Data Scientist(Great Learning)

- Developed an ML-based feedback analysis system to classify learner feedback into categories ('Content issue', 'Mentor issue', etc.) and performed sentiment analysis to measure satisfaction levels. Automated insights generation, including satisfaction and dissatisfaction percentages and content issue trends, enabling data-driven improvements to the course.
- Did analysis to classify AWS Skill Builder courses into NLP or CV categories using text classification techniques to use them in our material.
- Contributed in the bau in which I was answering the queries raised by learners related to python and SQL course. Did Session Investigation for the session which was rated poor by learners.

Intern(Exposys)

- Developed a responsive, multi-page website leveraging HTML, CSS, and JavaScript during a one-month internship at Exposys.
- Designed and implemented a user-friendly interface, ensuring optimal responsiveness and seamless navigation across multiple pages.
- Acquired practical experience in web development, sharpening skills in front-end technologies while contributing to the successful completion of a real-world project at Exposys.

Intern(Padantra)

- Engineered profit-driven stock business models through strategic analysis.
- Applied Python, NumPy, and Pandas for precise financial calculations.
- Leveraged data-driven insights to optimize market strategies and enhance profitability.

Education

B. Tech. in Computer Science Engineering,

2018 – 2022

University Institute of Engineering and Technology(U.I.E.T.) Kurukshetra, India

Skills

C/CPP | Java | Python(Including Numpy,Pandas,Flask) | SQL | HTML/CSS(Including Bootstrap) |
JavaScript | ReactJS | NodeJS | MongoDB | Canva | Excel

Courses

Learn Python Programming-Beginner to Master (Instructor-Abdul Bari), Udemy

The Complete Web Development Bootcamp (Instructor- Bogdan Stashchuk), Udemy

Projects

Images Gallery

- Images Gallery is a Full Stack Web App with frontend and backend functionalities both working properly.
- Frontend was developed using JavaScript, ReactJS and Bootstrap. Backend developed using Python, Flask.
- Other tools and features used are API, Git, VSCode, Docker, Postman, NodeJS.
- On initial load of website there is a search bar and a dialog box describing about app. On writing text in search bar image related to the text will appear along with popup describing action performed by user.

Bank Holidays Calendar App

- This is a Canara Bank Holidays Calendar app showing holidays of each state and UT for year 2023 with side navbar for selecting the state or UT for which holiday is to be seen.
- App was made using Flutter Software.

Food Ordering App

- Developed a food ordering login app which shows list of random restaurants from which a person can select dishes, add to cart and order food. One can also see the order history
- App was made in Kotlin language using Android Studio.

Game Development - Connect4

- Developed Connect4 Game for Windows using JavaFX.
- Connect-Four is a tic-tac-toe-like two-player game in which players alternately place pieces on a vertical board 7 columns across and 6 rows high. Each player uses pieces of a particular color, and the objective is to be the first to obtain four pieces in a horizontal, vertical, or diagonal line.
