EDUCATION

- **Indian Institute of Information Technology** Lucknow, UP
Master of Technology in Computer Science (Specialization in Artificial Intelligence) with CGPA: 8.7 Aug, 2022 – May, 2024
- **Galgotia College of Engineering and Technology** Greater Nodia, UP
Bachelor of Technology in Information Technology with CGPA: 7.82 Aug, 2016 – Sep, 2020

WORK EXPERIENCE

- **Optum Global Solution (United Health Group)** Gurgaon
Associate Software Engineer Aug, 2020 – Sep, 2021
 - **Job Description:** Served as a Full Stack DevOps Engineer.
 - **Tasks:**
 - * **Accessibility Fixes:** Addressed Accessibility Fixes according to Web Content Accessibility Guidelines Standards.
 - * **Project Migration:** Led Project Migration, including adding new endpoints and transitioning the project to a new access point.
- **AIMO Marketing Service LLP (DataPOEM)** Bengaluru
Junior AI Scientist June, 2024 – Oct, 2024
 - **Job Description:** Conduct data pre-processing, perform exploratory data analysis (EDA) for time series data, and develop models to enhance insights for marketing investments.
 - **Tasks:**
 - * **Machine and Deep Learning Modeling:** Perform time series modeling to analyze data, test stationery, and conduct model training, validation, and testing.
 - * **Analytical Insight:** Derive insights on marketing investments made in various icecream brands to generate higher ROI.

PUBLICATION

- **Soft Computing: Theory and Applications** Springer
Paper Id: 146, Conference Paper: SoCTA2020 Dec 25 – Dec 27, 2020
 - **Title:** An Alternative Approach to Compress Text Files Using Fibonacci Sequence and Lucas Series⁶
 - **Description:** The chapter is published in springer publication with an extension of an algorithm from the base paper and had concluded that there are certain (i.e., test cases) where the algorithm generated works effectively.
 - **Result:** Compression Ratio was enhanced to a certain extent.
- **IEEE Transactions on Computational Social Systems** IEEE
Paper Id: TCSS-2024-02-0176 Feb 27, 2024 – April 28, 2024
 - **Title:** Decentralized Gossip-assisted Deep Learning Model Training for Resource-Constraint Edge Devices.⁷
 - **Description:** The paper proposes a novel gossip learning approach to boost performance of slow edge devices in the network with minimal communication overhead along with creation of lightweight model.
 - **Result:** The proposed technique outperforms other Distributed Machine Learning Techniques.

PROJECTS

- **Prediction and Analysis of Heart Attack**⁸: The project is a combination of full-stack data science project that includes both the front-end and back-end using python.
 - **Contribution:** Implemented a model for depicting whether a person suffers from a heart attack or not.
- **Sentiment Analysis on Stocks**⁹: A group project consisting of 3 members that aimed to predict the sentiment of the stock .
 - **Contribution:** Performed web scrapping, various machine learning algorithms, and transferred the updated data further for deep learning to enhance accuracy.

TECHNICAL SKILLS

- **Programming Languages:** C/C++, Java, SQL, and Python (including ML and DL Libraries).
- **Area of Interests:** DBMS, ML, DL, NLP, Data Structure and Algorithm, Mathematics.

TEACHING/EXTRACURRICULAR/ACHIEVEMENTS

- Involved in a funded research project by **SERB** under the supervision of **Dr. Mainak Adhikari**⁹.
- Secured AIR-4212,6918 in GATE CSE 2022 and Data-Science 2024.
- Q2 2021 CTF Participation at Optum Global Solution.
