EXPERIENCE

Assistant Manager – Security Analyst | State Bank of India

(July 2021 - Current)

- Working as **2nd line of defence** by formulating and reviewing **SOPs and policy** to streamline information security activities with business.
- **Cyber Security Project Manager** for **on boarding and deploying multiple types of on premise** applications to the cloud. My responsibilities include reviewing the current applications, comprehending the needs of the application for migration, performing a **GAP analysis between on premise and cloud pre-requisites**, and monitoring compliance with all other security-related requirements.
- **Manage** regulatory compliance effectively to achieve result upto 95% compliance state working with regulators namely Reserve Bank of India, Ministry of Electronics and Information Technology, Computer Emergency Response Team, National Critical Information Infrastructure Protection Centre (NCIIPC), etc.
- Experience in **handling a team of 10+ resources** across multiple IS projects.
- Managed regulatory audits successfully in order to maintain compliance.
- Evidently managed the implementation of regulatory advisories, alerts and IT controls.
- Worked on implementing data security controls like Information Rights Management, improvement in DLP mechanisms and conducted Data Flow Analysis (DFA) at enterprise level to identify the critical data and check if appropriate security measures are followed.
- Contributing towards **IS Awareness of the Customers, Employees, and Pensioners** by conducting various **Social Media campaigns, and IS Awareness Sessions** physically as well as virtually.

IT Security Analyst | Fidelity Information Services (FIS)

(January 2021 – July 2021)

- **Team Lead** for Vulnerability Management Team. Key responsibilities include performing **vulnerability management** manually as well as through automatic scanners (**Nexpose and Qualys**), Decommissioning unused **networking assets**, performing Authenticated Scans, validating False Positives.
- Team member for **execution of several engagements with FIS USA** as a part of FIS teams to conduct **IT general control testing for applications, networking assets, operating systems, and databases**.
- Team member for performing **risk assessments and risk treatment** for various networking assets in FIS.

Application Security Engineer | Nykaa

(July 2020 – January 2021)

- **Vulnerability Assessment and Penetration Testing** - Internal and 3rd Party. Key responsibilities include **identifying, Reporting, and Mitigating security vulnerabilities** associated with internal and external web applications and Infrastructure. Fixed multiple vulnerabilities by working with different Application Owners/ SPOCs.
- **Responsible Disclosure** - Responsibility includes reporting and **Triaging/Validating**, Response, Internal Jira ticket creation with proper Proof of Concepts (POCs), and closure of bug bounty security issues raised on **Nykaa Responsible Disclosure program**.
