SUMMARY

- Data Engineer with **1.8 years** of experience in designing, implementing, and optimizing data pipelines and infrastructure.
- Proficient in SQL, Python, Spark, Airflow, and data warehousing, with hands-on expertise in both **Azure and AWS** environments.
- Skilled in ETL, cloud technologies, and data governance to ensure data integrity and streamline processes, enabling data-driven decision-making through dimensional modeling and **warehousing** solutions.

EDUCATION

Bachelor of Technology - Information Technology
National Institute of Technology, Jalandhar

Jul 2019 - May 2023
7.46 / 10

WORK EXPERIENCE

Data Engineer
Amantya Technologies – Gurugram, India

Aug 2023 – Present

Software Engineer Intern
Amantya Technologies – Gurugram, India

Feb 2023 – Aug 2023

PROJECTS

Data Pipeline On-Premise Infrastructure

- Led development and management of ETL pipeline extracting over **10 TB of data** from **Oracle & File Based** sources, transforming it with **Spark**, and loading with **Delta Lake** on **HDFS**.
- Orchestrated workflows using **Airflow**, reducing manual intervention by **50%** and saving over **10 hours per week**.
- Applied **dimensional modeling** (star and snowflake schemas) to structure **data marts**, improving data accessibility for business intelligence.
- Designed interactive dashboards with **Apache Superset**, enhancing data-driven decision-making by 20%.

Azure Data Integration and Storage Pipeline

- Designed and implemented Azure data pipelines, leveraging **Azure Data Factory (ADF)** for orchestration and ingestion into **Data Lake Storage (Gen2)**.
- Optimized data processing in **Databricks** using the Medallion Architecture, managing over **10 TB of data** and reducing model training time from **7 to 6 hours**.
- Achieved **99.5% uptime** in pipeline reliability, enhancing overall data flow efficiency.
- Integrated Unity Catalog for centralized metadata management, ensuring robust **data governance**, lineage tracking, and compliance with advanced **data quality** checks.

Productivity Tool Development and Deployment

- Developed backend with **Python/Django** on **Kubernetes/Docker** with 5 microservices, deploying via **Jenkins**.
- Integrated **Elasticsearch** for log management, and utilized **AWS (S3, Lambda, Step Functions)** for scalability, reducing response time by 25%.

SKILLS

Languages: Python, SQL, C++

Big Data Technologies: ETL, Spark, PySpark, Airflow, Delta Lake, Data Warehousing, Dimension Modeling

Cloud Platforms: Azure (Azure Data Factory, Azure Databricks), AWS (Lambda, S3, EC2, Glue)

Deployment & DevOps: Git, Bitbucket, Jenkins, Docker, Kubernetes
