### EDUCATION

 **BE(Computer)**  
Pune University.

### SUMMARY

I am a passionate QA engineer with seven years of experience in the IT industry, specializing in both manual and automation testing. My dedication to ensuring software excellence is evident in my meticulous approach to crafting test plans and executing thorough testing strategies. With a keen eye for detail, I excel at identifying and resolving issues, ensuring that users have seamless experiences.

### EXPERIENCE

#### Senior Quality Analyst

##### To The New

📅 02/2022 - Present

- Document test activities including test plans, test cases, test scripts, and results
- Maintain detailed records of testing phases and defects
- Conduct functional, regression, integration, system, and acceptance testing
- Identify, document, and track bugs
- Collaborate with developers and project managers to resolve issues
- Use bug tracking tools to manage defects and enhancements
- Design and develop test automation frameworks and scripts
- Execute automated test suites and analyze results
- Generate detailed reports on test execution and defect status
- Plan and prioritize test automation activities

#### QA Automation Engineer

##### Transperfect Solutions

📅 11/2020 - 01/2022

- Conduct comprehensive testing including progressive and regressive scenarios
- Debug code and identify root causes
- Test functionality and compatibility of new programs or updates
- Monitor bug resolutions and provide QA insights to developers
- Develop and maintain automated test scripts
- Operate under Agile and Scrum frameworks for bi-weekly releases

#### Quality Analyst

##### Silicon Stack

📅 06/2019 - 10/2020

- Provide exploratory testing for applications
- Write and execute test cases
- Report and track defects using Jira
- Provide consistent and clear status updates
- Coordinate with various teams to solve problems and improve efficiency
- Test mobile applications under different networks and devices

#### Software Tester

##### Chandukaka Saraf & Sons Pvt. Ltd (CSPL)

📅 12/2017 - 05/2019

- Review Business Requirements and understand application architecture
- Perform business functionality, functional, and regression testing
- Write and optimize test cases
- Identify, report, and track defects using Jira
- Support developers in resolving problems by completing additional tests
