Education

Indian Institute of Information Technology, Kota

2020 - 2024

Bachelor of Technology in Computer Science and Engineering (GPA: 6.8/10)

Jaipur, Rajasthan

Macro Vision Academy, Burhanpur

2019 - 2020

Intermediate, Central Board of Secondary Education (percentage: 88.4/100)

Burhanpur, Madhya Pradesh

Macro Vision Academy, Burhanpur

2017 - 2018

High School, Central Board of Secondary Education (percentage: 84.0/100)

Burhanpur, Madhya Pradesh

Experience

Ignitus Networks

July 2024 - Present

Blockchain Developer Intern

- Developed and deployed decentralized applications, including video and real estate NFT marketplaces on Ethereum and Solana, enhancing the blockchain ecosystem with smart contract functionalities.
- Currently leading the development of an advanced Discriminator and Indexer Directory for Solana, focused on improving blockchain program interaction and data indexing.
- Explored and studied a wide range of blockchain technologies, including Aptos, Kiichain, Polygon, TON, and Solana, gaining deep insights into their protocols and development ecosystems.

Projects

Video NFT Marketplace on Solana

- Technologies used: Rust, Anchor Framework, Solana Devnet, IPFS via Pinata, React, etc.
- Built a decentralized platform allowing users to mint videos as NFTs and assign fixed prices for viewing.
- Implemented a system where users can unlock and watch videos by paying a fee set by the owner of the video, along with gas fees, ensuring secure and efficient transactions directly to the owner.

Decentralized Portfolio

- Technologies used: Solidity, React, CSS, Hardhat, Arbitrum Sepolia testnet, and IPFS via Pinata, etc.
- Built a decentralized personal portfolio with IPFS for secure and decentralized storage of portfolio content.
- Showcased professional achievements on a blockchain-based platform, ensuring authenticity and tamper-proof records.

Token Stacking DApp

- Technologies used: Solidity, React, CSS, Hardhat, Arbitrum Sepolia testnet, and IPFS via Pinata.
- Developed a token staking dApp on the Arbitrum Sepolia testnet, where user can securely stake tokens and claim rewards directly to their wallets.

Technical Skills

- Languages : Solidity, Rust, Java, Typescript, Move
- Technologies : Anchor Framework, React JS, Node JS, Actix Web, ArangoDB, web3.js, Truffle, Cryptocurrencies, DeFi, NFTs
- Blockchains : Ethereum, Solana, Aptos, Kiichain, Polygon, Arbitrum, The Open Network

Certifications

- Certified Web3 Blockchain Developer, 101 Blockchains
- Certified Web 3.0 Professional, 101 Blockchains
- Solana Development Certification, 101 Blockchains

Achievements

- Solved over 400+ DSA problems with Java over different platforms.
- International Mathematics Olympiad Winner
- Regional Mathematics Olympiad Winner

Social Engagements

- Professional Member : 101 Blockchains Community
- Club Member : EBSB Club, IIIT Kota
- Participant : ADMAT 2021, IIIT Kota
- Sports-Engagements : Basketball , Swimming, Yoga, Chess
