SENIOR SOFTWARE ENGINEER
(RPA Consultant)

Highly motivated Senior RPA Consultant with 5+ years of programming experience. Passionate about object-oriented programming and RPA development, actively designing and building intelligent automation solutions for dynamic and complex processes across multiple applications. Aiming to contribute effectively in a leadership role while further honing people management skills.

SUMMARY

- **5+ Years of RPA Expertise:** A seasoned professional with over 4.10 years of experience in Robotic Process Automation (RPA), specializing in UiPath.
- **Current Role:** Currently serving as a Senior RPA Developer, working as RPA COE with Marketing and Tech team, work closely with Presales Team for client demo preparations.
- **Full RPA Lifecycle:** Proficient in all phases of RPA, including Analysis, Development, Integration, Testing, Deployment, and Maintenance.
- **Agile Environment:** Thrives in a fast-paced Agile Development Environment, practicing Test-Driven Development (TDD) and working within Scrum teams.
- **Documentation Skills:** Skilled in creating Process Definition Documents (PDD) and translating them into detailed Solution Design Documents (SDD).
- **Process Automation:** Successfully built Robotic Automation Processes and Business Objects for diverse business systems.
- **Technology Proficiency:** Demonstrates excellent skills in UiPath Orchestrator and Power Automate.
- **Debugging and Communication:** Possesses strong Debugging Skills and effective Communication Abilities.
- **Adaptability:** Capable of handling multiple tasks simultaneously and adjusting priorities without missing deadlines.
- **Analytical Acumen:** Known for logical reasoning and analytical thinking.
- **Team Player:** An exceptional team collaborator who has organized numerous team-building activities.

CERTIFICATIONS AND TRAININGS

1. UiPath Certified Professional Advanced RPA Developer (UiARD).
2. RPA Developer Foundation Certified.
3. UiPath Academy – Automation Solution Architect.

EDUCATION

- Completed B-tech (Computer) from JNTU(Hyderabad) University and secured first class with distinction score.

EXPERIENCE SUMMARY

- 1) Working as a RPA Developer Coforge(Permenent) In Hyderabad.
- 2) Worked as a RPA Developer Mpahasis(Permanent) In Hyderabad.
- 3) Worked as a RPA Developer Vitech Asia Systems pvt ltd(Permanent) In Hyderabad.

PLATFORM & TOOLS EXPERTISE

UiPath Studio, UiPath Orchestrator, Robots, Assistant, Document Understanding, Process Mining, Automation Hub, Action Centers, Test Suite, .net, Vb script.

PROJECT PROFILE:

Project 1: BDA INVOICE.

Client: IAG

Designation: RPA Developer

Role: UiPath Developer

Roles & Responsibilities:

- Responsible for design, development and end to end implementation of RPA solution using Uipath for US Tax Invoice Processing.
- Developing automation code involving applications like Oracle R12, Microsoft Excel applications.
- Two Bots were developed to handle Excel and Oracle applications differently. The Bots were designed using latest RE framework from UiPath for smooth functioning of the automation solution and to handle all business and technical exceptions. The orchestrator queues were also used as a part of solution design to deploy, schedule, monitor and manage the Bot.

Project 2: ACE- Processing

Client: IAG

Designation: RPA Developer

Role: UiPath Developer

Roles & Responsibilities:

- Responsible for design, development and end to end implementation of RPA solution using UiPath for Japan Pre- Approved Invoice Processing
- Developing automation code involving applications like Oracle R12, Microsoft Outlook and Microsoft Excel applications.
- The Bots were designed using latest RE framework from UiPath for smooth functioning of the automation solution and to handle all business and technical exceptions. The orchestrator queues were also used as a part of solution design to deploy, schedule, monitor and manage the Bot.
- The Bots were responsible to send a final communication to the Business users upon each processing completion along with required details.

Project 3: Japan POI Invoice Processing

Client: IAG

Designation: RPA Developer

Role: UiPath Developer

Roles & Responsibilities:

- Responsible for design, development and end to end implementation of RPA solution using UiPath for Japan Pre- Approved Invoice Processing
- Developing automation code involving applications like Oracle R12, Microsoft Outlook and Microsoft Excel applications.
- Creating FDD (Functional Design Document) and TDD (Technical Design Document) for the process.
- The Bots were designed using latest RE framework from UiPath for smooth functioning of the automation solution and to handle all business and technical exceptions. The orchestrator queues were also used as a part of solution design to deploy, schedule, monitor and manage the Bot.
- The Bots were responsible to send a final communication to the Business users upon each processing completion along with required details.

Project 4: ARI fleet Management for CNG Vehicle

Client: Apache Corporation

Designation: RPA Developer Role:

UiPath Developer

Roles & Responsibilities:

- Involved in all phases of Software Development Life Cycle including design, daily meetings, designing of documentation for the project.
- Work with BA's to understand stakeholder and functional requirements
- Actively participating in validating the Client requirements and identifying the various Scenarios for Automation Development.
- Created and documented test procedures and scenarios for all phases of testing
- Designed and developed Info Path for inputting data into database
- Involved in End to End development of Business Process using Robotic Process Automation.
- Handling coordination with the operation team in daily meetings

Project 5: CNG Usage and Billing

Client: Apache Corporation

Designation: RPA Developer Role:

UiPath Developer

Roles & Responsibilities:

- Involved in all phases of Software Development Life Cycle including design, daily meetings, designing of documentation for the project.
- Work with BA's to understand stakeholder and functional requirements.
- Involved in preparing the PDD and SDD documents.
- Actively participating in validating the Client requirements and identifying the various Scenarios for Automation Development.
- Involved in End to End development of Business Process using Robotic Process Automation.
- Created and documented test procedures and scenarios for all phases of testing.
- Handling coordination with the operation team in daily meetings.

Project 6: Positive reverse pay- Processing

Client: IAG

Designation: RPA Developer

Role: UiPath Developer

Roles & Responsibilities:

- Responsible for design, development and end to end implementation of RPA solution using UiPath for Japan Pre- Approved Invoice Processing
- Developing automation code involving applications like Oracle R12, Microsoft Outlook and Microsoft Excel applications.
- The Bots were designed using latest RE framework from UiPath for smooth functioning of the automation solution and to handle all business and technical exceptions.
- The Bots were responsible to send a final communication to the Business users upon each processing completion along with required details.
- Orchestrator queues were also used as a part of solution design to deploy, schedule, monitor and manage the Bot.

Project 7: Negative reverse pay- Processing

Client: IAG

Designation: RPA Developer

Role: UiPath Developer

Roles & Responsibilities:

- Responsible for design, development and end to end implementation of RPA solution using UiPath for Japan Pre- Approved Invoice Processing
 - Developing automation code involving applications like Oracle R12, Microsoft Outlook and Microsoft Excel applications.
 - The Bots were designed using latest RE framework from UiPath for smooth functioning of the automation solution and to handle all business and technical exceptions. The orchestrator queues were also used as a part of solution design to deploy, schedule, monitor and manage the Bot.
 - The Bots were responsible to send a final communication to the Business users upon each processing completion along with required details.
