PROFILE SUMMARY:

Automation Developer with around 2 years of experience in business process automation. Proficient in UiPath, with a strong ability to design, develop, and implement automation solutions that enhance operational efficiency and accuracy. Experienced in process and test automation, system installation, troubleshooting, and configuration. A proactive project manager with excellent leadership skills, capable of working both independently and as part of a team to optimize business processes.

TECHNICAL SKILLS:

RPA Tools: UiPath.
Programming Languages: Python, HTML, JavaScript, Java (Basics), C (Basics).
Software Testing: Automation Testing, Manual Testing, Performance Testing & Load Testing

PROFESSIONAL EXPERIENCE:

- RPA Developer** - Avasoft Pvt Ltd, Chennai, India (April 2023 – Nov 2024)

EDUCATION:

- Bachelor's degree in Information Technology (2019-2023) – King's Engineering College, Chennai
- HSC (2017-2019) – ABS Vidhya Mandhir (CBSE), Chennai

PROJECTS:

Retail Industry (Jan 2024 – Nov 2024)

Role: Test Automation Developer (UiPath)

- Developed multiple reusable script frameworks for test script execution, enhancing consistency and efficiency across testing processes.
- Developed several customizable frameworks designed to meet specific project requirements, including performance testing and load testing, offering flexibility and adaptability in test execution.
- Automated script execution and integrated a system to post results directly to Teams, ensuring streamlined communication and quick access to test outcomes.
- Generated interactive and customizable reports, delivering clear, actionable insights into script statuses for better decision-making.
- Managed JIRA ticket closures through manual testing, actively contributing to Business Efficiency Architect (BEA) initiatives and improving operational processes.
- Acquired expertise in writing comprehensive test cases and developing efficient test scripts to ensure thorough validation and quality assurance.

Logistic Industry (Aug 2023 – Jan 2024)**Role: Test Automation Developer (UiPath)**

- Automated manual test scripts and significantly improved the efficiency of the testing process, reducing the time required compared to manual testing.
- Leveraged AI tools to enhance the efficiency of automation testing, optimizing processes and improving accuracy while reducing manual effort.
- Enhanced execution efficiency by developing and optimizing execution times using LINQ queries and JavaScript code.
- Gained proficiency in UiPath Orchestrator through practical, hands-on experience, mastering its functionalities for effective automation management and monitoring.
- Developed test script execution reports with an interactive dashboard, presenting a detailed summary of the overall status for easy monitoring and analysis.

IT Industry (Jun 2023 – July 2023)**Role: Process Automation Developer (UiPath)**

- Designed and implemented a robust process for creating test cases and test scripts on the JIRA platform. This included creating tickets and linking the test cases to the respective tickets, ensuring seamless performance and reliability.
- Designed a robust process for posting new tickets and updating the status of existing tickets on the JIRA platform. Also ensured the reports are shared with the team through messages, enhancing transparency and communication.
- Enhanced execution efficiency by developing and optimizing execution times using LINQ queries and JavaScript code.
- Created business flow diagrams and technical flow diagrams that simplified the development process, making it easier to understand and implement.
