

JO ANN ANITHOTTAM

SOFTWARE DEVELOPER-RPA

PERSONAL INFORMATION

 +918078283566

 joannanithottam535@gmail.com

EXECUTIVE SUMMARY

- RPA Consultant having 2+ years of IT experience in Robotic Process Automation(RPA).
- Created end to end automation solution, which involves analysis, feasibility study, and technical feasibility study, designing architecture, development, testing and deployment of automation solution.
- Monitoring and maintaining automation post-implementation and resolving any potential issues to ensure smooth business operations.
- Worked mainly on HealthCare and Finance projects.

TECHNICAL SKILLS

- Automation Anywhere- A360
- Bot Development
- Excel macros
- SQL
- JIRA
- UiPath
- Queues

CERTIFICATIONS

- Advanced RPA Professional, Automation Anywhere, Issued Jan 2023
- Advanced Certification A360 2024.
- Pursuing A360Certified Master RPA Professional & UiPath Certified Professional Automation Developer Associate.

PROFESSIONAL EXPERIENCE

August 2022- Present | Guidehouse, Trivandrum, Kerala

Project-Integrify	A360	Duration-2 months
<u>Opportunity</u> The task entailed interfacing with a data portal to retrieve specific information, subsequently updating these values within an Excel spreadsheet. This process necessitated establishing database connections to accurately extract the required data. <u>Solution</u> ➤ Utilizing excel as database significantly optimized the bot's execution time, surpassing the efficiency of the traditional methodology. <u>Hours Savings</u> If performed manually, processing a single ID would require approx. 5 minutes. Handling a minimum of 100 IDs daily translates to a time savings of 500 minutes per day.		

Project-Work In Progress(WIP)	A360	Duration- 5 months
<u>Opportunity</u> The bot retrieves specific files from a portal and employs the extracted data to construct a pivot table for the analysis. <u>Solution</u> The bot employed A360 activities to expedite the downloading of multiple files and leveraged a VBA script to generate the pivot table.		

Project-CMRE	A360	Duration- 4 months
<u>Opportunity</u> The task involved downloading files from a portal and extracting data to populate an Excel template with the extracted information. <u>Solution</u> Utilized advanced excel formulas to populate the data meticulously and accurately into the spreadsheet.		

Project-Deltek	UiPath-Support	Duration- 2 months
<u>Opportunity</u> The task entailed downloading bulk PDF files from a portal, partitioning them according to user specifications, and performing redaction to eliminate extraneous content. <u>Solution</u> ➤ The bot utilized Python to facilitate the splitting of PDF files, enabling the segregation of individual user documents from the bulk file. <u>Hours Savings</u> Manually downloading and redacting a single file would require approximately 5 minutes. Processing a minimum of 150 files daily results in a time savings of 750 minutes a day.		

Education B.Tech, Computer Science & Eng. College of Engineering, Kidangoor. 2018-2022
