WORK EXPERIENCE

Junior Software Engineer

Haber [↗](#)

06/2022 - 04/2024

Pune, India

Haber is a new age technology company focusing mainly on industrial process automation.

Application and Backend Developer

- Developed and tested **15+ efficient and scalable backend REST APIs** to meet project requirements.
- Enhanced system efficiency through the implementation of optimized coding practices, resulting in a **30% reduction in response times and improved API performance**.
- Collaborated with a **team of 5 developers** to ensure API integration across multiple platforms.
- Spearheaded the testing and implementation of application features on Raspberry Pi devices, ensuring seamless integration and optimization for enhanced user experience. This initiative led to a **25% increase in user engagement**.
- Deployed the application across 100+ devices, achieving a **95% deployment success rate**.

Software Trainee

Haber [↗](#)

01/2022 - 06/2022

Pune, India

Predictive Maintenance (POC) :

- Engineered a **Proof of Concept (POC) for predictive maintenance** of industrial assets based on vibration monitoring.
- Developed the entire application from scratch in an undoable span of 4 months.
- Integrated machine learning algorithms to predict machine failures with **85% accuracy, reducing downtime by 40%**.

EDUCATION

MCA

Silicon Institute of Technology [↗](#)

07/2019 - 06/2022

Bhubaneswar

Computer Science

- Core Member of SWITCH Club
- CGPA 9.82

Bachelor of Science

Nimapara Autonomous College

07/2015 - 05/2018

Nimapara

Physics(Honors)

- CGPA 8.97

SKILLS

Node JS

Express JS

Mongo DB

Linux

Python

C

Git

C++

Java

MySQL

HTML

AWS

CUDA

Raspberry Pi

Application Development

REST APIs

JavaScript

Azure IOT

InfluxDB

Grafana

Bitbucket

PERSONAL PROJECTS

Contact Manager

- Created more than 10 RESTful web services using Node.js and Express framework. Implemented JSON Web Token authentication for 10+ endpoints, ensuring secure access.
- Designed Mongo DB database schemas for 2 modules to store application data.

C Applications

- Identified and analyzed 30+ complex problems to develop effective solutions.
- Developed and maintained C applications like Movie Ticket Booking and Employee Record Management each handling more than 100+ daily transactions.

CERTIFICATES

AWS Services for Solutions Architect Associate, Udemy

Learn Complete Python in Simple Way, Udemy

MongoDB Basics, MongoDB University

Devops Fundamentals, Udemy

Career Edge - Knockdown The Lockdown, TCS iON

Master In Microsoft Power BI Desktop And Service, Udemy

The Fundamentals Of Digital Marketing, Google Digital
