ACCOMPLISHMENTS:

- **Technical Automation:**

Successfully implemented automated technical workflow, reducing time spent on repetitive tasks and freeing up resources for strategic initiatives.

- **Workflow Optimization:**

Streamlined marketing workflows within the automation platform, reducing manual intervention and increasing operational efficiency.

- **Client Commendation:**

Earned high praise from the client for our unwavering dedication, with the project celebrated as a benchmark for excellence in the APAC region, showcasing our commitment to quality and client satisfaction.

- **JP Market Migration from ACC to ACS:**

Successfully implemented JP market from Adobe Campaign Classic(ACC) to Adobe Campaign Standard(ACS). This process involved transferring our campaigns and data to take advantage of ACS's user-friendly interface and advanced automation features.

- **ANZ Market Migration from Instance 1 to Instance 2:**

The migration of the ANZ Market from Instance 1 to Instance 2 involves assessing existing data and workflows to identify dependencies. Key steps include exporting customer profiles and campaign assets, then setting up and configuring the new environment in new Instance. Complete testing was conducted to verify data integrity and functionality before going live. Overall, this migration improved our marketing capabilities and positioned us for future growth.
