**OBJECTIVE:**

Actively looking for new opportunities for the position of **Robotics Process Automation Developer (UiPath)** with having **5.0 Years** of relevant as Senior RPA Developer and Having **11.0** years of Overall experience in IT Industry.

**PROFESSIONAL SUMMARY:**

- Involved in end to end implement Robotics Automation Process for clients as per requirement which involves analysis, designing workflow, development, testing, deployment & maintenance.
- Worked on **Login to websites, searching in websites, submitting web forms, or updating records on a website.**
- Worked on different Environments like Desktop automation, Web automation, Email automation, Excel automation, PDF automation & Mainframe automation etc.
- Experience in working with people globally, offshore & onshore covering all the Time zone.
- Supporting and working closely with teams across the implementation cycle and solving technical issues.
- Good experience in analyzing client's processes and identifying automation opportunities and doing Feasibility analysis.
- Used different UiPath techniques to automate complex process. E.g. **Data scrapping, Screen Scrapping, OCR engine, Recordings, UI Explorer, Selector, Queues etc.**
- Having good exposure on experience on Document Understanding **using AI and ML Activities.**
- Having excellent logical ability and systematic approach to problem solving analysis and ability to handle Exception Handlings.
- Designed dozens of bots driving continuous improvement to processes, workflow and reporting in organizations.
- Experience with Enterprise software (SAP) Products development and solutions.
- Having Good exposure on Agile Software development and continuous testing including CI/CD Pipeline for deploying automation workflow.
- Experience in Standard Testing methodologies and overall testing cycles Preparing Test Plans, Test Scenarios, Test cases, Test execution and Test closure of the bots.
- Having 3.5 yrs of relevant experience on Implementing **UiPath Test Suite and Test Manager.**
- Having good exposure on RPA UI Automation using **Object Repository.**
- Plan and organize the work in such a way that the quality and efficiency are not impacted on the deliverables.
- Having hands on experience on other RPA Tool i.e. **Automation Anywhere (v11.0).**

### **WORKING EXPERIENCE:**

1. Worked as Senior RPA Analyst at **EXL Services, Noida, Remote** (Aug 2021 to Apr 2024).
2. Worked as Senior RPA Tester at **IFocus Systec, Remote** (Oct 2020-Jul 2020).
3. Worked as RPA Developer at **Iopex Technologies, Pune** (Dec 2019-May 2020).
4. Worked as Associate at **Softenger India Ltd, Mumbai** (Feb 2016- Nov 2019).
5. Worked as Test Engineer at **Maveric Systems, Mumbai** (June 2013-Jan 2016).
6. Worked as Graduate Trainee at **CMC Limited, Chennai** (Feb 2012 -May 2013)

### **TECHNICAL SKILLS:**

|                        |                                             |
|------------------------|---------------------------------------------|
| Web Technologies       | HTML, XML, CSS                              |
| Operating systems      | Word, Advanced Excel, Power Point, Outlook. |
| Technologies           | VB Script & C#                              |
| DBMS                   | SQL Server                                  |
| Webservices API Tool   | SOAP, REST & POSTMAN                        |
| Defect Management Tool | JIRA & HPQC                                 |
| RPA Tool               | UiPath, AA (11.0 v) & Power Automate        |
| Version Control        | GitHub                                      |
| Deployment Process     | CI/CD Pipeline                              |

### **ROLES & RESPONSIBILITIES:**

- Responsible for process discovery and possible automation to reduce the manual intervention and repeated tasks.
- Prepared (PDD & SDD) documents related to Workflow process.
- Requirement gathering from Business analyst and start analysis of FSD.
- Involved in Design, develop and deploy the process automation solutions in UiPath.
- Following Process Definition Documents to create a Workflow for the use cases.
- Developed and implemented RPA as individual contributor whenever required.
- Setup bots in the **UI Path Orchestrator** for Deploying, Monitoring and Publishing the project.
- Worked extensively with Files and Folder objects.
- Create required number of workflows based on the modules involved in the process.
- Implement the **Reframe work** by consolidating all the workflows and publish in Orchestrator.
- Created flowchart and sequences according to UiPath to create bots.
- Automating data transfers, including importing/exporting data between applications or files.
- Identifying exceptions and its solution by testing each activity. Used debugging features present in UiPath Studio.
- Creating PCM document to transfer the BOT from Pilot env to Production environment.
- Handover the automation script to client for UAT to verify and validate the code and then get UAT Signed off from the client.
- Move the code for deployment in Production environment and also give production support whenever required to the client.

## **PROJECT EXPERIENCE:**

### **A.EXL Services – RPA Developer**

#### **Project 1: SAP Transaction Inquiry Process**

**Client** : Prudential Life Insurance

**Application** : SAP ECC

**Tool** : UiPath Studio, Robot, Orchestrator & UiPath Test Suite

CSO completes UiPath Form with Transaction information. BOT searches in OIB to find list of transactions and scrapes data. Based on scraped transaction data, BOT will navigate to SAP application to find transaction detail. Upon completion, BOT will complete notes with Service View case and sending reports to business stakeholders. Developed and executed test plans, test cases, and test scripts for SAP RPA projects, ensuring adherence to business requirements, functional specifications and quality standards. Execute UiPath Test Suite to run automated tests against the SAP system. Conducted performance testing using data-driven approaches to simulate realistic user scenarios and workload conditions. Monitor the test execution process using UiPath Orchestrator, review test results and analyze any failures or issues encountered during testing.

#### **Project 2: Payments SAP Key Database Setups**

**Client** : Minnesota Life Insurance

**Application** : SAP ECC

**Tool** : UiPath Studio, Robot, Orchestrator & Reframework

**Project Description:** RPA BOT to monitor AES, read requests for PDF forms and define business rules for data validation steps to extract the data. Extracted data will enter in SAP application and send the EOD report to business. Utilized UiPath Test Suite to design and execute test cases for SAP applications, including SAP ECC. Align testing efforts with project goals and ensure timely delivery of high-quality software.

### **B. IFocus Systec –Senior RPA Tester**

#### **Project1:**

**Client** : DIAGEO India.

**Application** : Salesforce Application

**Domain** : Life Insurance( Marketer & Services)

**Process** : UiPath Studio, UiPath Robot, Orchestrator.

**Project Description:** The Principal Financial Group is a global financial investment management and insurance company headquartered in Des Moines, Iowa, U.S.A. They give financial tools, resources and information that is required to the best.

Principal Financial Group has a given a flexibility to 'Contract Holder' & 'Marketer' to change the Servicing and/or Selling marketer, this process called AOR/AOR (Agent of Records) Process. Developed Bot process for Principal Financial Group, which is running successfully in production.

- Working on the FIS (Omni workflow) Compass application (Web based application) website on the client and updating the download data on the webform (according to different scenarios of the data to be processed).

- Downloading the file and save in a particular folder location from the website in excel format with selecting current day and date and also send Email to users.

**Applications Handled:** Web application, Excel automation, Email automation & OCR

### **C.Iopex Technologies –Senior RPA Developer**

**Client** : Principal Global Services.

**Application** : Salesforce Application

**Domain** : Life Insurance( Marketer & Services)

**Project Description:** The Principal Financial Group is a global financial investment management and insurance company headquartered in Des Moines, Iowa, U.S.A. They give financial tools, resources and information that is required to the best.

Principal Financial Group has a given a flexibility to 'Contract Holder' & 'Marketer' to change the Servicing and/or Selling marketer, this process called AOR/AOR (Agent of Records) Process. Developed 2 Bot process for Principal Financial Group, which is running successfully in production.

- Working on the FIS (Omni workflow) Compass application (Web based application) website on the client and updating the download data on the webform (according to different scenarios of the data to be processed).
- Downloading the file and save in a particular folder location from the website in excel format with selecting current day and date and also send Email to users.

**Applications Handled:** Web based, Desktop based, Excel automation & Email automation.

### **D. SOFTENGER INDIA PVT LTD – Associate**

#### **Project 1:**

**Client** : IBM India Pvt. Ltd

**Application** : Aditya Birla capital–(Group Policy Buying portal)

**Process** : UiPath Studio, UiPath Robot & Orchestrator

**Role** : RPA Tester

**Project Description:** Developed end to end Bot process for Aditya Birla Life Insurance Company, which is running successfully in production.

- Downloading the file from the website in excel format for current day.
- Working on the internal website on the client and updating the download data on the web Form (according to different scenarios the data to be processed).

#### **Responsibilities:**

To perform manual application walkthrough of the process to be developed and also develop the process according to the process map (solution document provided). If any requirement is missing, have to communicate with the client and get it clarification and then continue for the development. Also have to perform unit testing after the development and have to fix the errors coming in UAT as well as production environment. Also sometimes need to provide the post-production support.

**Applications Handled:** Web based, Desktop based, Excel automation & Email automation.

#### **Project 2:**

**Client** : IBM India Pvt. Ltd

**Application** : Aditya Birla Capital–(Advisor Portal, BSLI WAY & Online)

**Process** : UiPath Studio, UiPath Robot & Orchestrator

**Role** : RPA UiPath Tester

**Project Description:** Developed end to end Bot process for Aditya Birla Life Insurance Company, which is running successfully in production.

- Worked on various excel file to filter the data according to the data provided scenario and updated it in the final excel file to current day for current month. Then converting each Excel file into PDF and sent it to the end user through email.
- Extracting the file received on the email for the present day and then updated the data on the internal website on the client-based scenarios.
- Reading the PDFs and updating the data on the website and saving the same.

#### **E. MAVERIC SYSTEMS LTD –Test Engineer**

**Client : SBI General Insurance Co. Ltd.**

**Application : EBAO Tech**

##### **Project Description:**

- Worked in Datawarehouse Report Testing using OBIEE Tools with analyzing analytics and statics dashboard to generate the report for Data Analysis.
- Done End to End product testing like Motor Insurance, Health & Fire Insurance.
- Involved in EBAO of two sub-applications E.g. General Systems-For all Policy issuance, Reinsurance, Policy Endorsements and Generic Claims.
- Involved in others applications integrated with EBAO are CRM & DWBI.

#### **F. CMC LIMITED-Graduate Engineer Trainee**

**Client : Chola MS General Insurance Ltd.**

**Application : GENISYS Configurator**

##### **Project Description:**

- Policy Administration, Claim Management, Reinsurance and Co-Insurance.
- Involved in End-to-End product testing for Motor and Health Insurance.

#### **ACADEMIC PROFILE:**

- **B. Tech** in Electronics & Instrumentation Engineering from **Bharath Institute of Science & Technology in 2011**, Chennai.

#### **CERTIFICATIONS:**

- RPA Automation Anywhere Certified Advanced Professional (V11.0)
- RPA UiPath Advanced Developer Certified (Ui ARD)
- ISTQB Certified Tester Advanced Level Test Manager.
- UiPath Test Suite and Test Manager Diploma Certification.

#### **AWARDS & RECOGNITION:**

- Received **Certificate of Appreciation from "IBM-1H 2016 Recognition"** award for Outstanding Performance.
- Received **Certificate of Appreciation from "IBM-BSLI Client for Pathfinder Project"** which is based on Webservices Testing using SOAP UI Tool.

#### **PERSONAL DETAILS:**

- Date of Birth : 15-Aug-1988
- Fathers Name : Kamta Prasad Singh
- Languages : English & Hindi
- Address : Finance Colony, Prem Kunj Apt, Patna-800014
