SUMMARY

Motivated AWS Administrator with 1 year of experience, skilled in managing and optimizing AWS cloud environments and Linux systems. Proficient in deploying, configuring, and maintaining AWS services, including EC2, S3, RDS, and IAM, as well as handling Linux server administration tasks. Experienced in supporting scalable infrastructure, automating processes, and ensuring high system availability and performance. Demonstrates strong problem-solving abilities, troubleshooting skills, and effective collaboration within dynamic teams. Eager to leverage hands-on experience with both AWS and Linux systems to contribute to a forward-thinking organization and further develop expertise in cloud and system administration.

TECHNICAL SKILLS:

- **EC2 Management:** Experienced in launching, configuring, and managing Amazon EC2 instances, including setting up security groups, key pairs, and scaling policies to optimize performance and cost-efficiency.
- **S3 Storage Solutions:** Proficient in configuring and managing Amazon S3 buckets, including setting up lifecycle policies, managing access controls, and optimizing storage costs through different storage classes.
- **RDS Database Administration:** Skilled in deploying, configuring, and managing Amazon RDS instances, including performance tuning, backup strategies, and scaling to support high availability and application performance.
- **IAM Security Configuration:** Adept at creating and managing AWS IAM roles, policies, and multi-factor authentication (MFA) to ensure secure and compliant access to AWS resources.
- **CloudWatch Monitoring and Alarming:** Proficient in using AWS CloudWatch to set up monitoring, create custom dashboards, configure alarms, and analyze performance metrics for proactive management of cloud resources.
- **Linux Command Execution:** Experienced in running essential Linux commands to monitor system performance and resource usage effectively.
- **Linux User and Permission Management:** Skilled in configuring and managing user accounts and permissions on Linux systems to ensure secure and appropriate access controls.

PROFESSIONAL EXPERIENCE

MHTECHIN Technologies

AWS Cloud Intern

Pune, Maharashtra

June 2024 – Present

- Assisting in the deployment and management of AWS resources, including EC2 instances and S3 buckets, to support development and production environments.
- Assisting with the implementation of automated monitoring solutions using AWS CloudWatch, helping to proactively identify and resolve system issues.
- Participating in the development of cloud infrastructure documentation, including deployment guides and operational procedures, to streamline team workflows.
- Contributing to the management of AWS IAM roles and permissions, ensuring secure access control and compliance with organizational policies.
- Engaging in troubleshooting and resolving AWS-related issues, working closely with senior administrators to address performance bottlenecks and maintain system stability.
- Executing and managing Linux commands for system monitoring and maintenance, such as ``top``, ``df``, ``du``, and ``ps``, to ensure optimal performance and resource utilization.
- Configuring and maintaining user accounts and permissions on Linux systems using commands like ``adduser``, ``usermod``, and ``chmod``, ensuring appropriate access controls and security compliance.

- Configured and managed AWS services including EC2, S3, RDS, and IAM, ensuring optimal performance and security for various projects.
- Automated deployment processes using AWS CloudFormation, improving efficiency and reducing manual configuration errors.
- Monitored and analyzed system performance with AWS CloudWatch, implementing adjustments to enhance availability and reliability of cloud resources.
- Administered and optimized AWS RDS databases, including performance tuning, backups, and scaling, to support application requirements.
- Collaborated with cross-functional teams to troubleshoot and resolve AWS-related issues, delivering timely solutions and supporting overall system stability.

CERTIFICATIONS & COURSES

EDUCATION & OTHER

Gokhale Education Society’s R. H. Sapat College of Engineering, Management Studies, and Research <i>Bachelors in Electrical Engineering</i>	2019-2022
Mahavir Polytechnic <i>Diploma in Electrical Engineering</i>	2017-2019

LANGUAGES: English (proficient), Marathi (native), Hindi (fluent)
