Dedicated and results-driven Associate Consultant with 3.7 years of hands-on experience in Mainframe domain. Skilled in proactive bug detection and development, I excel in configuring IBM tools and contributing to team success through hard work, attention in detail and excellent organizational skills. Proficient in COBOL, JCL, VSAM, EASYTRIEVE with expertise in incident response, Batch support and Job fixing. Able to clearly communicate complex technology to wide audiences and stakeholders and motivated to learn and grow in Mainframe technology.

Experience

Associate Consultant

March 2021 - Present

Capgemini Private Limited India
Pune, India

- Developed and maintained IBM applications ensuring high standards of performance and reliability.
- Led cross-functional collaboration in Agile sprints, incorporating stakeholder feedback to deliver solutions that improved user satisfaction by 30% and reduced feature implementation time by 20%.
- Executed full software development lifecycle from requirement analysis to implementation, delivering high-quality code that reduced bug occurrence by 30% and improved system efficiency by 20%.
- Working in Service Now for change tickets and failure incidents.
- Specialized in maintaining critical applications.
- Worked closely with cross-functional teams, including business analysts, project managers, and quality assurance professionals, to understand requirements, prioritize tasks, and deliver solutions that meet business needs.
- Performed routine maintenance tasks, such as applying software updates, monitoring system performance, and troubleshooting issues that arise.

Projects

Assurant Inc (Insurance Company)

- Gained hands-on experience in gathering requirements with initial analysis and providing code and unit testing.
- Facilitated daily stand-ups and sprint planning sessions with cross-functional teams and stakeholders, resulting in a 25% increase in project delivery speed and a 15% reduction in development time.
- Worked under Billing team where the transaction used to process and update in Front end.
- Executed complex SQL scripts on DB2 tables, improving data accuracy by 30% and reducing report generation time by 50% for monthly business performance reviews.
- Monitored Batch cycles and Service Now Problem management tool.
- Handled job failures during execution and giving temporary/permanent solution to the problem.
- Solved complex tickets including Root cause analysis (RCA) of problems and providing solution to the business users and implementing code as per fix after execution of testing.
- Worked on Automation processes which lead to smooth work and less time for updating or creating errors.
- Developed and enhanced modules for insurance applications using COBOL, JCL, VSAM, CICS, and DB2. Involved in both service and development aspects, ensuring adherence to Agile principles.
