Jaipur, Rajasthan  
Pin Code - 302001

## Education

MTech (CSE) | (2022-2024)  
NIT Jamshedpur  
7.93 CGPA

BTech (CSE) | (2018-2022)  
JNIT Jaipur  
7.2 CGPA

Senior Secondary (2018)  
MBN School Jaisalmer  
71.6 %

Secondary (2016)  
SVS School Jaisalmer  
76.5 %

## Key Skills

### Programming language

- C/C++
- HTML
- CSS
- TCL Scripting
- JavaScript (Basic)
- Python (Basic)

### Software/Tool

- Jira
- VNC
- Jenkins
- ClearCase version control
- Git/GitHub

## Profile Summery

M.Tech graduate in Computer Science with a B.Tech in Computer Science. Experienced as FPGA software developer with internship experience. Proficient in C++, TCL scripting, CSS, and HTML. Demonstrated success in enhancing code quality and increasing code coverage by 8-10% at Microchip Technology. Eager to apply technical skills in a challenging and rewarding role.

## Internship Experience

### Microchip Technology Inc (June 2023 – June 2024) - FPGA software developer

#### Libero SoC software project

- In this project I have contributed to the maintenance and enhancement of Libero SoC Design Suite, focusing on code clean-up, bug fixes, and the implementation of new commands for improved usability.
- Ensured the reliability and efficiency of FPGA-based system design tools, optimizing functionality for diverse user needs.

#### Audery software project

- I have focused on code quality and reliability to ensure comprehensive testing, led code cleanup efforts for maintainability, and efficiently resolved critical bugs, contributing to the overall stability and performance of the project

#### PolarFire FPGA software project

- Responsible for designing and implementing test cases to validate new functionalities, ensuring system robustness.
- Contributed to the development of new features, optimizing system capabilities and performance.

## Roles and Responsibilities

- Developed new features in FPGA software, expanding its capabilities and usefulness
- Fixed bugs in FPGA software, improving its reliability and performance
- Maintained and updated test cases for FPGA software, ensuring that new features and bug fixes were thoroughly tested
- Contributed to improved code quality, security, and maintainability through proactive Coverity issue resolution.
- Analyzed source code to identify functionality issues.
- Assisted in the creation of comprehensive documentation for developers and end-users alike.
- Coordinated project tasks among multiple departments.
- Gained valuable experience working within an agile development environment, utilizing Scrum methodologies.
- Participated actively in peer-to-peer learning opportunities which helped expand personal skillset as well as foster a collaborative work environment.

## Projects

---

### A comprehensive survey of Image captioning (MTech)

Description: Provide a comprehensive survey on image captioning technologies and future scope in the thesis work.

### Music Player Clone (Similar to Spotify) (BTech)

Description: Developed a functional music player application that emulates the core features of Spotify, including music playback, playlist management, and user interface where I used HTML, CSS, JavaScript

## Position of Responsibility

---

- Teaching Assistant Under Dr. Gopa Bhaumik, C Programming Lab.
- Teaching Assistant Under Dr. Mayukh Sarkar, Operating System Lab.

## Extra-curricular

---

- Accommodation and transportation head Varchas Fest - 2020 at JNIT Jaipur.
- Participated in sports and cultural activity in school and college level.

## Hobbies and Interests

---

- Playing table tennis and carrom
- Listening to music
- Watching movies
- Cooking

## Declaration

---

I hereby declare that above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
