Professional Experience

- I have 3 years of experience as a software engineer specializing in RPA development.
- Prepared Software Design Documents (SDD) for development.
- Designed and developed robust automation workflows using UiPath Studio and UiPath Apps, ensuring scalability and maintainability.
- Developed automation solutions for Finance Line of Business processes.
- Integrated UiPath robots with various systems, databases, and APIs to automate end-to-end processes.
- Conducted thorough testing and debugging of automation solutions to ensure reliability and performance.
- Deployed automation solutions into production environments, ensuring minimal disruption to existing processes.
- experienced in working on Command prompt with Automation
- Experienced in working with both Cloud and On-Premises UiPath orchestrator.
- Provided hypercare support post-deployment to address issues, optimize performance, and ensure a smooth transition for end-users.
- Prepared user manuals for each process to ensure effective interaction with the automation solutions.
- Continuously monitored and optimized automation workflow to maintain performance and adapt to changes in business processes.

Technical Skills

UiPath	UiPath Apps
Power Apps(Basics)	API
MySQL.	VB & C#
Uipath Document Understanding(Basics)	

Organizations

2021/10 – present	iOpex Technologies Pvt Ltd
Chennai, India	<i>Software Engineer</i>

Projects

Client: T-Mobile - NCI Automation

Roles: Developer

Platform: Web Automation, Mail Automation, PostgreSQL, UiPath RE- Framework, Uipath Apps

Process: This process is to Automate the procedure of monitoring the Grafana dashboard graphs for the UPF individual data and the SMF individual data analyze each graph widget report values, send the alerts via mail, and share the output via Microsoft Word & excel file.

Description:

- **Uipath apps:** Business will upload the input in .xlsx format, the uploaded file will be Stores in Orchestrator Storage Buckets which we have mapped and it will create a Queue of File locations where it got stored.
- **Dispatcher:** After the Queue is added to the Dispatcher, then it will automatically start processing and extract the data from the Excel and add that to a performer Queue with the needed data.

Performer:

- Automate to Launch of applications, input loading and extraction of required values, and Snapshot of all the Graphs in the application.
- Storing the extracted data and snapshots in Excel and Word documents

- Sending the consolidation mail with the processed results
- Triggered alert emails with the graphs screenshots when the thresholds were Breached

Client: T-Mobile - Service Dashboard Automation

Role: Developer

Platform: Web Automation, Mail Automation, MySQL, UiPath RE- Framework, Microsoft Power Apps

Description:

- When the user Submits input in the PowerApps Portal, it is added to the Orchestrator Queue.
- Bot will pick the input and extract the data from the NetScout application based on the input and store the data into the database.
- PowerApps portal will fetch the status from the DB and showcase it in Portal on the input Extract Tab.
- The bot will Save the JSON format of the output and we can download that in PowerApps Portal.
- The bot will send a completion Mail to the user who submitted the input.

Client: T-Mobile - SNMPV3 Configuration bot

Role: Developer

Platform: Command prompt Automation, MySQL, Uipath RE framework

Description: This bot configures the node that the Business Sharing on the Command prompt and sends the Mail to the Client when it's completed.

T-Mobile - L1 & L2 support Activities that worked on Past:

- Jira ticket maintaining
- Excel Maintaining
- Fixing bugs
- Resolving the business's request for enhancement.
- All UiPath Orchestrator Activities.
- contacting with Business for new requests and enhancement-related tasks
- Git repository and Azure

Education

2017 – 2021	B.E - Electrical and Electronics Engineering <i>Jeppiar Engineering College, Chennai</i> CGPA -8.56
-------------	--

Certificates

UiPath Advanced Developer

Completed courses in UiPath academy and have hands-on Experience

Power Automation

Learning and experimenting with the power platform's tools like Power Automation and Power Bi

Awards

Keep Raising

Project Manager

Noted for tremendous contributions and completing the NCI Automation Phase 1 on time and deployed into the UAT and Production

Inspiring

Project Manager

Recognized for effective brainstorming during Requirements Gathering and dedication to teaching and learning bots.
