

Karan Naidu

Data Engineer with over 3 years of experience specializing in cloud-based ETL data engineering, data migration, and workflow automation using Azure Databricks and Azure Data Factory. Demonstrated expertise in Python, SQL, and Spark/PySpark, enhancing data analysis and operational efficiency.

EXPERIENCE

Accenture, Pune — *Data Engineer*

January 2022 - PRESENT

- Led the development and management of 100+ specialized ETL pipelines leveraging Azure Data Factory, Azure Databricks and Azure SQL for Eversource Energy (US based Utilities company for Electricity, Oil & Gas), enabling seamless data integration and end-to-end data transformation.
- Loaded and transformed large sets of semi-structured and unstructured data likes JSON, Avro, Parquet, resulting in a 40% increase in data processing speed & enhanced data-driven decision making and business insights.
- Ensuring the scalability, security and availability of the data infrastructure collaborating with data architects and 5+ cross-functional teams to understand business requirements and develop data-driven solutions.
- Conducted SAP ISU data analysis to determine requirements for 100+ scenarios, do root cause analysis and integrated queries and programs.
- Deployed robust Azure security and monitoring practices ensuring data quality for data platform, optimizing costs by 20%.

Accenture, Pune — *Data Engineer Associate*

July 2021 - January 2022

- Engineered the migration of 500 TB of data from HDFS to Azure Blob, leveraging Azure Data Factory for efficient transfer and implementing automated validation processes, achieving a 99.7% accuracy for datasets.
- Transformed PySpark code for 30% high-speed data processing and performed SCD to meet business requirements for Snowflake.
- Developed Python scripts to automate data processing and quality checks, reducing manual effort by 40% and improving data accuracy by 25%.
- Analyzed 50+ functional documents with data scientists using Microsoft stack (SSMS, SSAS) designed by the Shareholders and Development team.
- Scripted Agile Azure DevOps CI/CD pipelines for SAP ERP with Jenkins for data transformation, achieving 20% reduction in manual intervention.

Great Place It Services, Nagpur — *Data Science Intern*

July 2020 - July 2021

- Spearheaded the creation of an innovative Theme Extraction system using Machine learning and Python programming techniques, enabling seamless automated sentiment analysis. This resulted in a published research paper.
- Designed 4 data analysis frameworks using Spark and Power BI enabling text mining, natural language processing, and deep learning techniques to analyze collected data and generate insightful reports.

EDUCATION

Shri Ramdeobaba College of Engineer and Management, Nagpur

Master's in Computer Applications - July 2019 - July 2021

Dr. Ambedkar College, Nagpur

Bachelor's in Computer Applications/Technology - July 2016 - July 2019

Phone - +91 9623662044

Email - nkaran70@gmail.com

Known Languages – English, Hindi, German.

SKILLS

Languages:

Python, Java, R, Apache Spark/Pyspark

Big Data:

Azure Databricks, Azure Data Factory, Azure Synapse Analytics, Azure Functions, Microsoft Azure, SAP HANA, Snowflake Data Warehouse, Logic Apps, ADLS Gen 2

Business Intelligence/Visualization Tools:

Microsoft Power BI, Tableau, Microsoft Excel, Azure Data Analytics, Microsoft Fabric, Data Reporting

Machine Learning/AI Frameworks:

NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn, Dimensional modeling, Statistical Analysis, Semantic layer models

Miscellaneous:

Jupyter Notebook, JIRA, GIT, Putty, Docker, REST API, Scrum, Kanban, Agile, Azure Key Vault, CI/CD Pipeline Development, Azure IAM, Azure Analysis Services, AI/IOT, Stakeholder Engagement

PROJECTS

Market Analysis Report (Microsoft Azure, Data Factory, Databricks, ADLS Gen 2 and PowerBI)

- Implemented a robust metadata based ETL process using ADF and Databricks for data extraction, transformation, and loading, resulting in seamless data flow from CSV files to Azure Data Lake reducing data processing time by 45%.

Energy Usage Theme Extractor (Azure SQL, Jupyter Notebooks, Microsoft Fabric (Power BI) and Python)

- Orchestrated and created a system based on NLP using Python programming and 10 million+ dataset, providing valuable insights for enhancing customer usage patterns with detailed analysis.

CERTIFICATIONS

- Certified in Microsoft Azure Fundamentals (AZ – 900), Python and R programming from Microsoft.
- Certified in Generative AI Fundamentals and Lakehouse Architecture from Databricks.
