

KARTHIK THULASIRAMAN

E-Mail: karthik.thulasiraman@gmail.com

Mobile: (+91) 9538762097

Creative, Innovative & Forward-thinking IT Professional, offering extensive, diversified and multi-cultural experience in **Software Development (design, analysis, testing, development, coding & technical demonstrations)** with hands-on experience in cross-functional team coordination, customers & stakeholder management

CORE COMPETENCIES

Technical Solutions Architecture

Data Integration & Consulting

**Tools and Technology Selection /
Evaluation**

Technical Deliverables Review

Client Relationship Management

Quality & Performance Improvement

Design and Code Reviews

IT SKILLS

Languages: Java, HTML, DHTML, XML, XSLT

Systems: Linux, Unix, Windows, Ubuntu, RHEL

Web Technologies: Servlet, JSP/JSTL, JQuery/Ajax, JavaScript, CSS

Technologies: Elasticsearch/Solr, Kafka, Spark, Redis, AWS Cloud (EC2, RDS, S3, EKS, Lambda), Camunda, Flink, Hazelcast, Solace, RabbitMQ

Framework: Struts, Spring (Core, AOP, MVC), Hibernate, ELK, Spring Boot, Eureka, Zuul, Zipkin, OPA, Open API Spec - Swagger

Architectures: Microservices, RESTful, SOAP Webservices, SOA

Tools: Talend (ETL), Apigee (API Management), Kong

NoSQL Datastore: MongoDB, ArangoDB

Database: DB2, Sybase, MySQL, Oracle, PostgreSQL

Application Server: JBoss, WebLogic, Apache/Tomcat

Performance Tools: JMeter, Visual VM, JProfiler, DB Optimizer, Gatling

Repository/Build Tools: GIT, Clearcase, CVS, VSS, PVCS, Ant, Maven, CruiseControl, Jira, Sonar, Findbugs, AppScan, Jacoco

DevOps Tools: Jenkins, Docker, Kubernetes (EKS), OpenShift, Docker, Mesos, Grafana, Prometheus, Micrometer, Kubectrl, Nagios

PROFILE SUMMARY

- Nearly 22 years of experience in working on **Software Development Projects, Object-Oriented Analysis/Design & Java Development**, skilled at progressing from problem statement to well-documented designs across various geographies while meeting business needs in a fast paced, dynamic and globally expanding MNC environment with domain excellence in **Banking (Digital, Risk Management & Investment Banking)**
- Credit Risk** products **Experian** - PCSM (decision and strategy management), **TransUnion**, **Pefindo**, **Trusting Social** etc.
- Merit of working with global reputed clients like Singapore Tourism Board (Tourism), TransUnion (US - Credit Services), Unosoft (Norway - Sports Portal), HMRC (UK - Govt), Telenor (Norway - Telecom), Renault (France - Auto), Wellpoint (US - Healthcare), Barclays (UK - Investment Bank), Standard Chartered Bank (UK - Bank) & Lehman (US - Investment Bank)**
- Developed applications using **JAVA 8, J2EE, Collections, Exception Handling, Multi-threading, JavaScript, HTML, Mockito, Wiremock Frameworks like Hibernate, Spring, Spark, Kafka, AngularJS, MongoDB, Sybase, Web Services, MicroService, ELK Stack, Kibana and Grafana dashboards, Spring Boot, and JAVA 11 Reactive - WebFlux**
- Delivered the **solution design based on product requirements**; designed a cost estimate and resourcing plan based on the solution design
- Directed SLAs of various **Extract, Transfer & Load (ETL) processes** & tools; coordinated with Line of Business (LOB) owners to develop and implement new processes and finalize SLAs
- Resourceful at **maintaining relationship with clients** to achieve quality product and service norms by resolving their service related critical issues
- Effective in end-to-end **product planning and implementation** from scope management, to activity sequencing, risk analysis to quality management
- Targeted Solutions:** Structured customized solutions to meet customer's specific needs; leveraged logical and analytical approach to solve complex problems and issues; formulated strategy & set a high standard in developing and maintaining plans. Skilled in establishing the technical infrastructure of the project while reviewing the project proposals
- Led **large-scale business application architecture and design efforts**; developed and maintained application architectures for various business functional areas; **resolved integration and interface issues** between various applications or systems with focus on optimizing application performance and scalability
- Team Leader**, who has **successfully trained, led & motivated** teams towards attainment of project objectives & success in the organization; ability to champion organization values & vision and create a clear and compelling view of future through coaching and execution abilities; extensively coordinated with global teams; exceptionally respectful & appreciative of diverse cultures and viewpoints
- Possess expertise in Object-Oriented Analysis/Design and Java Development, skilled at progressing from problem statement to well-documented designs.
- Personal Mission Statement** - "Doing My BEST and Making a Difference, with Optimism and Integrity"
- Leadership Style** - Teamwork, Attitude, Communication, Empowerment and Mentoring.

ACADEMIC DETAILS

- B.E., Mechanical Engineering, Bangalore University, India in 1999
- E-Commerce Certification from Anna University, India in 2000

PERSONAL DETAILS

Address: 4 Parkside Apts., 17-B Venkatnarayana Road, T Nagar, Chennai - 600017

ORGANISATIONAL EXPERIENCE

Amazon Web Services Inc (Trianz Digital Consulting), India

Jul'22 – Present

Senior Engineering Manager

Program Name: AppFlow/QuickSight

To develop/build AWS AppFlow connector for various SaaS application and enable seamless data integration between the SaaS application and other AWS services. This requires highly skilled and detail-oriented Architect and developers for AWS AppFlow/QuickSight connector development. Proficient in creating and maintaining connectors to enable seamless data transfer between various applications and services. Adept at troubleshooting and resolving complex issues, collaborating with cross-functional teams, and managing project timelines. Similarly develop connector for AWS QuickSight, allowing to connect to various data sources to create visualizations and dashboards.

Role:

- Designed and developed connectors for AWS AppFlow and QuickSight, enabling seamless data transfer between various applications and services. Developed connectors deployed in an AWS Lambda function.
- Collaborated with cross-functional teams including developers, testers, and business analysts to identify requirements and implement solutions.
- Managed project timelines, ensuring timely completion of deliverables.
- Debugged and resolved complex issues related to data transfer, ensuring data integrity and security.
- Conducted code reviews, providing feedback to team members and ensuring adherence to coding standards and best practices.
- Contributed to the development of documentation, including technical specifications, user manuals, and release notes.
- Continuously researched and implemented new technologies and best practices to improve the efficiency and effectiveness of the connector development process.

Environment: Java 8, AWS AppFlow, AWS QuickSight, REST APIs, SQL, GIT, GraphQL, AWS Lambda, AWS SecretManager, DynamoDB

OLA Technologies (Tarento Technologies), India

Jul'21 – May'22

Senior Engineering Manager

Program Name: e-Search

OLA is an e-commerce & ride-hailing app, Ola DASH is part of e-commerce where they sell retail goods and products through Ola app.

Role:

- Implementation of Search functionality in Ola DASH, includes Synonyms, Searchable Attributes, Ranking, Sorting, Relevance and Recommendations
- Engaged project delivery teams to provide architecture & design guidance from conception to implementation
- Analyzing product owners' feedback, performing detailed market analysis, and data gathering to make decisions about product strategy and Roadmap
- Tracking & recording Business & technology trends and collect market information on an ongoing basis

Environment: Java 11, SpringBoot, Spring, MySQL, Algolia, Kafka, AWS (EC2, RDS), Kong, Docker, NewRelic, Bitbucket, Jenkins, Mesos

Standard Chartered Bank (Optimum Solutions), Singapore

Jun'19 – Jun'21

Senior Application Architect

Program Name: Nexus

neXus consists of plugging SCB into the platforms of select partners, such as e-commerce & ride-hailing apps, giving SCB access to a large consumer base and potentially allowing SCB to scale up exponentially in these fast-growing markets.

Role:

- Leading product strategy, vision, roadmap, and requirement specification and partner very closely with engineering teams on product design, development, and deployment in a fast paced, agile environment
- Analyzing product owners' feedback, performing detailed market analysis, and data gathering to make decisions about product strategy and Roadmap
- Heading product development as the Scrum Master for functions through Agile (User Stories, sprint velocity, manage technical resource workload) with complete responsibilities on design, build, test, cutover and transition to the Operation Team
- Tracking & recording Business & technology trends and collect market information on an ongoing basis
- Driving the end-to-end product development lifecycle spanning user centric product design, agile product development, production deployment and customer support
- Steering product and release backlogs, interacting with the product owners for requirement gathering and analysis
- Performing product benchmarking and competitor analysis
- Mentoring teams of onshore and offshore developers; assign and review allocated development tasks, provide technical leadership, develop and enforce development standards by performing code reviews for developments done
- Applying high technical competence, strong technical background with track record of individual technical accomplishments - Ability to play the role of the architect for the team

Environment: Java 11, SpringBoot, Spring, PostgreSQL, EFK, AWS (EC2, RDS, S3, EKS), Kong, Hazelcast, Docker, Kubernetes, Camunda, Solace, Kibana, Grafana, Bitbucket, Jenkins

NCS (National Computer Systems), Singapore

Dec'18 – Mar'19

Lead IT Architect

Client: Singapore Tourism Board

The Tourism Information & Services Hub (TIH) is a digital resource platform for businesses to access relevant information on Singapore's tourism offerings and travel software services.

Role:

- Architected solution for Recommendation engine, right from ETL tool finalizations to end output. Integrating and ingesting with Adobe Experience Manager Analytics data to recommendations
- Led the Data ingestion of structured & semi-structured data using ETL Talend tool for Recommendation engine
- Maintained & followed API Governance doc, which helped the developers to follow consistencies and best practices in building RESTful APIs
- Designed & implemented 2FA Authentication with SingPass using client ID and client secrets

Environment: Java 8, Spring Roo, Spring Batch, MongoDB, Solr, MySQL, Tomcat, Apigee, Talend (ETL) & AWS Cloud

Barclays Bank (Morgan McKinley), Singapore		Mar'17 – Dec'18
Senior Application Architect		
Program Name: Phoenix		
Phoenix is a complete redesign of Identity and Access Management (IAM) system aiming to replace Oracle Identity Manager in Barclays and eventually compete in the market with other IAM providers. The program has many modules to view/ manage/recertify all Identity & Access, including modules for application on-boarding and Life Cycle Mgmt.		
Role:		
- Engaged project delivery teams to provide architecture & design guidance from conception to implementation - Dictated design choices for the team and ensured that all development adheres to best practices		
Highlights:		
- Identified tools and technologies basis project requirements which comprised the data and integration architecture and business intelligence components of the system - Implemented ELK and Netflix stack - Led the delivery of module on time with good quality (includes less defect and low turnaround time for defect resolution) - Implemented technology services to support both 1 and 2-way TLS		
Environment: Java 8, Spring Boot, Elasticsearch, Kafka, Flink, Spark, Camunda, ArangoDB, Archaius, Eureka, Zuul, Zipkin		
Spire Technologies (Product/Start-Up), India		Jun'15 – Jan'17
Principal Engineer		
Product: TalentVista		
Role:		
Main responsibility is to develop RESTful application using SOA and Micro Service as paradigm and integrating with KeyCloak SSO. Engaged as an integrated part of project team and championed project from inception to design and development. Deep understanding of technology with focus on delivering business solution		
Highlights:		
- Implemented multitenancy resolved at schema level & Complying to PaaS model - Architected & designed Data Integration Service as a Microservice with MongoDB as datastore - Steered Elasticsearch API for free text search and facet counts (aggregated) - Prepared prototypes, design patterns, developer's manuals, and presentations for business executive's development managers, and to mentor Software Engineers		
Environment: Java 8, Tomcat, Restful, Elasticsearch, AWS, Kafka, Spark, KeyCloak, MongoDB, MySQL, ELK, Morphia		
Accenture, India		Jul'14 – Jun'15
Associate Manager		
Client: Wellpoint (US – Health Care)		
Role:		
Developed a web application using Spring MVC & Hibernate integrating. All the service-related calls followed Service Activator design implementation for better performance		
Environment: Java 5, WebSphere, Spring MVC, Hibernate, Splunk, Oracle11g, SVN		
Capgemini, India		Oct'07 – Apr'14
Manager		
Client: TransUnion (US – Credit Services)		
Role:		
Made the design choices for the team and ensured that all development adheres to best practices		
Environment: Java 5, Tomcat, Spring MVC, Hibernate, JSTL, Oracle10g, Find Bugs, ClearCase and ClearQuest		
Client: HMRC (UK – Govt.)		Sep'08 – Mar'10 (Onsite)
Role:		
Developed application modules using Spring MVC and integrating DAO layer with Hibernate for object persistence		
Undertook design choices for the team and ensured that all development adheres to best practices		
Environment: Java 5, WebLogic, Spring MVC & AOP, Hibernate, JSTL, Oracle10g, Find Bugs, ClearCase and ClearQuest		
Technosoft Global Services, India		Jan'07 – Oct'07
Consultant		
Client: Unosoft (Norway – Sports Portal)		Feb'07 – May'07 (Onsite)
Role:		
Set up of environment. Implementation of Ajax framework. Provided technical assistance for fellow team members.		
Environment: Windows XP, Tomcat 5.5, JDK 1.5, Servlet 1.5, JSP 1.2, AJAX, Struts 1.1 and MySql 5.0		
Kanbay, India		Jun'04 – Nov'06
Associate Consultant		
Client: Lehman Brothers (US – Investment Bank)		
Role:		
Discussion on requirements, assigning of task to the team members. Coordinating/Interacting with the onshore client through email/conference call. Giving pro-active solutions to meet the clients exceeding expectations. Taking charge of offshore team in the absence of Lead Consultant.		
Environment: Windows 2000, WebLogic 8.1, CVS, VSS, Struts, Spring, Java 1.3, JSP 1.2, JSTL 1.0 and Sybase 12.x		
ADC Solutions, India		Dec'00 – May'02
Senior Web Developer		
Role:		
Code development and Unit-testing		
Environment: Java, JSP, MySQL, JavaScript, Apache and Tomcat
