Professional Experience

Professionally qualified security engineer with 1 year of experience in information security roles.

Current position

Security Engineer

Tamil Nadu, Chennai, India (On-site)

Defsecone Consulting and Technologies Pvt Ltd

10/2023 - Present

Work Experience

10/2023 - Present

Major Projects

I have conducted several IT security consulting projects, which include vulnerability assessments, penetration testing, mobile application assessments, and red team engagements.

Internal Penetration Testing: Conducted internal penetration testing for the oil and gas industry and identified various vulnerabilities that may lead to remote code execution, authentication bypass, sap_Igs(server)_xmlchart_xxe, etc.

Web Application Penetration Testing: Conducted penetration testing of web applications for the oil and gas industry and banking and healthcare sector clients.

Mobile Application Penetration Testing: Performed mobile application assessment for various clients and successfully bypassed defence controls such as root detection/ssl pinning, etc., of and identified session management flaws as part of dynamic analysis. Conducted static analysis on client-side apk/ipa files to identify misconfiguration and sensitive client-side information.

Configuration review: Developed security baseline scripting for various technologies such as Windows, Linux, Databases, firewalls, etc., and performed analysis on the collected results as per industry best practices and standards such as NIST, CIS, DoD, etc.

Source code review: conducted source code review using industry-leading software such as Checkmarx and Fortify; also conducted manual review to eliminate false positives.

Forensic Analysis: Performed forensic analysis and identified indicators of compromise for ransomware-infected clients. Conducted endpoint analysis post of collection of system dump, which includes memory, file system, processes, services, system logs, etc. Analysed firewall logs to identify various intrusion attempts and indicators of compromises.

Education

Bharathiar University

Coimbatore, Tamil Nadu, India

M.Sc Cyber Security

08/2021 - 05/2023

Periyar University

Salem, Tamil Nadu, India

B.Sc Computer Science

08/2018 - 05/2021

Skills

- VAPT
- operating system: kali linux, Unix, windows, Parrot

- Network Security
- Penetration Testing
- Mobile Security Pen-Testing (iOS and Android) SAST, DAST
- Tools: Burp Suite Pro, nmap, metasploit, Nuses, Wireshark, Qualys, Checkmarx, Nipper.
- API Security Testing
- MITRE ATT&CK Framework, OWASP ASVS, OWASP, ISO 27001
- Network Architecture, Technology Management
- TCP/IP, IDS/IPS, Routers, Switches
- Fast Learner
- Vulnerability Assessment
- Web Application Security Assessment
- Configuration Review
- Source code review
- Python, Shell, PERL, C++, JavaScript, HTML,
- Wireless penetration testing
- Cyber Threat Management
- Communication Skills
- Critical thinking and problem solving
