

KAVINRAJ M

+91- 6369324436 - kavinraj.masilamani@gmail.com - <http://kavintech.blogspot.in>

Summary:

- Software Developer with 2 years of experience - Proficient in C#, WPF, MVC, MSSQL, React, and Node.js, with a proven track record of delivering robust software solutions in a dynamic industry environment.
- Free / Libre, Open-Source Software and Generative AI enthusiast
- Aspiring to excel as a software engineer in development. Seeking a reputable organization where I can leverage my skills, continue to grow, and master new technologies in the field.

Technical Skills:

Languages Known	: C#, MVC, TypeScript, ReactJS, NodeJS, Unit test
Frameworks	: .NET, ASP.NET, Express JS, Entity framework
Database	: MySQL, SQL Server, TypeORM , Stored Procedure
Web Technology	: HTML, CSS, JavaScript, web API integration
Operating System	: Installation of Linux and Windows
Development Tools and IDEs	: Ubuntu, Eclipse, Android Studio, Vim, Wordpress(CMS), Wix, Visual, Studio Code, Linux Commands, Postman
Project management tools	: Git, Source tree, Atlassian Jira, Confluence, Agile methodology
AWS Services	: S3, Code commit, ECS, Lambda, SQS, SNS, AWS Developer - Associate
Designing	: Web Designing, Graphic Designs, Portfolio designs, UI Mockup
AI tools	: ChatGPT, BlackBox.ai, ChatGPT Prompt Engineering, AI Artist
Adobe Products	: Photoshop cc, Lightroom, Illustrator, After Effect, Premiere Pro cc
Typing	: 30 WPM

Experience

Total Experience	: 2 years (Jun 2022 - Aug 2024)
Organization	: Jothi Software Pvt. Ltd.
Designation	: Software Engineer.

Responsibilities:

- Gather requirements around functionality and translate those requirements into elegant functional solutions.
- Design the database for the application.
- As a developer, to build efficient code, refactor and write unit test for the application.
- Execute the application and show functionality demo to the client.
- Setting up the Production environment.
- Deploy the application for production and technical support to the client.

Project Synopsis:

Project 1:

Title	: CampusBooks Adapter (Desktop application)
Client	: Campus books
Stack	: C#, ASP.Net, MVC, MSSQL, S3, Unit test (NUnit)
Deployment Strategy	: Git, Installer (.exe)

Description: Campus books is an online book shop. Customers can order to buy books through website. This website also sells their books in amazon through intermediate ecommerce platform called monsoon. They have import/export inventory and track status in monsoon. Campus upload inventory batch files and it moved to s3. Adapter downloads the inventory files from s3 bucket. After download it compare the inventory already exists in monsoon database if it there means create modify file not there means create add file. Then import inventory to monsoon update the quantity of inventory in monsoon. While importing if have any error means to retry that file again based on error. After imported successfully, inventory file uploaded to AWS s3.

Roles and Responsibilities:

- Gather requirements around functionality and translate those requirements into elegant functional solutions.
- As a developer, to build efficient code, refactor and write unit test for the application.
- Execute the application and show functionality demo to the client.
- Deploy the application and necessary stuffs in client machine
- Technical support to the customer and monitor the working functionality.

Project 2:

Title : COMS - Order Management System (Desktop application) UI and Adapter, WPF

Client : GMG Ventures (www.go-fast-parts.com), <https://motorstate.com>

Stack : C#, .Net, MSSQL, Unit test (N Unit), Motor state API, endpoint creation, Swagger, Stored Procedure.

Deployment Strategy: Git, Installer (.exe)

Description:

UI (WPF): COMS is an Order Management System. In UI have options to view New Orders, customer can approve/cancel the orders through UI. After the approved order, vendor give shipment confirmation file to import after import order status will be go to shipped. Then vendor will give invoice file for the order. In UI Approve/cancel, shipment, invoice only can do.

Adapter: Adapter have separate jobs, we have schedule jobs based on timings. Import orders from Monsoon, after approve and ship the orders sync the orders status to monsoon. Coms customer have web API also for get price, give shipment, invoice, inventories. Using motor state API get method to get product prices, post orders to motor state website, and fetch quantities to update the inventories.

Roles and Responsibilities:

- Add one more vendor in application.
- Implement the order process functionality using their API, to get and post orders and schedule jobs in timings.
- Deploy the application and necessary stuffs in client machine
- Technical support to the customer and monitor the working functionality.

Project 3:

Title : Gardner's InventorySync - Inventory Management System (Adapter)

Client : The Monster Bookshop

Stack : C#, .Net, MSSQL, Unit test (N Unit), threading, Parallel Programming

Deployment Strategy : Git, Installer (.exe)

Description: Gardner's Inventory sync is an inventory file processing adapter. This adapter acts like as a bridge for Monsoon and Gardner's Inventory application. We have two files one from supplier one from seller. Compare supplier file with seller file if supplier have inventory but seller not have inventory means create add file. Another one is Compare seller inventory with supplier inventory if seller have inventory but supplier not have inventory means create delete files and import file to update the inventories.

Project 4:

Title : EHubInventoryExchange (Adapter) – Export Inventory
Client : The Monster Bookshop
Stack : C#, .Net, MSSQL, Unit test (N Unit)
Deployment Strategy : Git, Installer (.exe)

Description: EHub inventory Exchange adapter is an inventory export system. This adapter bridges monsoon and eHub Application, adapter will pick and process the inventory which is modify, listed delisted in monsoon. Export those inventories and update the inventory status in monsoon. Ehub took those inventories and process for their needs.

Project 5:

Title : Monsoon
Client : <https://monsooninc.com>
Stack : C#, .Net, MSSQL, Unit test (N Unit)
Deployment Strategy : S3, Git, Installer (.exe)

Description: Monsoon is an ecommerce platform, helps merchants effortlessly manage orders, inventory, and fulfillment, as well as sell more products to more customers, more often through online markets like Amazon, eBay, Walmart, Alibris, Abebooks etc. In that I have worked in made transactions for Orders to get order details based on condition, category calculate the price as transactions store in database.

Project 6:

Title : Customer Manager – Release manager(module)
Client : Customer Portal
Stack : Nodejs, Postgres, Unit test (jest Unit)
Deployment Strategy : Git, cloud formation

Description: Worked in single module. Customer manager have Release manager and Version manager UI, for that create endpoint fetch the data from database to list, update and add in UI.

Project 7:

Title : Cubedots (Internal CRM)
Client : <https://www.cubedots.com>
Stack : ReactJS, NodeJS, AWS
Deployment Strategy : CloudFormation, Git, Lambda

Description: Cubedots is a Turkish real estate market with technology. This website have CMS portal and Agent portal. In CMS (Content Management System) portal admin can post new projects and manage existing content like apartment units, square feet, rooms available. CMS also have an

option as CRM, it helps for customer and agent to record and manage their meetings, sales, calls, opportunity. CRM have many roles like Admin, Sales officer, Management, Call manager. List the records based on roles and permissions.

Educational Qualification:

- 2020 - 2022 : **MCA (Full time)** - Alagappa University, Karaikudi : 8.70 (CGPA).
- 2017 - 2020 : **B.Sc(Computer Science)** - Srimad Andavan Arts and Science College, Tiruchirappalli - 9.04(CGPA)
- 2017 - 2018 : **Diploma(Smart Device Programming)** - Srimad Andavan Arts and Science College, Tiruchirappalli – 8.83(CGPA)
- 2016 - 2017 : **HSC** - St.Ignatious Matric Hr.Sec School,Vellakulam: 75.75%
- 2014 - 2015 : **SSLC** - Holy Cross Matriculation School, Alangudi, Pudukkottai : 93%

Certifications:

- Passed in JUNIOR GRADE(English) Typewriting April 2019 with First Class - 30 WPM.

Amazon Web Services (AWS)

- AWS Certified Developer - Associate
