

Kavyashri Shetty

Quality Assurance Analyst

Experienced Quality Assurance Analyst with 3+ years in manual testing and 2 years in automation testing. Skilled in creating, executing, and managing test cases for web and mobile applications using Cypress, Jenkins, JavaScript, and Git. Known for enhancing test efficiency and accuracy, reducing critical defect leakage, and ensuring timely releases. Seeking to contribute expertise in delivering high-quality, reliable software products.

WORK EXPERIENCE

Quality Assurance Analyst Emisha Engineering and Business Solutions

08/2021 - Present

Bangalore

Achievements/Tasks

- Developed automated test scripts with Cypress and JavaScript, reducing regression testing time by 30%.
- Enhanced data quality by designing and implementing functional, regression, integration, and automation test plans.
- Collaborated with cross-functional teams, improving defect resolution time by 25%.
- Transitioned manual test cases to automation, resulting in more consistent and reliable testing outcomes.
- Integrated automated testing with Jenkins for continuous integration (CI), enabling early defect detection and faster feedback cycles.
- Utilized Git for version control, managing code repositories and ensuring smooth collaboration among team members.
- Executed SQL queries to validate data integrity and accuracy within the application databases.
- Participated in daily stand-ups, sprint planning, and retrospectives as part of the Agile/Scrum methodology.

KEY TECHNICAL STRENGTHS

Workplace/Company

Achievements/Tasks

- Proficient in developing and maintaining automated test scripts using Cypress and JavaScript, improving test efficiency and reducing manual effort.
- Skilled in identifying, tracking, and prioritizing defects, and collaborating with development teams for timely resolution.
- Strong focus on test planning, test coverage optimization, and performance enhancement to improve overall software quality.
- Strong analytical skills

EDUCATION

Master of Science in Statistics Mangalore University Mangalagangothri

2018 - 2020

INTERESTS

Travelling , Gardening

SKILLS

Technical Skills: Cypress, JavaScript, Jenkins, Git, HTML, SQL, Cucumber, Postman

Testing Expertise: Automation Testing, Manual Testing, API Testing, Functional Testing, Agile Testing

Soft Skills: Problem-solving, Communication, Team Collaboration

PROJECT WORKED ON

BUVI – Supply Chain Management (08/2021 - 09/2022)

- Conducted thorough manual testing to ensure seamless integration of business functions within the supply chain platform.
- Executed test cases and documented results to validate system behavior, identifying and reporting critical issues.
- Collaborated with development and business teams to troubleshoot and resolve defects, ensuring high-quality product delivery.

TMS-Ticket Management System (08/2021 - 03/2022)

- Performed manual testing on the Ticket Management System, validating end-to-end processes to improve machine fault response times.
- Created test cases and executed functional tests to ensure operators and maintenance personnel receive timely alerts.
- Worked closely with the support team to address usability and performance issues, enhancing system reliability.

Delval Flow Controls (11/2021 - Present)

- Developed and executed automated test scripts in Cypress to streamline regression testing, reducing test cycle time by 30%.
- Conducted manual testing for new features and enhancements, focusing on functionality and user experience.
- Integrated test automation into the CI/CD pipeline using Jenkins, ensuring consistent and reliable testing in each release cycle.

RMS -Rwanda Medical Supply (07/2024 - Present)

- Collaborating with cross-functional teams to define test strategies and requirements for the Rwanda Medical Supply platform
- Setting up initial testing environments and developing test cases for core functionalities in alignment with project goals.
- Initiating manual testing efforts on critical modules to ensure smooth integration of medical supply processes.
- Planning and beginning development of automated test scripts for regression and functional testing to streamline future testing cycles.
