EDUCATION

IIT MADRAS

MECHANICAL ENGINEERING B.TECH

2020 - 2024

Chennai ,Tamil Nadu

BHASHYAM JUNIOR COLLEGE

XII

2018 - 2020

BHASHYAM HIGH SCHOOL

X

2017 - 2018

EXPERIENCE

FIN CLUB IITM | ALPHA RESEARCH PROJECT

07/23 – 10/23

- Contributed to a project aimed at understanding and analyzing alphas, involving prediction of market movement
- Developed advanced expertise in alpha research, adeptly combining and evaluating alphas across market conditions.
- Leveraged programming skills in Python, data handling with Pandas, and fundamental concepts like K-Means Clustering
- Proficiency in discerning robust alphas through analysis of correlations across various timeframes and volume dynamics.

BITWISE ACADEMY | DATA SCIENCE INTERN

05/23 – 08/23

- Developed an optimal student-teacher matching algorithm considering student preferences to assign the top 3 teachers, integrating software development best practices by going through many challenges
- Designed an XGBoost algorithm, exceptional R2 scores of 0.95 (training) and 0.87 (testing), surpassing prior models.
- Created a web application using Flask, deployed via Docker image, and optimized functionality through RabbitMQ
- Demonstrated expertise in project planning, staying current with industry trends, conducting code reviews

SKILLS

PROGRAMMING LANGUAGES

LIBRARIES/Frameworks

TOOLS / PLATFORMS

DATABASES

C++, Python, Html, CSS, C#, Javascript

Django, Flask, scikit-learn, pandas

Git, Vs code, sublime text

Mysql, SQL, Postgresql

PROJECTS / OPEN-SOURCE

SPAM DETECTOR

Django Restframework,Python

- Developed a RESTful API for a contact search system enabling users to search by name or phone number, with features for sorting results by relevance and providing spam likelihood based on historical data.
- Implemented user authentication and role-based access control to restrict sensitive information like email visibility to users in the target's contact list.

- Optimized database queries and filtering logic using Django ORM and advanced query techniques to handle large-scale user profiles efficiently.
- Ensured seamless integration with mobile front-end applications by providing well-documented endpoints and adhering to RESTful standards.

FLIGHT BOOKING SYSTEM

- Developed a C++ flight booking system with dynamic data handling and efficient passenger ticket booking functionality.
- Implemented a linked list data structure for flight management, improving search efficiency and booking processes.
- Enhanced coding proficiency and data accuracy, optimizing automated aviation operations for better performance.

MAZE SOLVER

C++,BFS - Algorithm

- Engineered a C++ maze solver using the Breadth-First Search (BFS) algorithm to navigate matrix-based mazes efficiently.
- Implemented neighbor identification and level tracking with coordinate structures, demonstrating algorithmic skills.
- Demonstrated strong problem-solving and coding skills, effectively overcoming obstacles for comprehensive pathfinding

TASK MANAGEMENT SYSTEM

Django,Html,CSS,Python

- Developed a task management system using the Django framework, implementing full CRUD operations for task management.
- Integrated user authentication, including registration, login, and logout, utilizing Django's built-in authentication system.
- Designed responsive, user-friendly HTML templates with Django template language to enhance the user experience.
- Optimized database queries for efficient data handling and interactions.
- Created dynamic forms and views to facilitate seamless task creation, updates, and deletions.

TEXT GENERATION USING GANS

- Designed a GAN model for text generation, focusing on extracting underlying patterns and structures from input dataset.
- Executed data enrichment by applying preprocessing techniques and harnessing of Word2Vec embeddings.
- Utilized LSTM networks for generator and discriminator roles, capturing contextual info and long-term dependencies.

INTERIOR DESIGN WEBSITE

HTML,CSS

- Designed an appealing webpage using HTML and CSS to showcase various interior design concepts.
- Implemented responsive design techniques to ensure optimal display across different screen sizes, improving user experience.
- Developed interactive features such as a navigation bar and buttons to enhance user engagement on the Design Website project.
