Skills

Databases : Oracle, PostgreSQL, MsSQL , MySQL NoSQL : Mongo, Cassandra Cloud : AWS / GCP - RDS, S3, Ec2, GCP CloudSQL, AWS DMS/SCT Automation : Shell, Ansible

Honor's & Reward's

2019 - Q4 Best Performer NCR

2013 - SHELL Cloud Services

2012 - Feather in my Cap Wipro

Education

Master's in CS
St'Joseph's College
Osmani University
Hyderabad, INDIA

About Me

I am a seasoned DBRE Specialist proficient in provisioning, installing, configuring, operating, and maintaining Oracle and also PostgreSQL, MSSQL, NoSQL database software and infrastructure. My expertise extends to both AWS and GCP, and I possess comprehensive knowledge of their features and functionalities. Excel in managing both RDBMS and NoSQL databases, both on-premises and on the Cloud, and I am dedicated to ensuring database standardization, automation, and resilience. Furthermore, I possess a deep understanding of service level objectives and leverage my domain knowledge to anticipate capacity needs.

Professional Experience

Claranet | Sr Database Admin | 2022 – Present

Key responsibilities:

- Good Experience in Oracle 9i, 10g, 11g, 12c, 19c Databases, RAC, Oracle Goldengate.
- Familiar working with Exadata, trained at Oracle corp Hyd. Experiences in installation, configuration, performance tuning and troubleshooting Oracle Goldengate.
- Experience in setting up Oracle Goldengate active-to-active and active-to-passive data replication.
- Experience working with Oracle RMAN backups, restores and recovery.
- Involved in database design and capacity management for new setups and implementations.
- Participated in daily standups and sprint review meetings.
- Coordinated monthly maintenance tasks with different teams and provided DBA support.

FPT Software | Sr DBA Lead | 2021 – 2022

Key responsibilities:

- Automated database maintenance tasks, reducing manual effort.
- Designed scalable database architectures for cloud-native applications.
- Conducted performance analysis and optimization for AWS databases.
- Managed database replication and failover configurations for high availability.
- Provided technical guidance to junior team members and collaborated with AWS support for issue resolution.
- Stayed updated with the latest AWS services and features for database management.

NCR Corp | Sr Cloud DBA | 2018 – 2021

Key responsibilities:

- Set up, manage, update PostgreSQL databases on Amazon RDS. Conduct regular backups and implement disaster recovery plans.
- Plan & execute database upgrades and migrations.
- Experience with database security, backup, and recovery strategies.
- Create documentation for configurations, procedures, and troubleshooting.
- Conduct pre-migration, cutover, and post-migration activities, Validate test results after migration.
- Migrate on-premise database workloads to AWS/GCP.
- Ensure infrastructure readiness.

Oracle Corp | Principal DBA | Hyderabad | 2016 – 2018

Key responsibilities:

- Collaborated with clients such as Facebook, AddThis, and BlueKai to ensure successful project implementation and delivery.
- Set up, manage, and update Oracle databases.
- Stay current with Oracle and other database developments for best practices.
- Monitor and enhance database performance, including tuning queries and indexing.
- Familiarity with AWS services and infrastructure.
- Ability to work well in a team or independently.
- Ability to take on and streamline complex orchestrations and deal with ambiguity.

Value Labs | DBA | Hyderabad | 2013 – 2016

Key responsibilities:

- Primary contact for offshore IKEA Database servers.
- Responsible for database design, build, and implementation of IKEA pre- production and production servers.
- Provision, install , configure, deploy , build databases Setup DR , HA database systems for test, pre-prod, prod

Wipro | SE Bangalore | 2011 – 2013

Key responsibilities:

- Worked as Senior Oracle, PostgreSQL DBA specialist to manage, develop and support Oracle and SQL DBs.
- Setting up new database environments on-prem and Cloud Responsible for developing and managing the Database service relationship with large accounts.
- Monitor, manage , patch all database systems ensuring 24/7 uptime

Professional Summary :

- Managing Oracle, PostgreSQL, MsSql, Mongo and Cassandra databases, ensuring optimal functionality and performance.
- Good Experience in Oracle 9i, 10g, 11g, 12c,18c,19c Databases, Goldengate Bi-Directional replication DR Setup implementation for Citi Bank
- Ensure infrastructure readiness and configure migration tools.
- Conduct pre-migration, cutover, and post-migration activities.
- Validate test results after migration.
- Migrate on-premise database workloads to AWS/GCP.
- Act as SPOC for implementing and maintaining best practices for project-level database management.
- Lead, mentor, and provide support for mission-critical applications for offshore DBA team. Participate in code reviews, certify in-house applications for each release, and ensure best practices are followed.
- Well-versed in the features and functionalities of AWS and GCP Cloud Services for optimal performance.
- Set up databases in AWS, Google Cloud, and configured backups to S3 buckets.
- Automate repetitive tasks using Ansible playbooks, Terraform, and work towards SRE automation of the team.
- Design automated Disaster Recovery and Security Management operations for database infrastructure.
- Monitor performance using cloud metrics and ensure backups meet business recovery objectives.
- Optimize processes to reduce logical disk I/O and increase server configuration changes for performance tuning.
- Successfully perform major upgrades, implement backup tooling and perform recoveries for database maintenance.
- Experience performing major upgrades, implement backup tooling and perform recoveries. Experience as PostgreSQL DBA with a deep understanding of PostgreSQL architecture Performing analysis to make sure we are not under or over provisioning our database clusters.
- Proficiency in PostgreSQL database management: monitoring, maintenance tasks, upgrades, implementations, code deployments Controlling and monitoring user access to the database.
- Experience designing and building environments on AWS, which includes working with services like EC2, RDS, Aurora, DMS, S3, IAM, CloudWatch.
- Database monitoring, DB automation, HA DB environment, production database testing.
