PROFILE SUMMARY

- Experience in Alteryx platform, and involved in data preparation, data blending, and the creation of data models, data sets using Alteryx designer.
- Data Transformation and Analysis by Alteryx, SQL, Tableau by extracting, cleaning, and analyzing large datasets. I apply transformation rules, ensuring data accuracy and consistency.
- Involved in reviewing business requirements and analyzing data sources from Excel, Oracle, SQL Server for design, development, testing, and production rollover of reporting and analysis projects within Tableau.
- Strong experience in building workflows perform data mining that must include writing complex querying using Alteryx.

WORK EXPERIENCE

Data Analyst

Nov 2021 - Present

LTI MINDTREE

Manage the assignment of specific responsibilities relating to project by coordinating with peers within the team for relevant roles and job functions.

Capable of optimizing Alteryx workflows for efficiency and performance. Experienced in troubleshooting and debugging Alteryx workflows to ensure data accuracy.

Able to create visually appealing reports and dashboards using Alteryx. Skilled in integrating Alteryx workflows with other BI tools like Tableau or PowerBI.

Proficient in utilizing Alteryx Server for collaboration and scheduling workflows.

Experienced in developing predictive models and machine learning workflows in Alteryx.

Knowledgeable in version control and best practices for Alteryx workflow management.

Capable of designing automated data validation processes in Alteryx. • Designed Alteryx data flows to convert business requirement into architectural flows.

Perform end to end Data validation to maintain the accuracy of data sets. Translate business logic from one system (Excel, SQL, etc.) into Alteryx in a quick and accurate manner.

Automate manual data adjustment processes by using various Data Wrangling Tools (Alteryx).

Optimize ETL Process and Develop and optimize ETL processes using Alteryx for loading data into data warehouses or other target systems.

Creating and developing Tableau Dashboards based on application requirements and business process expectations. They are regarded as the experts in communicating with business stakeholders, gathering needs, and developing efficient Business Intelligence (BI) solutions and analytics dashboards.

Recognize business requirements and devise a solution to meet data requirements.

Collaborate with IT teams and business experts to implement data-driven policies and initiatives throughout the enterprise.
Ability to design engaging and interactive business insights dashboards using Tableau and possesses the knowledge and experience on data visualization best practices, with a focus on enhancing user interaction and user experience.

PROJECTS

Data Analytics and Visualization Services

Sep 2023 -Present

This coordinates closely with bank Enterprise Resiliency Office, which aligns, centralizes and integrates disciplines and capabilities to deliver timely and effective incident identification, impact assessment, escalation, communication and resolution to provide clients with superior service and deliver resilient world-class products and services.

Responsibilities:

- Ensure data quality, accuracy, and consistency throughout the ETL pipeline.
- Performance Tuning methods like Identify and address performance issues within Alteryx workflows, optimizing for speed and efficiency.
- Document Alteryx workflows, data integration processes, and ETL procedures for future reference and knowledge sharing.

Building Alteryx workflows to implement business logic to create data source for dashboards and visualization.

Interacting with stakeholders for requirement gathering and creating Business Requirement, Technical standards and Test case documents.

Identity Management Services -IDMS

Nov 2021-Aug 2023

To monitor its performance and efficiency. Insurance metrics can help a company identify areas of operational success, and areas that require more attention to make them successful. These KPIs are often used to compare companies in the insurance industry against each other to see which would be a better investment.

Responsibilities:

Expertise in designing and creating various analytical reports like Performance Dashboards, Score cards and Metrics to help users to identify critical KPIs and facilitate strategic planning.

Strong understanding of advanced Tableau features including calculated fields, parameters, table calculations, row-level security, joins, data blending and dashboard action.

Involved in troubleshooting of performance issues which were associated with Tableau reports.

Involved in administration tasks such as publishing workbooks, setting permissions, managing ownerships, providing access to the users and adding them to the specific group and scheduled instance.
