Objective

To work in a challenging environment through which I can utilize my skills and knowledge for the development of the organization and in turn my career.

Summary of Experience:

- Having 2+ years of experience in Mainframes Technology and Open Text Exstream.
- Have good knowledge on Mainframes by using COBOL, JCL, VSAM, DB2 and Stream Weaver (REXX).
- Experience in OpenText Exstream, Communication Builder, Control Centre.
- Operated with the standard and Guidelines proposed by the Design and Architecture practice.
- Used advanced concept like complex tables, section/paragraph, barcodes, multiple up, search keys, Design layer, language layer, Tag set.
- Worked in both batch and online process.
- Worked on different kinds of driver files, reference files, and report files.
- Currently working for Publication solution Delivery team in generating highly personalized Documents for customers of US based HealthCare industry.
- Hands on experience in handling the tools such as ENDEVOR, SPUFI, FILE MANAGER and FILE-AID
- Have showcased consistent performance in On-time delivery of business needs with Quality.
- Good analytical, programming and testing skills.

Working Experience:

Worked as Software Developer at IBM, Bangalore from July 2022 to Oct 2024.

Educational Qualification:

Completed BACHELOR OF ENGINEERING from REVA UNIVERSITY, BANGALORE.

Technical Skill:

Operating Systems	Z/OS, Windows.
Language	COBOL, JCL.
File Organization	VSAM, PS, PDS.
Database	DB2
Utilities/Tools	ENDEVOR, SPUFI, OPENTEXT EXTREAM, COMMUNICATION BUILDER,

Project - 1:

Team – Publication Solution Delivery	
Project Name: Credentialing Letters	
Client	Elevance Health
Role	Team Member
Organization	IBM
Team Size	6
Languages & Tools:	JCL , COBOL, OpenText Exstream 16.4.5, OnDemand

Description:

Elevance health is an American health insurance provider. It is services include medical, dental long-term care. Elevance health requested PSD to rebrand changes. Credential letters letters which must be printed and archival. Data should be stored in PHUB table.

Our application Cred_System_Letters and Cred_Design_Letters will generate letters and process from Exstream to mainframe where mainframe will do address cleansing, balance condition and will load to print and OnDemand.

We include dot net team to add UUID value for each customer so they can check in recon view whether records are archived in recon table.

Roles and Responsibilities:

- Coordination with Onshore in requirement and data analysis.
- Involved in developing the letters as per business requirement.
- This is one of the major applications which involves all three technologies.
- Worked on creating both Batch and Online process of this application.
- Generated multiple outputs (AFP, Recon report, PDF).
- Worked on preparing test case and scenarios from functional requirements.
- Responsible for the release activities and code deployment.
- Involved in unit, regression and integration testing.
- Responsible for code review and bug fixes

Project#2	PICOM CCA CSBD LETTERS (Client – Elevance Health)
Technology	JCL , COBOL, STREAM WEAVER, ENDEVOUR, ONDEMAND. OPEN TEXT EXSTREAM (16.4 & 22.3),
Team Size	10
Duration	Oct 2023 to Mar 2024
Company	IBM
Role	Software Developer

Description:

Elevance health is an American health insurance provider. It is services include medical, dental long-term care. Elevance health requested PSD to create new CCA letters which must be printed and archival. Data should be stored in PHUB table.

Our application PICOM_CCA_LETTERS will generate letters and process from Exstream to mainframe where mainframe will do address cleansing, balance condition and will load to print and OnDemand.

We include dot net team to add UUID value for each customer so they can check in recon view whether records are archived in recon table.

Responsibilities:

- Analyzing the Requirement and preparation of design document (TDD).
- Developing the programs as per the design document requirements.
- Code the document as per requirement document in static level in designer.
- Preparing mapping sheet and creating variables, formulae variables.
- Created BAR code sheet based on Claim number.
- Generated multiple outputs (AFP, Recon report, PDF).
- Created 4+ new printing jobs and scheduled for batch processing.
- Worked on preparing test case and scenarios from functional requirements.
- Coding, Self-reviewing and performed unit test.
- Responsible for the release activities and code deployment.
- Involved in unit, regression and integration testing.
- Responsible for code review and bug fixes
- Successfully implemented the pilot phase without any issues.
- Testing the developed programs as per the effective unit test plan.
- Participate in team and status meetings.

Project#3	W2 FORM-C and 1095-C FORM (Client – Elevance Health)
Technology	JCL , COBOL, STREAM WEAVER, ENDEVOUR, ONDEMAND.
Team Size	6
Duration	July 2022 to Oct 2023
Company	IBM
Role	Software Developer

Description:

Elevance health is an American health insurance provider. It is services include medical, dental long-term care. Elevance health requested PSD to create new IRS FORM which must be printed and archival. Data should be stored in PHUB table.

Our application IRS_FORM will generate letters and process from Exstream to mainframe wheremainframe willdo address cleansing, balance condition , Verimove process and will load to printand OnDemand.

We include dot net team to add UUID value for each customer so they can check in recon view whether records are archived in recon table.

Responsibilities:

- Analyzing the Requirement and preparation of design document (TDD).
- Developing the programs as per the design document requirements.
- Code the document as per requirement document in static level in designer.
- Preparing mapping sheet and creating variables, formulae variables.
- Generated multiple outputs (AFP, Recon report, PDF).
- Worked on preparing test case and scenarios from functional requirements.
- Coding, Self-reviewing and performed unit test.
- Worked on Documentum and Recon file creation.
- Responsible for Code support functions and documentation.
- Involved in Unit testing.
- Supported SIT and UAT.
- Responsible for the release activities and code deployment.
- Testing the developed programs as per the effective unit test plan.
- Participate in team and status meetings.

Value Adds:

- Lot of appreciation on successful implementation on mandate projects.
- Recognized many a times as “Associate for the Month.”
- Involved in Snow Creation, JIRA ticket Update, and SNOW ticket review
- Involved as Release Co-Ordinator to ensure all release tasks are on track.
- Active participant in team activities.
