EXPERIENCE

YoZu

Cloud Engineer

May 2024 – Present

Mumbai, India

- **Designed and Implemented real-time performance dashboards with Grafana**, enhancing server performance visibility and allowing for immediate adjustments that improved resource utilization.
- Implemented containerization using **Docker technology**, accelerating the application release process by **25%** while optimizing resource allocation and minimizing downtime during routine updates for increased team productivity.
- Conducted resource audits, **eliminating redundant servers and unused volumes**, significantly lowering operational costs and enhancing infrastructure efficiency.

YoZu (Uniqbit Pvt Ltd) | (Internship)

Data Engineer

Aug 2023 – Apr 2024

Mumbai, India

- **Developed and integrated Streamlit dashboard** to convert raw data into actionable insights, improving analytics team's response time to market shifts by **40%**.
- **Automated deployment processes with CI/CD pipelines**, increased workflow efficiency by **25%** and decreasing manual deployment errors.
- **Initiated a comprehensive audit of cloud resource usage**, leading to the identification and elimination of wasteful practices that improved operations, resulting in significant annual savings on infrastructure costs.

EDUCATION

Vishwakarma Institute of Information Technology

B.TECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE - 8.7 - CGPA

Jan 2022 – May 2024

Pune, India

Sanjivani K.B.P Polytechnic

DIPLOMA COMPUTER TECHNOLOGY - 91.09 - %

Aug 2018 – Apr 2021

Kopergaon, India

PROJECTS

Automated Deployment Pipeline 🔗 | Jenkins

Sep 2024

- **Created and Designed a Jenkins pipeline** to automate CI/CD workflows for a TODO application, enhancing code quality through integrated testing and achieving a substantial increase in deployment frequency.
- **Reduced deployment time by 40%** through optimized processes, enhancing release speed, reliability, and minimizing errors.

Data Persistence with Docker Volumes 🔗 | Docker

Sep 2024

- Developed and deployed a Todo application using Docker, solving data loss issues by integrating **Docker volumes for persistent storage**.
- **Ensured data consistency and accessibility across container restarts**, enhancing application reliability and performance.

Infrastructure Automation Setup 🔗 | Ansible

Aug 2024

- Engineered an automated **Ansible playbook** that enhanced NGINX installation and configuration across 6+ servers, resulting in a **40%** reduction in deployment time and ensuring uniformity across all web server setups.
- Optimized infrastructure management, minimizing human errors while ensuring high availability and system uptime.

TECHNICAL SKILLS

Languages: Python, Shell Scripting, MySQL, YAML

Cloud Tools: Jenkins, Ansible, Docker, Terraform, Docker Swarm, AWS, Azure

Monitoring: Grafana, AWS CloudWatch

Security: VPN, AWS IAM, BurpSuite, Nmap, Wireshark, OWASP

Tech/Frameworks: Linux, Git, GitHub, Postman, Jira, Selenium, Agile

CERTIFICATIONS

- DevOps and Cloud - Community
- Securing and Protecting Data in AWS S3 - AWS
- AWS Observability - AWS
- Ethical Hacking Course - Udemy
