

L SURESH, Email: sureshlingam012@gmail.com

BI Data Engineer, Contact : +91 - 9380723518

PROFILESUMMARY:

- Have total 4.9yearsofexperience and 4 years relevant experience as **BI Data Analyst** in working with **Alteryx & Tableau & SQL**
- Build and publish interactive dashboards on Tableau Server. Collaborate with MDM programmers and QA analysts to test, clean, and standardized data to meet the business requirements.
- Experienced in requirement gathering/analysis, design, development, testing, and production of reporting and analysis projects
- Blended and Joined data from multiple databases into one report by selecting primary data and secondary data sources from each database for data validation
- Involved in reviewing business requirements and analyzing data sources from Excel, Oracle, SQL Server for design, development, testing, and production rollover of reporting and analysis projects within Tableau.
- Strong experience in building workflows perform data mining that must include writing complex querying using Alteryx
- Automate manual data adjustment processes by using various Data Wrangling Tools(Alteryx)
- Optimize ETL Process and Develop and optimize ETL processes using Alteryx for loading data into data warehouses or other target systems.
- Ensure data quality, accuracy, and consistency throughout the ETL pipeline.
- Performance Tuning methods like Identify and address performance issues within Alteryx workflows, optimizing for speed and efficiency.
- Conduct performance tuning and troubleshooting as needed.
- Collaborate with cross-functional teams, including data engineers, analysts, and business stakeholders, to understand requirements and deliver effective solutions.
- Document Alteryx workflows, data integration processes, and ETL procedures for future reference and knowledge sharing.
- Building Alteryx workflows to implement business logic to create data source for dashboards and visualization.
- Interacting with stake holders for requirement gathering and creating Business Requirement,
- Technical standards and Test case documents
- Prepare technical specifications and documentation for Alteryx workflows supporting BI reports.
- Write Complex SQL queries on multiple tables using complex joins.
- Design, develop, test, and maintain Alteryx workflows to meet business data integration and analytics needs.
- Implement data cleansing, transformation, and enrichment processes within Alteryx Designer.

EMPLOYEMENTDETAILS

- Working as BI Data Engineer in Tredence Analytics January 2020 to Till Date

EDUCATIONALDETAILS

- B.TECH from Usmania University in 2016, Hyderabad.

PROJECTSUMMARY

Project#1:

Client & Project :Team Based Investment Solutions

Duration : JAN2023– till

Role : BI Data Engineer

Environment : Tableau, Snowflake, Excel, Alteryx, SQL

Description:

Wells Fargo Bank, N.A. ("the Bank") offers various banking, advisory, fiduciary and custody products and services, including discretionary portfolio management. Wells Fargo affiliates, including Financial Advisors of Wells Fargo Advisors, may be paid an ongoing or one-time referral fee in relation to clients referred to the Bank. In these instances, the Bank is responsible for the day-to-day management of any referred accounts.

Responsibilities:

- Understanding business requirement and plan solution to address data needs
- Develop, design, and maintain Tableau dashboards and analytics, Collect, refine, and prepare data for analytics and visualization
- Manage and utilize the Tableau platform to extract meaningful insights from it, Prepare reports using various visualization and data modeling methods
- Define new KPIs and consistently measure in the datasets, Collecting data from various data sources and normalize it, Test and publish dashboards and reports and schedule refresh
- Define access controls and implement security measures whenever required, Drill-down data and prepare reports with utmost accuracy
- Creating wireframes and beta dashboards with a focus on user experience, correctness, and visibility
- Improve overall process in data management, collection, dashboard design, and entire product life-cycle
- Apply algorithms and statistical methods to obtain answers from data
- Solving any data or performance issues related to workbooks and data sources
- Monitoring reports and dashboards and make necessary changes
- Manage Tableau-driven implementations, architecture, and administration
- Actively manage the performance and usability of Tableau to get the desired result

Project#2:

Project Name : Johnson & Johnson Medtech

Client : JnJ MedTech

Duration : Jun 2020 – Jul2022

Role : Tableau Developer

Environment : Tableau,Alteryx

Description:

Johnson & Johnson MedTech innovates at the intersection of biology and technology. With a focus on treating with pinpoint precision in the hardest-to-reach parts of the body, restoring anatomy and reimaging healing, our portfolio of smarter, less invasive, more personalized treatments is addressing the most complex diseases.

Responsibilities:

- Document Alteryx workflows, data integration processes, and ETL procedures for future reference and knowledge sharing.
- Building Alteryx workflows to implement business logic to create data source for dashboards and visualization.
- Interacting with stake holders for requirement gathering and creating Business Requirement,
- Technical standards and Test case documents
- Prepare technical specifications and documentation for Alteryx workflows supporting BI reports.
- Write Complex SQL queries on multiple tables using complex joins.
- Design, develop, test, and maintain Alteryx workflows to meet business data integration and analytics needs.
- Implement data cleansing, transformation, and enrichment processes within Alteryx Designer.
- Expertise in designing and creating various analytical reports like Performance Dashboards, Score cards and Metrics to help users to identify critical KPIs and facilitate strategic planning.
- Strong understanding of advanced Tableau features including calculated fields, parameters, table calculations, row-level security, joins, data blending and dashboard action.

- Involved in trouble shooting of performance issues which were associated with Tableau reports.
- Involved in administration tasks such as publishing workbooks, setting permissions, managing ownerships, providing access to the users and adding them to the specific group and scheduled instances for reports in Tableau Server

Declaration:

I here by declare that the details provided above are true and correct to the best of my knowledge.
