SUMMARY

Tech-Savvy with 3.10+ years experience in COBOL DB2 and Javascript development. Adept at identifying opportunities to enhance the process and develop new features to app functionality. Strong logical, analytical & problem-solving abilities and a passion for delivering high-quality code. Extensive experience primarily in back-end development, with additional experience in front-end development.

SKILLS

Primary Programming Languages: COBOL; **Secondary Programming Languages:** Python | Javascript | CICS; **Databases:** DB2 | MySQL; **Tools & Platforms:** SVN | Jira | WSF | Platinum | Endeavor | VSAM | JCL | ISPF | SYSVIEW; **Other Skills:** Django | AWS Cloud | Gen AI | React | MySQL lite | Unit Testing | Linux | Windows | Code Review | SaaS | Performance Tuning | Scalability | Object-Oriented Programming (OOPs) | Code Optimization;

EXPERIENCE

Capgemini | Associate Consultant

Bengaluru | 28th Jan 2021 - Present

- 3.10 years of professional experience in COBOL-DB2 and Javascript development.
- Trained on the COBOL, DB2, JCL, VSAM, & CICS.
- Came up with the technical design to meet specific user requirements.
- Developed new batches in such a way the code met all the requirements with good performance on execution time and did extensive testing to improve the code to work in all the test cases. Zero or less than 3 minor issues reported on in QAT and UAT.
- Expanded and implemented unit test plans and debugged programs to ensure successful implementation. Documented all code and changes in accordance with organizational standards..
- Consistently embraced a team-oriented approach and demonstrated a rapid capacity to adapt whenever required. Actively engage with the team members to gain insights from their perspectives, thus gaining exposure to various facets of the work.
- Engaged in all the activities of the project from Initial requirement analysis till the production L3 support which gained an experience of all phases of work.
- Built and maintained strong relationships with stakeholders to ensure successful project outcomes.
- Acquired a deep understanding of the functional aspects by reviewing project documents, engaging in in-person discussions, and conducting exploratory research.
- Despite working in an offshore location, actively connected with clients and gained valuable experience in understanding their work culture, thought processes, decision-making processes, communication, and behavior.
- Upskilling with web frameworks such as JavaScript - React, Python - Django

PROJECTS

Domain	Automotive	Product Name	Speeder
Role	Developer	Duration	46 months
Customer	Stellantis/xPSA	Team Size	15

Project Description: Speeder is an application where the main module is Automatic stock replenishment with stock and historical sales data and it has ranges of order types like Stock orders, Stock-mini order and many more. With the main module it has additional modules like Part locator, Logistic advice, referretinals, & Account.

Stellantis: It is a multinational automotive company that designs, manufactures, and sells vehicles, components, and production systems. It was formed in 2021 by the merger of Fiat Chrysler Automobiles (FCA) and the French PSA Group. Stellantis is one of the world's largest automakers.

Key Contributions:

- Designed and developed 5 major evolutions on the application using COBOL-DB2 which contributed to client growth by 40%. Many more minor enhancements which helped in the over improvement in the application by 35%.
- Enhanced operational efficiency through streamlined automation processes, thereby improving deployment efficiency using OPC and reducing errors, filter and faster processing of data.
- Enhanced COBOL-DB2 solutions for optimal architecture, encompassing functionalities
- Conducted regular code reviews and provided training sessions on best practices to the team.
- Created and maintained flow diagrams to maintain routine IT tasks, reducing incident response times by 30%.
- Constructed sort cards for JCL SYSINTRI which catered to new flow of data with existing rules without impacting the functionality.
- Collaborated with cross-functional teams to implement automated solutions for warehouse management.
- Improved performance of the long running night batch by 60%. Monitored system performance and responded to technical issues.
- It delivers 5 significant evolutions with 600+ days of work, generating revenue of over 350,000+ euros.
- Managed client relationships and acted as a liaison between internal teams and clients.

EDUCATION

Visvesvaraya Technological University | BE in Computer Science Mysuru | 2015 - 2019

- Achieved multiple awards in coding competitions, demonstrating proficiency and innovation in software development.
- Served as branch committee member, facilitating effective communication, leadership skills.
- Excelled as a state-level football player, showcasing teamwork on the field.

CERTIFICATION

- AWS Cloud Quest: Cloud Practitioner - November 2024
- Oracle Cloud Infrastructure 2024 Generative AI Professional - 1Zo-1127-24 - July 2024
- AWS Certified Cloud Practitioner - January 2022
- Crash Course on Python an online non-credit course authorized by Google by Coursera - August 2023
- Web Application Technologies and Django authorized by University of Michigan by Coursera - September 2023
- Exception Handling in Python an online non-credit project authorized by Coursera Project Network by Coursera - September 2023
- Python Basics: Create a Guessing Number Game from Scratch an online non-credit project authorized by Coursera Project Network by Coursera - September 2023
- Python for Data Science, AI & Development an online non-credit course authorized by IBM by Coursera - September 2023
- Application Security and Secure Coding Training course in Python Django- February 2023
- Agile Software Development an online non-credit course authorized by University of Minnesota by Coursera - February 2021
