Education:

Course	Year	Institution	Scores
Bachelor of Engineering (Electronics & Communication)	2018	R.M.K ENGINEERING COLLGE, Chennai	8.1(CGPA)
TN State Board (Class XII)	2014	VMHS SCHOOL, Uthukottai	94.16%
TN State Board(Class X)	2012	VMHS SCHOOL, Uthukottai	95%

Projects:

1) Project: QBASE Creation and modification Process

Role: Developer

Description:

Automobile Project where we have automated the Daily\Weekly Issues updates in Qbase system Process in Quality analysis of manufacturing plant, Here Robot need to read the input file from shared folder where 1000's of Test engineer will update project folder and process those data to update as tickets in Qbase system for reference of Design Engineers. Here Robot is running Unattended (24*7) using the RE-Framework.

Roles & Responsibilities:

- Responsible for Requirement gatherings and Requirement Analysis
- Responsible for extensive knowledge transfer documentation for consulting.
- Creating and Maintaining end to end project development.
- Framework setting and Solution designing
- Analyze the feasibility of existing process suitable for automation.
- Involved in all phases of project like Requirement gathering, Documentation, testing, UAT, Deployment

2) Project: Error Recovery Process of PP and MM module in SAP

Role: Developer

Description:

Automobile Project where we have automated the Daily\Monthly Recovery of PP and MM modules in SAP. Here the Robot has to read the Excel input file and Logon to SAP for downloading the error files and recover the process and execute the job again for recovering it.

3) Project: Financial reporting process

Role: Developer

Description:

Finance team will be receiving the files of monthly report for each department. Download the documents from multiple systems (SAP, HFM, Ecom, Cosmos, etc.). Robot has to manipulate those data in given macros and create a new report file. Here, used VB.net and Macros to automate the process.

4) Project: Competitors Car Details Scraping

Role: Techno functional

Description:

Scrap the details of the competitor's car and update the details in structured format. Here, I have used **Enhanced RE-Framework** to control the transaction (3 nested RE-Framework).

5) Role: Infra controller

Responsibilities:

- Responsible for setting up the UiPath Orchestrator.
- Responsible for creating visualization and dashboard in kibana based on user requirement.
- Responsible for monitoring the Robots in Orchestrator.
- Responsible for Robot and Studio setup regarding the license.

Achievements:

- **NISSAN DIGITHON 2nd Runner-up-** Digithon is a Nissan internal hackathon. I have developed a solution for managing the resources in Nissan.

Personal Details:

Date of birth: 02-09-1996

Language Know: English, Tamil, Telugu

Marital Status: Married

Declaration

I declare that above particulars are from my best knowledge and I am always ready to produce the reference. I assure you that I will do my best to serve your organization
