SUMMARY

Passionate Backend developer with a focus on Node.js, eager to contribute to cutting-edge projects. Excited to leverage coding expertise to drive impactful solutions and enhance company operations. Committed to delivering high-quality, efficient code to support the mission of the organization.

EDUCATION

B.Tech in Electronics and Telecommunications Engineering
[Indira Gandhi Institute of Technology](#)
📅 09/2017 - 07/2021 📍 Odisha

CGPA
7.39 / 10.0

EXPERIENCE

Backend Developer

[meracars.com](#)
📅 02/2024 - Present 📍 Kerala, India

- Led the backend team in developing and maintaining high-performance, secure, and scalable web applications using Express.js, ensuring reliable and optimized software solutions.
- Architected RESTful APIs to enable seamless communication between front-end and backend systems.
- Collaborated on MongoDB databases, handling schema design, data modeling, and query optimization to support application functionality effectively.
- Integrated third-party APIs for authentication and payment processing and implemented WebSocket for real-time auction data.
- Automated application tasks using Node Scheduler, streamlining operational efficiency.
- Developed APIs to interface with the Meracars platform, empowering users to sell and assess vehicles before live auction participation.
- Resolved complex technical issues, contributing to application stability and performance enhancements.
- Continually enhanced technical skills by staying informed on industry trends and best practices, supporting team growth.
- Managed backend team to ensure timely project delivery and efficient handling of concurrent requests.

Junior Backend Developer

[AuctionSoftware.com](#)
📅 04/2023 - 12/2023 📍 Chennai, India

- Developed and maintained web applications using Node.js and Express.js to ensure high-performance, secure, and scalable software solutions.
- Utilized HTML, CSS, and jQuery to create responsive and user-friendly front-end interfaces, enhancing the overall user experience.
- Collaborated with the team to design, implement, and maintain MySQL databases, including schema design, data modeling, and query optimization, to support application functionality.
- Designed and implemented RESTful APIs to facilitate seamless communication between the front-end and back-end systems. Implemented authentication and authorization mechanisms to ensure secure access to sensitive data and features.
- Diagnosed and resolved complex technical issues, contributing to the application's stability and performance improvement. Stayed up-to-date with industry trends and best practices to continuously enhance technical skills and contribute to the team's growth.

SKILLS

Server-side

JavaScript	ExpressJs	MongoDB	GIT
GitHub	MySQL	REST API	AWS
Python	Websocket	Nodejs Server	

PROJECTS

EVENT-BOOKING Application

📅 10/2024
🌐 https://github.com/lalatendu65/EventBooking_Backend
Developed a backend system for event booking application using Express.js, MongoDB, and AWS.

- Enabled user accounts to book services, view their booking history, and manage booking.
- Using nodemailer Implement the Email functionality .
- Built an admin panel for service providers to add and update service details.
- Focused on database design for efficient querying and fast data retrieval to enhance user experience.
- Prioritized scalable architecture and security best practices to handle user and provider data securely.

- Gained hands-on experience in building modern web applications using cutting-edge technologies. Developed and deployed web applications, utilizing the following technologies.
- Worked on real-world projects, applying knowledge of the MERN stack to create full-stack web solutions.
- Collaborated with senior developers and mentors to enhance software development skills and best practices.
- Acquired proficiency in creating responsive and user-friendly web applications to improve the user experience.

MeraPartners is a B2B auction application designed for dealers to bid on a wide range of cars. Our backend development leverages Express.js, ensuring robust and efficient server-side operations. We deploy our services on AWS to harness the scalability and reliability of cloud infrastructure.

- **Implemented WebSocket for Real-Time Data:**
Developed and integrated WebSocket to provide real-time updates for auction applications, ensuring users receive live bidding information instantaneously. Implemented OTP (One-Time Password) functionality using MSG91 services, strengthening the login process and providing an additional layer of security for users.
- **Integrated Third-Party APIs for Authentication and Payment Services:**
Successfully integrated third-party APIs to handle user authentication and secure payment processing, enhancing the overall security and user experience.
- **Utilized Node Scheduler for Task Automation:**
Leveraged Node Scheduler to automate various application tasks, such as updating auction statuses and sending notifications, leading to improved efficiency and reduced manual intervention.
- **Created APIs for the Admin Panel:**
Developed comprehensive APIs to enable the admin panel to fetch car data from the evaluator app and monitor live auctions in real-time, facilitating better management and oversight.
- **Developed efficient REST APIs:**
Designed and implemented robust REST APIs capable of handling multiple concurrent requests efficiently, ensuring smooth and responsive application performance.
- **Improved Performance and Optimized Data Handling:**
Focused on performance enhancements by optimizing data handling processes, reducing latency, and ensuring faster response times for a better user experience.

Developing Back-End Apps with Node.js and Express By IBM
