CHENNAI

PROFESSIONAL PROFILE

Oracle Developer with 2 years of experience in SQL and PL/SQL. Skilled in coding, debugging, and query optimization, with a proven track record of creating and customizing database objects. Well-versed in database concepts and best practices.

WORK EXPERIENCE

FREEKYAT SYSTEMS PRIVATE LIMITED

Software Engineer (Apr 2024 - Till now)

BA CONTINUUM INDIA PVT LTD

Software Engineer (Nov 2022 - Mar 2024)

- **Software Analysis, Design, Development, Testing, and Implementation :** Led the full software development lifecycle for web-based applications.
- **Dynamic SQL and Temporary Tables :** Utilized dynamic SQL and global temporary tables for effective data handling.
- **Data Integration :** Created source-to-target mappings and integrated new/modified data streams into data warehouses and data marts.
- **Troubleshooting and Debugging :** Identified and resolved system and data errors; wrote unit tests to ensure application correctness and reliability.
- **Database Design :** Designed database schemas with key constraints to maintain data integrity and relationships.
- **Database Object Creation :** Developed tables, views, materialized views, procedures, and packages using Oracle SQL Developer and SQL*Plus.
- **PL/SQL Development :** Wrote PL/SQL stored procedures, functions, packages, triggers, and views to enforce business rules at the application level.
- **Data Loading :** Loaded data from files into database tables using SQL Loader and external tables.
- **Testing and UAT :** Conducted unit, integration, and system testing; established UAT processes for project modules.
- **Performance Optimization :** Leveraged bulk collection in PL/SQL for performance improvement and utilized EXPLAIN PLAN for query optimization.

SKILLS & EXPERTISE

- | | |
|----------------------|--------------|
| • ORACLE 11G/12C/19C | • JIRA |
| • SQL / PLSQL | • MYSQL |
| • UNIX | • MSSQL |
| • CONTROL- M | • GITHUB |
| • TOAD | • SQL*PLUS |
| • PUTTY | • ETL |
| • SERVICE NOW | • SQL LOADER |

PROJECTS

BANKING DOMAIN | CLIENT : S&T

- Designed and developed database schemas, tables, views, and PL/SQL packages to support critical banking applications.
- Optimized complex SQL queries and PL/SQL code to improve performance, reducing transaction processing times.
- Handled high-volume transactional data with precision, ensuring data accuracy and compliance with banking regulations.
- Automated financial reporting systems using PL/SQL, enabling timely and accurate insights for business stakeholders.
- Implemented database security, including user roles, permissions, and data encryption, to protect sensitive financial data.
- Troubleshoot and resolved database performance issues, enhancing overall system stability and efficiency.
- Conducted data migrations for system upgrades, ensuring minimal downtime and the integrity of banking data.
- Collaborated with cross-functional teams to gather business requirements and deliver scalable database solutions.
- Maintained detailed documentation of PL/SQL code, database structures, and processes, while performing regular code reviews.

HEALTHCARE | CLIENT : MEDTRONIC

- Enhanced PL/SQL functions and procedures for managing health information, ensuring data accuracy and compliance with HIPAA regulations.
- Developed and deployed effective database structures for healthcare applications, enabling smooth storage and retrieval of patient and clinical data.
- Performed optimization of PL/SQL scripts and SQL queries, significantly boosting data processing performance and response times in healthcare applications.
- Led initiatives for data migration to accurately transfer legacy patient data into modern healthcare systems, reducing operational interruptions.
- Created detailed automated reports and dashboards using PL/SQL, providing healthcare professionals with valuable insights to improve patient care and operational effectiveness.
- Identified and resolved database performance challenges and data inconsistencies, guaranteeing ongoing availability and reliability of healthcare systems for medical staff.
- Established security measures and access controls to oversee user permissions in alignment with healthcare data protection standards.
- Compiled comprehensive documentation of database designs, PL/SQL functions, and processes to ensure adherence to healthcare regulations and compliance standards.

EDUCATION

BACHELOR OF ENGINEERING (COMPUTER SCIENCE)

The Gojan School of Business and Technology - 2018 2022
