DATA ENGINEER

Data Engineer and ETL Specialist with 3+ years of experience in cloud platforms like Snowflake, Oracle, and BigQuery. Expertise in data integration, transformation using DBT, and building scalable data solutions. Proactive in delivering high-quality, secure data strategies and collaborating with stakeholders to drive impactful results.

SKILLS

- **Programing and Scripting Languages:** SQL, Python, PySpark
- **Database Tools:** Snowflake, Oracle, Google BigQuery, MySQL
- **ETL Tools:** DBT (data build tool), Talend, Fivetran, HVR, Informatica Cloud IICS
- **Version Control:** Bitbucket
- **Data Engineering:** ETL, CI/CD, Data Modeling, Data Reconciliation
- **Scheduling tool:** Control-M, Airflow
- **Soft Skills:** Problem-Solving, Collaboration, Documentation, Adaptability

EXPERIENCE

INFOMETRY INC.

JAN 2022 – PRESENT

Client: MICHAEL'S STORES

Project Description: Migrated an on-premises data warehouse from Hive to Google BigQuery on Google Cloud Platform (GCP), transitioning from Talend to dbt for streamlined data integration, automated transformations, and pipeline management.

Roles and Responsibility:

- Analyzed Talend jobs and developed DBT models with SQL transformations.
- Loaded data from Amazon S3 to GCS and BigQuery for efficient processing.
- Replicated Oracle data with HVR Fivetran to ensure data consistency.
- Created SQL scripts and reconciliation macros for data validation in DBT.
- Utilized pre-hooks and post-hooks in DBT for validation, logging, and cleanup.
- Employed Git for version control and Control-M for job scheduling.
- Supported CI/CD pipelines for automated DBT deployment and testing.
- Conducted unit testing and supported QA and UAT phases.

Tools/Technology: Talend, Google BigQuery, DBT (data build tool), HVR, Git, Fivetran, Python

Client: CONN'S HOME PLUS

Project Description: Designed a Snowflake data warehouse with masked sensitive data, migrated databases from SAS and SQL Server, and built IICS mappings for multi-schema loads, supporting testing and UAT with customers.

Roles and Responsibility:

- Developed IICS mappings to load data from multiple Snowflake schemas and scheduled executions.
- Created RestV2 mapping for IICS Audit Logs.

- Conducted unit testing and provided QA/UAT support.
- Analyzed session/error logs for troubleshooting tasks and mappings.
- Ensured Snowflake data quality by enforcing naming conventions, removing duplicates, reporting missing fields, validating surrogate keys, and profiling data.
- Designed test cases and scripts to validate data.

Tools/Technology: Snowflake, IICS.

EDUCATION

- Masters in Computer Application 7.5 CGPA
G B Pant Institute of Engineering and Technology Pauri Garhwal 2018 - 2021

CERTIFICATIONS & TRAININGS

- Completed the Intelligent Data Management Cloud (IDMC) Foundation course offered by Informatica
- PC to IDMC Migration Certificate
- Hands-On Essentials - Data Warehouse (Snowflake) [Certification](#)
