

LAXMI NARAYANASWAMY

SUMMARY

With strong foundation and robust background in both business analysis and product ownership, I bring a unique blend of skills which enable me to drive value streams & bridge spaces between business needs and technical solutions to deliver market ready outcomes for both customers and businesses.

My objective is to leverage my expertise & contribute towards building innovative solutions & drive advancements in a dynamic environment.

Passionately driven to continuously refine my skills and advance my growth, I aim to contribute to making my workplace a "Great place to Work"

EXPERIENCE

Assistant Vice President – Business Banking Lending - Ops Technical Strategies, Barclays Global Services - Current

Responsibilities

- Management & development of existing / new products or services, ownership of related customer and colleague journeys.
- Develop product strategies, drive change through governance, make key decisions in the product lifecycle and own associated outcomes for customers, colleagues and the bank, achieved through appropriate SLA's, regulatory compliance, risk management and controls
- Engage with stakeholders across the businesses, involve in data driven decision-making & problem solving, translate service, product and proposition strategy into detailed requirements, bridge the technical and business worlds for the delivery of the service or product
- Involve in continuous improvement strategies – Automations, simplification, efficiency releases, process innovation & re-engineering
- Leading the development and implementation of business lending feature products over digital platform resulting in efficiency saves (Cost to bank, FTE's, simplified customer & colleague journeys)

Achievements

- Spearheaded cross functional team (Technology, Credit Risk, Operations, Product – Proposition, Coverage Service Management, Controls) and attain **£1 billion revenue** within 5 months of AY 2024 by suggesting High Alert tracker built on BIW for fulfilment cases thus aligning to Grow Lending vision
- Project lead to adoption & integration of DocuSign – Digital platform to send / receive Customer correspondences thus reducing journey with **12 day TAT** reduction resulting in seamless **customer** journey, refining **colleague** journey & supports a sustainable **community**
- Submitted a business use-case for an efficiency benefit of ~40 FTE release by mid 2025 through potential areas of automation – Letter Generation, Pre-check validation with native system handshaking with external applications for Fraudulent Checks, KYC Checks etc, Automation of
