## Professional Summary (Associate Software Engineer)

Detail-oriented Software Engineer with 2 years of experience specializing in C# development, .NET Core, and ASP.NET. Skilled in building scalable, high-performance applications and proficient in all stages of the Software Development Lifecycle (SDLC), including requirements gathering, system design, implementation, and unit testing. Experienced in optimizing application performance, ensuring seamless integration with front-end technologies and third-party services. Strong problem-solving abilities, committed to writing clean, maintainable code, and collaborating effectively in Agile teams to deliver high-quality software solutions. Eager to apply my skills in a dynamic, growth-oriented environment.

## Experience

### Finastra

#### Associate Software Engineer (C# Developer)

### Trivandrum, Kerala

October 2022 – Present

- Developed, tested, and maintained core components of the LaserPro loan documentation and origination system using C#, .NET Core, and object-oriented programming (OOP), delivering scalable, high-performance software solutions for the financial services industry.
- Implemented key features and functionality within LaserPro to automate loan document generation, optimize compliance workflows, and ensure regulatory adherence for financial institutions using industry best practices.
- Implemented robust data protection mechanisms (e.g., data encryption, access control) to safeguard sensitive financial information, ensuring GDPR compliance, data security, and alignment with OWASP security standards.
- Collaborated in Agile development teams, participating in sprint planning, daily stand-ups, and retrospectives to track progress, meet project deadlines, and drive cross-functional collaboration across developers, QA, and stakeholders.
- Developed and executed unit tests using Test-Driven Development (TDD) and MSTest, ensuring code quality, robustness, and low defect rates, and maintaining high coding standards in production.
- Managed source code using TFS (Team Foundation Server) and version control practices, collaborating with the development team on TeamExplorer to ensure efficient code management and collaborative workflows.
- Contributed to the creation and maintenance of comprehensive technical documentation, including API documentation, system architecture, and user guides, ensuring clarity, accessibility, and ease of use for both internal and external stakeholders.
- Collaborated with QA teams, business analysts, and product managers to ensure new features met user requirements, regulatory standards, and business objectives, aligning technical solutions with customer needs.
- Played a key role in the successful migration of LaserPro to a SaaS (Software-as-a-Service) platform, collaborating on cloud architecture redesign, optimizing core components for scalability, and enhancing platform performance in a cloud-based infrastructure.
- Mastered FPL, an in-house coding language, showcasing rapid learning abilities and technical adaptability to quickly integrate into development processes and contribute to fast-paced, evolving technical environments.

## Skills

- |                                     |                |                                     |
|-------------------------------------|----------------|-------------------------------------|
| • C#                                | • MongoDB      | • API                               |
| • .Net                              | • NodeJS       | • Problem Solving                   |
| • WPF                               | • Git          | • Written and verbal communication. |
| • MVVM                              | • Docker       | • Critical Thinking                 |
| • Object Oriented Programming (OOP) | • Unit Testing |                                     |

## Education

### BACHELOR OF TECHNOLOGY: COMPUTER SCIENCE AND ENGINEERING

Mar Baselios Christian College of Engineering and Technology

July 2018 – June 2022

- 7.73/10.0 CGPA

### **Awards & Achievements**

---

- Recognized for my contributions to the FinUnified – Unified End User Application project at the TechCon Hackathon, where I demonstrated innovation, explored new technologies, and helped modernize the product.
- Recognized for delivering the SBA LS Norma release on time under tight deadlines, ensuring seamless ETran submissions, and effectively managing additional RFCs introduced before the code freeze, demonstrating strong problem-solving and time management skills.
- Recognized as a key member of the "Haldi" development team for delivering critical SBA form updates ahead of schedule, completing coding and testing in three weeks, and releasing the updates two business days early, providing customers additional time to adopt the changes.
- Recognized for my significant contributions to the SBALS SaaS development, where I proactively took on tasks, quickly learned and implemented solutions, and delivered high-quality results, demonstrating strong problem-solving skills and a positive impact on the team's success in a fast-paced environment.
- Received the FinStart Graduate – Certificate of Achievement for successfully completing the FinStart Development program, demonstrating a strong growth mindset, dedication, and continuous improvement over two years.

### **Declaration**

---

**I hereby declare that all the information mentioned above are true to the best of my knowledge and belief.**
