LUBNA FATHIMA R

Software Engineer-RPA Developer

Seeking a challenging position in automation development where I can share, contribute to, and enhance my knowledge for both personal growth and organizational advancement, I aim to leverage my skills to drive innovation and efficiency.

- Having overall 2 years of experience on development in Robotic Process Automation (RPA) using tools like UiPath and Python Selenium.

Experience

Aug 2022 - Mar 2023

qBotica Artificial Intelligence Services Private Limited

Job Position here - RPA DEVELOPER

Implemented end-to-end RPA solutions using UiPath, developing objects and workflows per client needs. Collaborated with business users to identify requirements and created PDD and SDD documents. Utilized the RE Framework to design, code, test, deploy, and maintain unattended bots. Managed deployment, monitoring, and troubleshooting through UiPath Orchestrator, and conducted unit and integration testing to ensure reliable automation solutions.

Nov 2023 - Present

Droidal Private Limited

Job Position here - RPA DEVELOPER

Developing automation codes using Python frameworks and Selenium. Proficient in test automation and scripting languages such as Python, HTML, and JavaScript. Conducted code reviews, writing test cases for embedded software, and creating automation frameworks to ensure robust and efficient testing processes.

Certification

- **RPA UiPath** - Certified in Basic and Advanced Course at the period of Aug 2022.
- **Python** - Internship in Advanced Python Programming at Shiash Info Pvt Ltd during the period of June 2022 to July 2022.
- **Digital Marketing** - Certified in Digital Marketing at NIIT Foundation period of Oct 2021 to Nov 2021.
- **English Typewriting** - Certified in English Typewriting Senior Grade with First class Distinction, Speed of 45 WPM at the period of Aug 2018.

EDUCATION

- **Master of Science in Information Technology:**

University of Madras | Distance Education | Present

- **Bachelors of Science in Computer Science:**

Mohamed Sathak College of Arts and Sciences | 2019 - 2022 | Grade - 80%

- **HSC:**

MBN Govt Girls Higher Secondary School | 2019 | Grade - 77%

- **SSLC:**

MBN Govt Girls Higher Secondary School | 2017 | Grade - 94%

RESPONSIBILITIES

- **Gathering Requirements:** Collected detailed business requirements from clients for automation projects.
- **Framework Utilization:** Used RE Framework to develop unattended robotic bots with UiPath for automating business processes.
- **Documentation:** Prepared design documents outlining the automation process, including PDD (Process Definition Document) and SDD (Solution Design Document).
- **End-to-End Automation:** Implemented comprehensive RPA solutions using UiPath and Python Selenium.
- **Selectors:** Developed selectors for interacting with window and web browsers, enabling continuous navigation of applications.
- **Image-Based Automation:** Automated interactions with image-based text applications through mouse clicks.
- **Image OCR:** Worked on Optical Character Recognition (OCR) for extracting text from images.
- **Web Recorder:** Used Web Recorder for automating data entry actions in browser applications, utilizing methods like Send Window Messages and Simulate.
- **Scraping:** Employed various scraping techniques to extract data, including screen scraping (native, full text, OCR) from running window applications and data scraping from browser applications or documents into structured formats such as CSV files or Excel spreadsheets.
- **Email Integration:** Interacted with email services (OUTLOOK and SMTP) to retrieve and manage mail messages.
- **Exception Handling:** Managed exceptions using Try-Catch activities.
- **Orchestrator Deployment:** Deployed and configured processes in UiPath Orchestrator, scheduled jobs, and managed bot execution.
- **Testing Collaboration:** Collaborated with test teams during Product Testing and UAT phases to address and resolve bugs.
- **Desktop Automation:** Implemented desktop automation solutions.
- **Python Selenium Automation:** Utilized Python and Selenium for web automation tasks.
- **OCR:** Applied Optical Character Recognition (OCR) for text extraction.
- **SFTP:** Integrated Secure File Transfer Protocol (SFTP) for secure file transfers.
- **File Manager API:** Utilized File Manager API for managing files and directories.
- **Product Team Collaboration:** Worked closely with the product team to develop tools using Python, focusing on building and refining functionalities to meet project requirements and enhance product performance.

Declaration

I hereby assure you that the above given details are true to the best of my knowledge and belief.
