

S.A.Manjunath

Ph: +91-9739924005 **Mailto:** chnsam@yahoo.com | RHCT | ITIL | PRINCE2 | Google GEN AI

PROFESSIONAL SUMMARY: -

22 Plus Years of total IT experience with vast exposure to the IT infrastructure management space Domain expertise on Linux and network platforms and successfully managed multiple projects involving, Release management, implementation and production support. Having extensive subject expertise in datacenter management, IT infrastructure planning (database, server, and network management), IT services management (ITSM), methods, processes, and strategic technology and developing cost-effective solutions to meet customer and business requirements in IT project management. Planning and people management, administration on Linux systems.

Technical Skills: -

Operating Systems: - RHEL 4.x, 5.x, 6.x,7.x 8.0, SUSE, Debian, ubuntu, CentOS, IBM-AIX, Sun Solaris and Windows NT/2000/2003/2007 Server/XP Pro/Vista/7

Hardware: - DELL (Power Edge), HP (ProLiant G7&G8), IBM Blade Centre.

Tools: - Apache HTTP/ Tomcat/Jboss, VERITA Volume Manager, VERITAS Net backup, Cluster server 6.2 &6.1, Nagios, Web Methods, VMware. IPSOFT

Languages: - Shell scripting, Bash.

Networking: - TCP/IP, NIS, NFS, DNS, DHCP, LAN, FTP/TFTP, SSH, SFTP, ARP

RDBMS: - ORACLE, MySQL and MS SQ Net Server

Storage: - LVM, SCSI, SATA, Ext 2, Ext 3, Ext 4, OCFS2 and NAS (NFS, SAMBA, RAID 0/1/5) and SAN (iSCSI, Fiber eChannel).

Network Security: - Fortinet, Linux Iptables, Windows ISA firewall, Cisco 506 -515 E

Ticketing Tools: - Jira, HP ALM

- Experience in Project Management, Team Management and Team Co-ordination
- Decision maker in technical evaluation of products and changes in architecture for capacity
- Experienced in installation of Operating Systems, Packages and Patches, adding Peripheral, maintaining user accounts, System Security, backup/recovery, performance tuning, troubleshooting at various levels.
- Management of User accounts, System security, kernel performance monitoring and tuning.
- Experience on installation of various custom application and support
- Install and manage security reporting tools used to monitor changes to the Active Directory.
- Integration of various network related services like NFS, NIS, and DNS.
- Installation and configuration of Apache, Tomcat / Web logic on Linux. Database Installation includes Oracle, SQL, and MYSQL.
- Monitor Disk space and space as needed in LVMSetup and administration of VERITAS Volume Manager and HA Clusters.
- Troubleshooting skills with network protocols such as DNS, TCP/IP, SMTP, and SNMP.
- Hands experience with ticketing tools such as Remedy and Quick base.
- Configured Kickstart servers for complete hands-free installation of workstations, with custom profiles, begin/finish scripts and custom package suites/clusters.

Professional Experience: -

Wipro Limited, (Technical Architect) Bangalore

Feb 2020 — Oct 2023

Client: ST Micro Electronics

- Plan the release of project deliverables and release life cycle.
- Communicate the project-related tasks such as plans, timelines, requirements, etc. between different teams.
- Coordinate the release schedule and resources required depending upon the third-party applications, defect backlogs, planned releases, and infrastructure updates.
- Identify the risks that can delay the release and manage them, such that the scope scheduled, and quality of the release is not affected.
- Track the progress and find issues, if any. Always work to improve the process of release.
- Make sure that the release is planned, according to the requirements and budget.
- Schedule the release readiness reviews before deployment and milestone reviews after each release.
- Create plans for the implementation and deployment as per the release schedule.
- Plan and give weekly updates on the release activities.
- Make sure the allocation of Release Engineers to every release.
- Communicate with release managers from different IT departments.
- Lead the Go-Live activities to deploy the software successfully.
- Team up with relevant development teams responsible for building the automation tools used to develop and deploy the software.
- Schedule the CAB meetings to discuss the release schedules with the team and find roadblocks, if any.
- Maintain documentation related to procedures on build and release, various notifications lists, and dependencies.
- Make improvements in the methodologies used for configuration management and development of software that helps to find ways to use in configuration management.

Adecco India (Engineering Support – SME)

Dec 2018 – Feb 2020

Client: - T-Mobile

- Provide Telecommunication Discipline expertise in support of the client's team for Engineering Nodes with T-Mobile Mobile Facility.
- Troubleshooting of the Mobile IMSI and MSISDN activation /deactivation issues
- Commission / Decommission of the IMSI and MSISDN
- Able to fully automation SOAP & REST APIs and all UI pages.
- Able to execute tests manually and automatically with appropriate feature tools and regression scripts.
- Supporting for the multiple issues like HLR / BAN / CNTDB / OTA / EIR Through HP ALM and JIRA
- Troubleshooting for Mobile data usage / setting up data bandwidth for the new users
- Setting up the new passed / pin for the MSISDN for the postpaid, prepaid customers
- Coordinating the with multiple teams for the resolution of the issue with Different Engineering Nodes
- Reporting the daily statics to the higher management with automated reporting generating tool
- Provided customer support, help/troubleshoot users to resolve Engineering Node, network, and other system-wide problems.
- Log detail defects to track the issues and report promptly to the development teams and managers.
- Support for the EUI / IAM / rebellion Mobile URLs for login, availability, proxy issues
- Resolving the P0, P2, P3 issues within the SLA and updating to the Teams / Management
- Testing the new Mobile applications and URLs with multiple teams for various bugs / fixes.

IBM India Pvt Ltd, Bangalore
Technical service specialist

Apr 2016 – June 2018

- Provided technical direction, diagnosed technical problems, assisted, and trained personnel.
- Installed, tested, and deployed monitoring solutions with Besclient services.
- Developed and implemented business specifications and solution for large, complex integrations.
- Performed data migration across multiple UNIX/Linux (RHEL/Solaris/IBM Aix) servers, and Windows Servers
- Followed through with customers to ensure proper function of complex systems involved in the functional and technical analysis of the design
- Configured LDAP Server and LDAP Client on Linux machines for authorization and authentication.
- Worked with TCP/IP network configuration. Working experience on WindowsActive Directory and LDAP.
- Install and manage security reporting tools used to monitor changes to the servers.
- Configured Logical Volume Manager which involved create and modify file system, logical volume, Physical volume, Volume groups.
- Performed upgrade on Red hat Linux whenever required. Worked with KVM and Vmware.
- Performed hardware and software installations, upgrades, and maintenance, patch administration, kernel modification/upgrades, file system management, performance and security analysis, and network configuration/tuning.
- Prepared Unix security standard preparation document and system check procedures to keep the systems secured & updated. Backend Solution, Day to day sys Admin & Monitoring, File sys mgmt.& disk mgmt., Wrote UNIX shell scripts for automated installations, to extract logs using Bash.
- Experience with ticketing tool such as Remedy. Taking Snapshots in the environment.
- Responsible for maintaining security on all UNIX system for regulatory compliance.
- Implementation and troubleshooting of network services like NFS, FTP, NTP, Telnet, SSH.
- Creating templates as per various business requirements.
- Provided customer support, help/troubleshoot users to resolve server, network, and other system-wide problems.

Finesse IT Labs Pvt Ltd, Bangalore.
Sr. System Administrator

July 2013 – Apr 2016

- Implementation and maintenance of DHCP, NFS, NIS, DNS Mailing List, Send mail, FTP and Apache SMTP.
- Involved in installation and configuration of various Third-party software onto servers.
- Installed packages using YUM and Red Hat Package Manager (RPM) on various servers.
- Installation of Database servers and user's management such as Oracle, MYSQL, SQL Server.
- Updating patches to keep servers updated against bugs present in the operating system using Red Hat Satellite Server, yum, etc. Worked on variety of Linux platforms Red Hat Linux, Raspberry which includes installation, Configuring and maintenance of applications on this environment.
- Troubleshooting network administration, IIS configuration, DNS setup and modifications, firewall rule.
- Responsible for independent support of Tier 2 issues: reboots, start/stop services, reset Terminal Experience with supporting and maintaining IP load balancers.
- Worked exclusively on VMware virtual environment. Implemented Bash scripting, to automate day to day job tasks.
- Installed and upgraded packages and patches on RHEL 5.x, 6.2 and 6.5 servers using RPM, YUM and third-party software applications.
- Worked on daily work orders which included configuration of file systems using LVM and Multipathing.
- Update Manager Installed & configured Windows 2008 R2 with Active Directory service Installing, configuring, administering, and troubleshooting VMs on Sphere 4.x and 5.x platform Installed and managed Symantec Endpoint protection software on servers and clients.

Collabera Technologies Pvt. Ltd, Bangalore

Feb 2010 – Jan 2013

Sr. System Administrator / Team Lead

Client: - IBM India Pvt Ltd

- Implementation and troubleshooting of network services like NFS, FTP, NTP, Telnet, SSH.
- Responsibilities Supported Linux servers in production/QA/ Development Environment.
- Responsible for maintaining security on all UNIX system for regulatory compliance.
- Responsible for independent support of Tier 2 issues: reboots, start/stop services, reset Terminal Experience with supporting and maintaining IP load balancers.
- Experience with ticketing tool such as Remedy. Taking Snapshots in the environment.
- Installation and configuration of WebLogic and WebSphere application server.
- Installing, tuning, troubleshooting and patching of Red Hat Enterprise Linux servers.
- Installation, configuration, and maintenance of web servers, application servers, and database servers on Linux Servers.
- Scheduled various regular, periodic, future and queue tasks by using crontab.
- NFS management - take care of user accounts/groups, setting up of NFS environment.
- Processes administration and management like monitoring, start/stop/kill various processes/sub processes.
- Monitor system performance parameters using iostat, vmstat, and fine-tuning.
- Systems administration, maintenance, and monitoring various day-to-day operations.
- Creating and maintaining user accounts, profiles, and security rights
- Installation/upgrade, system startup, and system shutdown as needed.
- Wrote simple bash scripts to ping the servers and add users to the boxes.
- Resolved system errors and crashes, disk space problems, huge file sizes, and file system full errors.
- Performed OS upgrades and Patch loading as and when required
- Backing up and restoring files across the network Wrote Technical documentation for various projects and worked with Technical writer to finalize the documents.
- Troubleshooting Backup and Restore problems Creation of LVMs on SAN using Linux utilities Monitored overall system performance, performed user management, system updates and disk & storage management Environment: Red Hat Enterprise Linux, Shell Scripting, Apache, WebLogic, WebSphere

SpikeSource Software Pvt. Ltd. Bangalore.

Oct 2007 – Dec 2009

Sr. System Administrator

- Responsibilities Supported Linux servers in production/QA/ Development Environment.
- Installing, configuring and maintaining Apache, samba, Web Sphere & Web LogicApplication Servers.
- Proficient in installation, configuration and maintenance of applications like Apache, LDAP, PHP.
- Manage users accounts for the team access for Red hat Satellite server.
- Installed and configured various operating systems like Ubuntu, CentOS, Suse
- Installation of systems using Kickstart for RHEL on Dell HW
- Configure, support and perform routine maintenance of hardware and software for Linux servers.
- Involved in Hardware and software evaluation, recommendation and vendor management.
- Regularly applying patches for Redhat Linux on HP / Dell servers.
- Extensively worked with Business, Application, Database, Network and SAN Team for project requirement. Plan, document, review and maintain system administration guidelines and policies.
- Ensure Data Center operation meets required service levels.24x7 support for the UNIX servers.
- Rotating on call pager responsibilities for Production environment.
- Provided customer support, help/troubleshoot users to resolve server, network, and other system-wide problems.
- Shell scripts to automate daily repetitive activities and monitor a variety of admin services.

InKnowTech Private Ltd, Bangalore

Sept 2003 – Oct 2007

Senior Member Technical

Client: - Trilogy E-Business Software Pvt Ltd

- Installed and configured Linux/Unix and Windows operating systems on VMware server.
- Rotating on call pager responsibilities for Production environment.
- Extensively worked with Business, Application, Database, Network and SALES Team for project requirement. Plan, document, review and maintain system administration guidelines and policies.
- Performed hardware and software installations, upgrades, and maintenance, patch administration, kernel modification/upgrades, file system management, performance and security analysis, and network configuration/tuning.
- Prepared Windows/Unix security standard preparation document and system check procedures to keep the systems secured & updated.
- Implementation and maintenance of DHCP, NFS, NIS, DNS Mailing List, Sendmail, FTP and Apache SMTP.
- Troubleshooting network administration, IIS configuration, DNS setup and modifications, firewall rule.
- Worked on variety of Linux platforms Red Hat Linux, windows which includes installation, Configuring and maintenance of applications on this environment.
- Responsibilities Supported Linux servers in production/QA/ Development Environment.
- Systems administration, maintenance, and monitoring various day-to-day operations.
- NFS management - take care of user accounts/groups, setting up of NFS environment.
- Creating and maintaining user accounts, profiles, and security rights.
- Performed OS upgrades and Patch loading as and when required.
- Installation/upgrade, system startup, and system shutdown as needed.
- Resolved system errors and crashes, disk space problems, huge file sizes, and file system full errors.
- Monitor system performance parameters using iostat, vmstat, and fine-tuning.
- Processes administration and management like monitoring, start/stop/kill various processes/sub processes.
- Installation, configuration, and maintenance of web servers, application servers, and database servers on Linux Servers.
- Backing up and restoring files across the network Wrote Technical documentation for various projects and worked with technical writer to finalize the documents.
- Plan, document, review and maintain system administration guidelines and policies.
- Involved in Hardware and software evaluation, recommendation and vendor management.

Auro Business Systems, Bangalore

March 2002 – Aug 2003

Network & Customer support Engineer

Client: - Airtel

Project: - WAN Support Project for Bharti

- Implemented the new Leased line between the city Bangalore, Delhi, Hyderabad Chennai for Mobile communication for Bharti Broad Band
- Installed and configured the Linux server & Cisco 2610, 3600, 7200-routers.
- Monitored and troubleshooting the more than 18 leased line with Network Traffic analysis software
- Provided customer support, help/troubleshoot users to resolve server, network, and other system-wide problems.
- Implemented the new Network changes and configurations on Cisco router as per the company need
- Co-ordinated with BSNL, VSNL & Vendor to get new leased line and commissioning the same, Providing Local loops & maintains and updates Network Technical drawing.
- Generating the traffic (data) usage of leased lines reports for Daily, Weekly & Monthly
- 24x7 support for the UNIX servers / Network.
- Creating and routing of tickets related to Network issues to Management for T1 and T2 issue for Connectivity issues.

Config Systems, Bangalore
Computer Hardware & Network Engineer

Nov 1999 – Feb 2002

- Installation of Server Linux, Windows NT 4.0 server and workstations
- Installation of win Xp, Win 2000-Advanced Server, Win2000 pro, Redhat Linux
- Implementation and maintenance of DNS, DHCP and Card level troubleshooting in hardware.
- Setting up the small office LAN, WAN, server, printer.
- Supported for Citrix clients' issues, travel management software, Tally
- Responsible for annual maintenance contract renewal
- Ensure the service support and operation meets required service levels.

Microtek Systems, Bangalore
Service Engineer

June 1998 – Oct 1999

- Installation of Operating Systems & software's Win98, Win 95, DOS, WINNT 4.0, Novell, Linux, Win professional, Windows Server
- Installed and configured the System's to peer-to-peer Network
- Assembling & troubleshooting of Computers, laptops, printers, scanner etc.
- Installed and configured the of Dlink L2 Switches and routes.
- Provided customer support, help/troubleshoot users to resolve server, network, and other system-wide problems.
- Installation of UPS, Printers, Dial-up Modem, Scanners, Web camera

Major Projects Handled

ASTRON BPO (Chennai)	: Data center Setup- design, deploy & manage network
Alamy Images (Trivandrum)	: Data center Setup-deploying Server, Router and Switches
RM Education (Trivandrum)	: Data Center Network Facility expansion
ITRAC Projects	: Verizon (Chennai), Mentor graphics (Hyderabad), Wipro (Blr)
Sachi & Sachi	: LAN Optimization (Sachi & Sachi) Bangalore.
Amba research	: Data center Network Facility expansion
Spike Source	: Relocation of Office with Data center
Collabera	: Data center Relation

PROFESSIONAL TRAINING

Project Management	: Prince 2 Foundation and Practitioner certified.
PMP Training	: 35 PDUs/Contact Hours and get Certificate PMP By PMCC India Private Limited Certificate No. PMCC 7829.
Exim	: ITIL Foundation Certified (Exim) Engineer.
Linux	: Redhat Certified Technician (RHCT), Attended 3 Months Corporate training on Solaris.
Network	: Dlink Certified Professional (Router, Switches, Modem) From Dlink (Goa). AMP-TYCO (Structure Cabling) –Certified Engineer.
Oracle	: Developers course in Client /Server Computing -AICTE (9 Months) from Mayan Academy.
Hardware	: Diploma in Computing Hardware from CompuServe.

EDUCATION

Degrees: -

- Master of Computer of Application from – IIMEINIDIA
- Bachelor of Computer Application from – IGNOU
- Diploma in Electronics & Communication Engineering (1996)
- Pre-University (1993)
