

MOHAMMED FAYIS V

Cloud Solution Architect

fayisv2000@gmail.com | 8281885824 | Kozhikode | [LinkedIn](#)

Professional Summary

Cloud Solution Architect with 1.5+ years of experience in designing and managing secure, scalable cloud infrastructures using AWS. Proven ability to optimize performance through robust networking, automation, and security practices. Hands-on expertise in AWS services (EC2, S3, RDS, Lambda), cloud architecture, and Java debugging. Adept at driving innovation and delivering cloud-based solutions that meet client objectives.

Certifications

- AWS Certified Cloud Practitioner** – Bsoft & Udemy (2024)
- Cisco Certified Network Associate (CCNA)** – Bsoft (2023)

Core Competencies

- Cloud Computing:** AWS (EC2, S3, RDS, IAM, CloudFormation, CloudTrail, Lambda), Microsoft Azure
- Networking:** TCP/IP, DNS, VPC, Route 53, Elastic Load Balancing, CCNA
- Security:** AWS Security Groups, IAM, KMS, WAF, Network ACLs
- DevOps & Automation:** CI/CD tools, AWS CLI, CloudFormation
- Programming:** Java (debugging expertise), Python, Bash scripting
- Monitoring & Management:** AWS CloudWatch, CloudTrail

Professional Experience

Assistant System Support Engineer – Tech4Secure, Calicut

Mar 2022 – Sep 2023

- Designed and deployed secure networking solutions using AWS Virtual Private Cloud (VPC) and EC2 instances.
- Reduced system downtime by 15% through proactive diagnostics and hardware/software issue resolution.
- Implemented security measures, including firewalls and intrusion detection systems, to safeguard critical infrastructure.

Technical Support Engineer – Perfect Software Solutions, Calicut

Aug 2021 – Feb 2022

- Leveraged AWS monitoring tools (CloudWatch, CloudTrail) to identify and mitigate system disruptions, improving uptime by 10%.
- Configured and optimized PostgreSQL databases for enterprise applications, achieving 20% performance improvement.
- Collaborated with teams to deploy secure SSH connections and troubleshoot networking issues.

Internships

Java Debugging Intern – Posibolt Solutions, Calicut

Feb 2021 – Aug 2021

- Debugged and optimized Java-based POS systems, enhancing transaction processing speeds by 30%.
- Hosted Java applications on AWS, gaining hands-on experience in cloud deployment and management strategies.

Python Developer Intern – Vitez Software Lab, Calicut

Oct 2020 – Dec 2020

- Contributed to automation scripts for IT operations using Python, improving efficiency by 15%.
- Developed cloud-ready solutions integrating AWS services for data processing workflows.

Academic Background

- Bachelor's in Computer Application (In Progress)** – Sikkim Professional University, Online (2024)
- Diploma in Computer Engineering** – Kerala Government Polytechnic College, Westhill (2021)

Projects

- AWS Cost-Optimization Framework:** Designed a cloud infrastructure using EC2, RDS, and Auto Scaling to reduce costs by 25%.
- Secure Cloud Deployment:** Implemented a secure multi-region architecture leveraging VPC, IAM, and CloudFront.
- Linux Administration on AWS:** Hosted web applications on AWS using S3 and EC2, enabling seamless file migration.

Technical Skills

- AWS Services:** EC2, S3, RDS, Lambda, CloudFormation, CloudWatch
- Networking:** TCP/IP, Route 53, OSI Model, Subnetting, Direct Connect
- Tools:** Git, Jenkins, Docker, Kubernetes (Basic)
