Chennai

PROFILE SUMMARY

- **Experienced Senior Software Engineer:** Over 10+ years of expertise in application development using PHP and MVC framework. Experienced in Magento,Shopware,CodeIgniter and Laravel frameworks.
- **Technical Leadership:** Proven track record of leading development teams, mentoring junior developers, and driving successful project deliveries.
- **Innovative Problem Solver:** Adept at solving complex technical challenges and implementing scalable, high-performance solutions.
- **Process Improvement:** Skilled in optimizing workflows, enhancing application performance query optimization, and ensuring code quality through best practices of PSR 0 & PSR 4.
- **Business-Focused:** Committed to aligning technical solutions with organizational goals to drive growth and deliver value to stakeholders.

CORE COMPETENCIES

- PHP MVC Framework (Laravel 8 & 10,Magento 2 ,Shopware 6,CodeIgniter 3 & 4)
- Design Patterns
- Microservices & RESTful APIs
- Database Management (MySQL)
- Front-End Integration (Node Js,React)
- Version Control - Git,Bitbucket
- DevOps & CI/CD (Docker, AWS)
- Agile Methodologies & Scrum Leadership
- Mentoring & Leading Technical Teams
- Performance Optimization & Scalability

WORK EXPERIENCE

Senior Software Engineer | Ziffity I Chennai | May 2023 - Sep 2024

- Led and developed the Learning Management System (LMS) project is designed to provide an organized platform for internal developers to access and manage learning resources.
- This system is tailored to meet the needs of developer training, skill assessment, and progress tracking within an organization.
- React.js renders content dynamically on the frontend, allowing users to view videos, read articles, and complete exercises.
- The LMS enables streamlined management of courses, quizzes, and progress tracking, with real-time updates and notifications.

Full Stack Developer | Skill Lync | Chennai | May 2022 - Apr 2023

- Demonstrated hands-on expertise in implementing APIs using Node.js to develop the Blog and Blog Details pages for a product website, enhancing the site's content management and user experience.
- Integrated lead data acquisition from a third-party SAP Lead tool, ensuring accurate and efficient data flow into the website's backend.
- Led the implementation of Google Tag Manager, synchronizing data via APIs for seamless integration with the website's front-end, resulting in more effective tracking and analytics.
- Increased lead generation by streamlining data capture and synchronization processes, optimizing the performance of the third-party SAP Lead tool integration.

Senior Software Developer | Technosoft Global Solutions LLP | Chennai | Oct 2018 - Apr 2022

- Led and developed a comprehensive system for managing the shipping process by integrating with the external LARA tool. Leveraged 2 years of Laravel experience to build the backend architecture, ensuring robust data management and seamless integration with external systems. The React.js front-end ensured a smooth user experience by providing real-time voyage data, and seamless interaction with backend APIs.
- Acted as the primary liaison between internal and external users, including the Product Owner and Business Analyst, ensuring smooth communication and alignment with project goals across both the front-end and back-end layers of the application.
- Successfully automated the synchronization of voyage data from the LARA tool, enabling real-time tracking of voyage details for the internal team, significantly improving operational accuracy. The React.js interface allowed for instant updates and visualization of this data, enhancing user interaction.
- Streamlined the export documentation process by providing the team with easy access to up-to-date voyage details from the external system, reducing manual data entry and improving workflow efficiency. The React.js front-end contributed to easy navigation and accessibility for users across different devices.
- Provided continuous support to the internal team, addressing issues and implementing enhancements through a ticket-based system, ensuring the system's reliability and adaptability to evolving needs, with ongoing improvements made to both the Laravel back-end and React.js front-end.

Senior PHP Developer | Auc Ventures Pvt Ltd | Chennai | June 2015 - Sep 2018

- Developed and maintained a custom ERP management software solution specifically designed for jewellery retailers and wholesalers. Leveraged 3 years of Laravel experience to build the backend architecture, ensuring robust and scalable management of product inventory, stock maintenance, billing processes, and reporting functionalities, tailored to the unique needs of the industry.
- Engineered key modules for effective product management, stock control, and billing, ensuring seamless integration of various business processes, which enhanced overall operational efficiency.
- Integrated a tag printer tool using PRN files, enabling automated printing of product tags. This feature streamlined inventory management and significantly improved operational efficiency.
- Designed and implemented a robust sales module to handle billing processes, improving transaction accuracy and reducing manual errors, thereby enhancing the overall reliability of the system.

PHP developer | Cogzidel Technologies pvt ltd | Madurai | Dec 2013 - Apr 2015

- Developed the customization of an Airbnb clone product, implementing a comprehensive service project tailored for a rental management system, including rooms, cars, and bikes.
- Developed and integrated a robust JSON API to facilitate seamless data exchange between the web portal and mobile applications (Android and iOS). This ensured smooth and efficient communication across platforms, enhancing the user experience on mobile devices.
- Automated key aspects of the rental business, significantly reducing manual effort and improving operational efficiency. This automation streamlined business operations, leading to more effective management and service delivery.
