

Summary:

- **13 years of experience in Mainframe Development using COBOL, DB2, CICS, VSAM, REXX and JCL.**
 - Good experience in mainframe development, enhancement, testing and production support of batch and online.
 - **Experience in mainframe migration from CICS screens to distributed (ASP .NET) web applications.**
 - **Experience in full stack development (C#, Java script, CSS, XML and HTML) on cloud Microsoft Azure platform.**
 - Received outstanding performer WOW award from BNY Mellon for mainframe migration to distributed technology.
 - Received award from BNYM for DB2 Data refresh Automation tool which refresh the data from production region to development region without any manual creation and execution of mainframe jobs.
 - Received appreciation from Client for creation of mini version controller tool for KLM airlines.
 - Received appreciation for creation of Impact analysis tool which ensure quality of code and find impacted list.
 - Continuous learner and flexible in adapting new technologies in short span of time. Good communication skills and specialization in requirement gathering.
 - Good innovator, capable of proposing new ideas and implementing the same. Involved in most of the organization level technical discussions and automation activities.
 - Good knowledge in IBM Developer for z/OS (IDz) with Gitlab as change/version controller for the use of DevOps practices, faster delivery with better quality and greater agility.
 - **Received awards for innovation, development of automation tools using REXX for cost efficiency, performance improvement, Risk and Resiliency.**
-

Experience (August 2011 – October 2024) and Project Details:

Tata Consultancy Services (Chennai), Systems Engineer

August 2011 to August 2015(4 years)

- **Client: Target (Retailer, US)**, Worked as a mainframe developer.
