Bangalore

Career Objective:

To perform better than the expectations and to increase the productivity/profits of the company. To act as a source of inspiration for the people around me. To work on challenging projects in the areas of ERP, eCRM, E-Commerce, Client/Server computing, Web based applications and other state-of-the-art technologies and enjoys the benefits of hard work by keeping in pace with cutting Edge technologies.

Skills Summary:

- Oracle 8i
- Oracle 9i
- Oracle 10g
- Oracle 11g
- Oracle 12c
- Oracle 19c
- Real Application Clusters (RAC)
- Performance Tuning
- Security Administration
- Replication
- Disaster Recovery Solutions
- Database Design
- SQL Server 2000,2005,2008/R2
- Recovery Manager (RMAN)
- Standby Database Solutions
- Oracle Enterprise Manager (OEM)
- ITIL
- Unix Shell Scripting
- PL/SQL
- Unix, Solaris, HP-UX, AIX
- Windows NT, 2000
- Project Management
- Exacc Patching
- Data Pump
- Exadata Administration

Experience Summary:

- **Around 10** years of experience in the field of Oracle Database Administration currently working for HCLTech Limited with good working knowledge on Oracle database (8i, 9i, 10g, 11g, 12c, 18c and 19c) on UNIX and Windows platforms.
- **19c/18c/12C/11G/10g - RAC Real Application Cluster** - Oracle Database with RAC, Installation and configuration experience on LINUX Servers. Adminstrating database Instances and Cluster databases, Configuring RMAN backup for Real application clusters, Cluster Management, ASM concept, Converting 10g Single instance to multiple Instances, addition and Removal Nodes from UNIX System. Data Guard – Configuration of Primary and Standby database.
- **Database Management** - Provided 24x7 support of OLTP and Data Warehouse Production Databases, Oracle database installations, enhancements, patches, index rebuilding, Strong ability to deal efficiently on disaster recovery and Incremental backing up of the systems, Manual database creation, Database Cloning - Production database for development and testing purpose.
- **Data Migration** - Migration to Oracle from Cross platform, Oracle Database version upgrade or any other database format, Bulk loads and data migration using SQL*Loader, imp/exp and impdp/expdp. Migrating databases to database appliance (EXADATA).

Work Experience:

1. Worked for HCLTech from Dec 21, 2023 till Jun 10, 2024

Role: Associate Consultant

Project Profile: Novo Nordisk.

Novo Nordisk is a leading global healthcare company, founded in 1923 and headquartered in Denmark. Our purpose is to drive change to defeat serious chronic diseases, built upon our heritage in diabetes. We do so by pioneering scientific breakthroughs, expanding access to our medicines, and working to prevent and ultimately cure disease. Novo Nordisk employs about 66,000 people in 80 countries and markets its products in around 170 countries.

Responsibilities:

- Database administration activities like database refresh, schema refresh, database user security, troubleshooting critical issues.
- Application of patches to databases.
- Resolving database performance issues.
- Building and maintenance of DRs.
- RMAN backup and recovery.
- Manage DR databases
- Monitoring the Health of the Database by periodically checking the Alert logfile.
- Monitoring the status of the backup scheduled in the CRON.
- Monitoring the User and assigning Roles and Privileges as per the Customer's need.
- Monitoring the long running sessions in the Production server periodically.
- Monitoring the status of the RMAN backups.
- Upgradation of databases.
- Performance monitor of the Production Instance periodically.
- Monitoring the space utilization in Archive and Datafile Mount point.
- Refreshing and Restoring the Non production instance with the copy of Backup of Production instance.
- Monitoring the status of the DR with that of Production and Rebuilding the DR as whenever the DR is not in sync with production.
- Investigating & solving on Service Requests (SR's) and execution of Change Requests (CR's) on Priority basis, Ensuring to solve SR's and CR's as per SLA agreement.

2. Worked for IBM India Pvt Ltd from JUN 17, 2021 till DEC 1, 2023

Role: Senior Oracle DBA

Project Profile: National Grid, Vodafone Greece, United Parcel Service and Rockwell Automation

Responsibilities:

- Administering, configuring, performance, recovery, backup and maintenance of the Oracle database environment
- Process orientated approach to database management (inc. change management, incident and problem management)
- CDB Patching, Fixing DG sync issue, Performance Review, DASD Report.
- User & Space administration.
- Database environment refresh using Datapump.
- Client patching, installation, OEM Agent upgradation.
- Monitoring tablespace usage, long running queries, invalid objects.

3. Worked for Cognizant Technology Solutions from NOV 11, 2020 to JUN 16, 2021

Role: Infra Technology Specialist

Project Profile: Western Union

Responsibilities:

- Perform daily checklist to check database health check.
- Database refresh from one environment to another environment.
- Database environment refresh using Datapump.
- Monitoring tablespace usage, long running queries, invalid objects.
- Perform database tuning and implement performance enhancements
- Preparing weekly and monthly analysis and audit reports.
- User management tasks.
- Analyzing query slowness using AWR report and explain plan.
- Process orientated approach to database management (inc. change management, incident and problem management)

4. Worked for Concentrix Technologies India Pvt Ltd from MAY 13, 2016 to SEP 14, 2020.

Current Position: Senior Engineer

Project Profile : Texas Instruments

Texas Instruments Inc. (TI) is an American technology company that designs and manufactures semiconductors and various integrated circuits, which it sells to electronics designers and manufacturers globally. Headquartered in Dallas, Texas, United States, TI is one of the top ten semiconductor companies worldwide, based on sales volume.

Responsibilities:

- Managing remedy ticket queues, Troubleshooting issues, handling escalations.
- Performing Backup and Recovery through RMAN Backups.
- Troubleshooting basic database issues in RAC Environment.
- Standby database creation using cold/hot backups, troubleshooting standby issues (Archive log gap issues Etc.)
- Database change review for all the new/changing structures.
- Identifying and fixing various ORA errors and raising SR to the Oracle support team when required.
- Have a good exposure to incident, change and problem management concepts.
- Have a good exposure on BMC-Remedy ticketing tool.

5. Worked for Hewlett Packard Global Soft Pvt Ltd from OCT 07, 2015 to MAY 12, 2016.

Role: Technology Consultant – DBA

Responsibilities:

- User Administration
- Capacity management
- Client Support
- Exadata Administration
- RMAN Backup and Recovery
- Data Pump

- Installations/Upgrade/Patching
- Performance Tuning
- Data guard
- SQL Server database administration
- VCS Cluster

6. Worked for IBM India Pvt Ltd, from MAR 26, 2014 to OCT 03, 2015.

Role : Senior Database Administrator

Project Profile: Cloud Managed Services Delivery

I am involved in the project as a **Senior Database administrator** supporting **24x7** to the different application teams (SAP, Oracle E-business, Siebel, Ariba, PeopleSoft, PTC Windchill, JD Edwards, BI (OBIEE, Hyperion) etc) and end users for more than 150+ clients in shared delivery model, hosted at IBM. The existing Database environment having size range from 50GB to 5TB, around 1000+ Databases, mostly OLTP with 2000+ concurrent users and most of the operating systems are like Sun Solaris, HP-UX, AIX, Linux & Windows.

Responsibilities:

- Performed a key role in Database Migration, Upgrades and Database disaster recovery tests.
- Database Deep dive health checks & 360-degree performance review
- Cluster Installation, Administration and Troubleshooting
- Administer and manage several large databases in RAC and non-RAC environment
- Drive the RCA process and implementation with SA and SMEs
- Ensure transfer of best practices across accounts.
- Implementation/Closure of investigation
- Change Review / Approval
- Applying of Interim, Patchset and CPU patches.
- Maintaining Data guard environment.
- Conducting DR tests in each quarter.
- Create customize scripts for DB health checks and for other monitoring.
- Administer and Maintain Oracle Applications
- Maintain RMAN and Expdp/Exp backups for Databases.
- Do Proactive monitoring of space management.
- Work with Oracle Vendor to resolve critical Database issues.
- Perform Database Refreshes based client/app team request.
- Work on Root cause analysis in case of a problem.
- User and Rights administration
- Batch management, Patch management, disk space administration
- Add or modify data files – increase or decrease to change size of the database, relocate.
- Assessment of customer needs and recommendations for improved configuration and implementation
- Provide both office hours support & on call as required.
- Ensure backup/recovery and cloning of databases.
- Participate with project team in the implementation of new projects, analyzing performance, recommending solutions to enhance performance.
- Troubleshoot any production issues and any security remediation, patch.

7. Worked for Oracle India Pvt Ltd from SEP 30, 2010 to MAR 24, 2014.

Role: Senior Analyst

Project Profile: Customer Operations (Install Base)

With more than 380,000 customers including 100 of the Fortune 100 and with deployments across a wide variety of industries in more than 145 countries around the globe, Oracle offers an optimized and fully integrated stack of business hardware and software systems.

Responsibilities:

- Came up with lot of process updates and creative ideas and also found lot of process bugs and communicated the same to AIT team to fix them. Thus, helped a key role in standardizing the Sun process.
- Worked on GWR (Global warranty registration) this includes updating warranty dates and changing the ownership to the end user.
- Handled GWR and IB service requests simultaneously and trained the new joiners on the process and ensured a good process knowledge and productivity from them on both GWR and IB.
- Worked as queue Monitor, during that tenure I was responsible for assigning the requests to the team of more than 30 people as per their individual expertise in different processes.
- As a queue monitor, I was responsible for the queue not to build up and handle escalations on both GWR and IB process. I handled escalations effectively which required a sound verbal and written communication with the requesters all around the world.
- Used excel skill to handle the bulk service request so that it can save the time and improve the productivity.
- Worked on bulk server configuration of different types on cloud computing. Also worked on the contract related issues like authoring of the contract, stripe change and service line change.
- Worked on bulk **order booking** requests for Sun hardware and Oracle Software.
- Worked on Tech refresh process which is refreshing the technology for the customers who wish to go for the upgraded systems or servers.
- Worked with PRG (Product release group) to fix the parts in GSI environment.
- Works closely with **Sales, Contracts and AR** Team to ensure timely generation of Invoices from **Order Management** or **Service Contracts**.
- Work with **Collections** Team to accelerate the cash collection on time.
- Responsible for conducting internal Audit for the Team.
- Responsible for testing of applications (UIT and Regression tests).
- Responsible for managing a team spanning 20-25 agents, Coach, train and provide feedback for effective performance management.
- Manage and improve people performance and align them with organizational goals and objectives.
- Lead and motivate team to facilitate achievement of SLA and to exceed customer expectation.
- Pro-actively anticipate customer needs thereby ensure customer satisfaction.
- Facilitate and implement process improvement ideas to improve efficiency.

Awards & Recognitions:

- Awarded as "**Rising Star**" for the one who helps drive transformational change and operational excellence in Oracle India Pvt Ltd.
- Received "**Manager choice award**" for the practice "**Listen for the need envision for the future**" in IBM India Pvt Ltd.
- **ITIL V3 Foundation** certified (IBM Internal)
- Oracle Database Administration 19c Version Certified Associate.

Academic Profile:

- 10th from Karnataka Secondary Education Examination Board, with 72.10% in 2005.
- 12th from Karnataka P.U Education Board, with 68.17% in 2007.
- B.C.A Graduation from Bangalore University, with 80.66% in 2010.

Personal Details

Marital Status : Single
Date of Birth : 20-Oct-1989
Address : No.5, Ekshana Building, Muneshwara Layout, Kadugodi Post, Bangalore - 560067.
