Education

Jain Deemed-to-be University

Master of Computer Applications

2022 – 2024

CGPA: 9.25

Mount Carmel College, Autonomous

Bachelor of Computer Applications

2018 – 2021

CGPA: 7.02

Experience

Brillio

Data Engineer

September 2021 – July 2024

Bengaluru, Karnataka

- Developed and deployed Python scripts to automate workflows and streamline routine tasks, saving significant operational time.
- Utilized PySpark to process and transform large-scale datasets, improving data processing efficiency by 40%.
- Customized Power BI dashboards with DAX scripting, meeting specific client requirements and increasing client satisfaction by 25%.
- Implemented advance SQL queries globally for efficient data extraction and transformation, achieving a 20% reduction in client processing time.
- Automated manual tasks using Azure Data Factory and Azure Databricks reducing operational inefficiencies by 60%.
- Developed scalable ETL pipelines with Azure services, streamlining data integration and transformation processes.
- Optimized data workflows using Azure Synapse reducing processing time by 50%.
- Quickly diagnosed and resolved operational issues to maintain seamless data flow and system stability.
- Collaborated with cross-functional teams to design and implement data-driven solutions, aligning business objectives with technical execution.

Academic Projects

Sentiment Analysis of Student Mental Health | *Python, Power BI*

- Developed a comprehensive sentiment analysis framework to evaluate student mental health data, identifying emotional patterns and concerns for improved understanding of student well-being.
- Implemented personalized treatment suggestions based on sentiment analysis results.
- Created interactive Power BI dashboards to visually present sentiment analysis findings.

Kids Pre-owned products App | *Java, Android Studio, SQL, Firebase*

- Developed an Android application using Java and Android Studio to enable buying, selling, and renting of kids preowned products.
- Showcased skills in designing intuitive user interfaces, implementing backend functionalities, and integrating secure payment and messaging features.
- Promoted sustainability by encouraging the reuse of children's items and reducing waste

Technical Skills

Programming Languages: Java, Python

Databases & Data Engineering: MySQL, Azure Data Factory, PySpark, Azure Databricks

Tools & Platforms: Power BI, PowerApps, Android Studio, ETL tools, Advanced Excel

Achievements

Group Excellence Award

- Honored twice at Brillio (July 2022 and October 2023) for exceptional customer success, automation of key business processes, and driving process optimization that significantly enhanced operational efficiency and client satisfaction.
