SUMMARY

Highly motivated DevOps and Cloud Engineer with 1.7+ years of hands-on experience in designing, implementing, and optimizing development tools and scalable infrastructure. Proficient in Continuous Integration (CI) and Continuous Delivery (CD) methodologies, building and maintaining efficient CI/CD pipelines to enhance software delivery processes.

EXPERIENCE

DevOps Engineer

ExcelR Solutions

09/2022 - 04/2024 Bangalore

A company providing professional training solutions and consulting services.

- Expertise in **AWS services**, including **EC2, VPC, IAM, S3, Route 53, EKS, ALB, NLB, ASG, CloudFront, SNS, SQS, and RDS**, enabling efficient and secure cloud solutions.
- Strengthened **cloud network security** by configuring **firewalls (Security Groups), NACLs**, and implementing **Bastion hosts** for secure access control.
- Skilled in **containerization** and orchestration using **Docker** and **Kubernetes**, streamlining application deployment and management.
- Proficient in **Infrastructure as Code (IaC)** with tools like **Terraform** and **Ansible**, constructing reusable templates to standardize infrastructure deployment.
- Designed and implemented automated **CI/CD pipelines** using **Jenkins**, integrating tools such as **SonarQube** and **Nexus** to enhance code quality and artifact management.
- Developed and managed **Ansible playbooks, roles, and handlers** for efficient configuration management and optimized infrastructure maintenance processes.
- Leveraged version control systems like **Git** for source code management and collaboration.
- Ensured seamless **Build, Test, Deploy, and Release** management across various environments (development, production), supporting continuous integration and delivery.
- Orchestrated continuous build and deployments, ensuring reliable and scalable application rollouts across multiple environments.
- Developed custom Docker images using Dockerfile for containerizing applications.

EDUCATION

B.Tech

Jawaharlal Nehru Technological University

01/2018 - 01/2022 Anantapur

SKILLS

Ansible	Artifactory	AWS Cloud	
Shellscripting	CentOS	CI/CD	
Ansible	Continuous Delivery		
Continuous Integration		DevOps	
Docker	EC2	Firewall	Git
Github	Grafana	Terraform	IAM
Jenkins	Kubernetes	Linux	
Network security		Nexus	Nginx
SQL	Prometheus	AWS Cloud	

PROJECTS

End to end Delivery of LMS Application

01/2023 - 04/2024

The aim of this project is to deploy the LMS (Learning Management System) application onto the cloud, so that it can be accessible over the Internet.

- Deployed the LMS app with traditional setup on EC2 and VM's.
- Deployed the same application using containerization.
- Deployed the same application on Kubernetes to obtain higher availability.
- Deployed the same application with CI/CD to obtain automation.
