EXPERIENCE

Data Engineer Intern

02/2024 to 07/2024

Indium Software

Hyderabad, TS

- Processed and refined Uber rides dataset, resolving null values and anomalies.
- Performed in-depth analysis on critical metrics like trip distance, fare amount, and payment mode; identified patterns and optimized pricing strategies, boosting overall revenue by 20%.
- Produced professional-grade reports and interactive visualizations through Python (Pandas, NumPy) and Tableau, improving data insight accessibility and cutting report generation time by 45%
- Facilitated to data-driven decision-making processes, optimizing operational efficiency and user experience.

Data Analyst

03/2022 to 12/2022

Tiger Analytics

Chennai, TN

- Developed and optimized SQL queries for data extraction and reporting, improving data retrieval speed and enabling faster decision-making processes.
- Migrated datasets from databases to Microsoft Azure and ensuring real-time analytics for better decision-making.
- Skilled in data filtering techniques using platforms like Databricks to ensure data quality by eliminating null values, duplicates, and irrelevant entries.
- Developed data pipelines in Data Factory, ensuring smooth data flow and efficient monitoring of data processes.
- Formulated impactful reports and interactive visual tools using Python (Pandas, NumPy) and Tableau, achieving a 30% reduction in report preparation time and enhancing operational efficiency through better data transparency

PROJECTS

Pilot Project Simulation:

| Python, SQL, Azure, Databricks, Data Factory

05/2022 to 08/ 2022

- Proficient in developing pipelines to extract and ingest diverse data formats for consumption by business users.
- Architected a robust data lake system with multi-zone storage, boosting data processing efficiency by 35% and reducing data retrieval times by 20% for business intelligence operations.
- Designed comprehensive Power BI reports that visualized key performance indicators, resulting in a 15% reduction in project turnaround time and enhancing team productivity by 25%.

Sales Insights | SQL, Power BI

01/ 2023 to 02/2023

- Conducted comprehensive data analysis using Python and SQL, visualizing key insights with PowerBI drove a 25% increase in operational efficiency by optimizing workflow processes.
- Analyzed regional sales data and presented actionable insights to stakeholders, enhancing ability to make data-driven decisions
- Designed and implemented strong dashboards in Power BI, shortening the time to produce reports by 60% and allowing sales analysts to identify opportunities 30% faster, resulting in a 10% revenue boost.

TECHNICAL SKILLS

Languages: Python, SQL, R, Advanced Excel

Web Technologies: HTML/CSS

Cloud servers: Microsoft Azure, Data Factory, Data bricks, Power BI, Tableau

Libraries: pandas, NumPy, Matplotlib

Analysis: Data Analysis,Data Management,Quality Assurance,Data Importing, Data Processing,Data Mining,Data Cleansing,Data Visualization.

EDUCATION

Vellore Institute of Technology

Vellore, TN

Bachelors of Technology in Electronics and communication engineering

8.17 GPA

05/2018 to 08/2022

Narayana Junior College

96.5%

05/2016 to 04/2018

Narayana School

9.7 GPA

06/2015 to 04/2016

CERTIFICATIONS

Simplilearn Python certificate

Udemy SQL certificate

Simplilearn Azure certificate
