Summary

Seasoned smart contract developer with 4 years of expertise in Solidity, Algorand, Bitcoin-sv. Successfully deployed multiple contracts to mainnet, demonstrating practical experience in secure and efficient decentralized application development.

Education

SSM Institute of Engineering and Technology , BE in Computer Science	Mar 2016 – Apr 2020
• GPA: 7.9	
St.mary's Higer secondary school , Higher Secondary in Computer Science	Apr 2014 – Apr 2016
• GPA: 7.7	
St.mary's Higher secondary school , High School education	Apr 2009 – Jan 2014
• GPA: 8.8	

Experience

Jr.Blockchain developer , Osiz Technologies – Madurai, India	Oct 2020 – Jul 2021
• Worked primarily on the smart contract development as a part of research team using solidity • Documented intricate details surrounding all aspects of NFT creation and staking processes; established clear guidelines which were utilized team-wide — enhancing overall project consistency during development phases over five months.	
Associate Blockchain developer , Netobjex – Trivandrum, India (Contract)	Jul 2021 – Feb 2022
• Developed an NFT marketplace on Algorand Blockchain Using PyTeal and Wallet eco system for the NFT marketplace using Algosigner wallet.	
Blockchain developer , Guradianlink – Chennai, India	Feb 2022 – Jul 2023
• Worked on Asia's largest metaverse Marketplace , developed Smart contract and Backend Architecture as well Image generation scripts for metaverse	
Senior Blockchain developer , Calsoft – Chennai, India (Contract)	Jul 2023 – May 2024
• BulkDisburse - Bulk disbursal contract to reward USDT to the gamers - Still live and disbursed 500k+ already • Upgradable Shadow Wallets - Account Abstraction based shadow wallet for mobile users - 12k+ smart contract wallets created • SmartTransfer - EIP712 standard meta-txn enabled USDT transfer without the need of gas - Still live and 45k+ transactions already executed	
Senior Blockchain developer , Chainscript labs – Tenkasi, India	Jul 2024 – Present
• IamverseToken Gating - I developed an NFT token gating system for Iamverse NFT collections. • BitcoinSV Blockchain - Developed a comprehensive wallet ecosystem for Iamverse on the BitcoinSV Blockchain, achieving an increase in user adoption rates by 40 percent through enhanced transaction efficiency and reduced fees across platforms for end users.	

Projects

Jump.Trade	Feb 2022 – Jul 2023
Lootmogul-Marketplace	Jan 2023 – Jul 2023
Giantplanets-Marketplace (Real-world-Assets)	Aug 2023 – Dec 2023
Smart contract deployment : Onchain	Oct 2020 – present

Technical Skills

Programming Languages: Solidity, Typescript, JavaScript, sCrypt, Sway, Ether.js, Web3.js, PyTeal
Frameworks and Tools: Node.js, Nest.js, wagmi, MongoDB, Hardhat, Foundry, Github, Jira, Docker, Stripe
